Peasants, Politics and Revolution Joel S. Migdal, 2015-03-08 During the last quarter century peasant participation in politics has increased markedly in parts of Latin America and Asia Why the poor and vulnerable peasant population has chosen to leave the confines of the village for political activity and at times for sustained revolution is the question this book explores The author draws on informal interviews and observation of peasants in Mexico and India and on fifty one community studies of peasants in Asia and Latin America compiled by ethnographers in the last forty years He suggests that severe economic crises have driven peasants to roles in the larger economy outside the village where they are initially attracted to politics by material incentives Originally published in 1975 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Guatemalan Indians and the State Carol A. Smith, 2014-10-14 Violence in Central America especially when directed against Indian populations is not a new phenomenon Yet few studies of the region have focused specifically on the relationship between Indians and the state a relationship that may hold the key to understanding these conflicts In this volume noted historians and anthropologists pool their considerable expertise to analyze the situation in Guatemala working from the premise that the Indian state relationship is the single most important determinant of Guatemala's distinctive history and social order In chapters by such respected scholars as Robert Cormack Ralph Lee Woodward Christopher Lutz Richard Adams and Arturo Arias the history of Indian activism in Guatemala unfolds The authors reveal that the insistence of Guatemalan Indians on maintaining their distinctive cultural practices and traditions in the face of state attempts to eradicate them appears to have fostered the development of an increasingly oppressive state This historical insight into the forces that shaped modern Guatemala provides a context for understanding the extraordinary level of violence that

enveloped the Indians of the western highlands in the 1980s the continued massive assault on traditional religious and secular culture the movement from a militarized state to a militarized civil society and the major transformations taking place in Guatemala's traditional export oriented economy In this sense Guatemalan Indians and the State 1540 to 1988 provides a revisionist social history of Guatemala

Guatemala Peter Calvert, 2019-03-04. Guatemala has long been a field for struggle between other powers and today racked by civil war it avoids the full glare of international attention only because most of the Central American region is beset by similar problems. Despite a continued belief in the reconstitution of a unified Central American state and a long running claim to Belize, Guatemala has played a passive rather than an active role in international politics. The influence of international economic interests explains to a large degree why Guatemala has not been more active in the international arena. In this book Professor Calvert examines Guatemala's history and the principal aspects of the country's factional society and seeks to explain the problems and their consistently violent manifestations that have attended the course of the country's social, economic and political development.

The Social Structure of Right and Wrong Donald Black, 2014-05-10. The Social Structure of Right and Wrong focuses on formulations that predict and explain the nature of social control throughout the world and across history. The publication first offers information on social control as a dependent variable, crime as a social control and compensation and the social structure of misfortune. Discussions focus on the theory of compensation, traditional self-help, concept of social control, varieties of normative behavior, models of social control and quantity of normative variation. The text then elaborates on social control of the self and elementary forms of conflict management. The manuscript takes a look at the theory of third party and on taking sides, including legal, latent and slow partisanship, social gravitation, models of partisanship, settlement roles, partisanship in tribal societies and typology of third parties. The text then examines the factors involved in making enemies as well as social repulsion, moral evolution and third party and unilateral moralism. The publication is a dependable source of data for sociologists and researchers interested in the social structure of right and wrong.

Urban Dynamics in Black Africa William John Hanna, Judith Hanna, Judith Lynne Hanna, 2009-01-01. Urban Dynamics in Black Africa presents a succession of worlds where we can study the development and the crystallization of major social change. The authors trace the development of former villages, towns and colonial outposts into major cities within the international community. Open air markets continue their trading beside modern department stores as individual Africans create contemporary lives from old and new. William J. and Judith L. Hanna in this unique work introduce new data and the methods of dependency theory, class and gender analysis; they offer connections between Africa's internal dynamics, its legacy of imperialism and the international political and economic arena. At the same time the book provides a model for studying the evolution of political institutions. Urban Dynamics in Black Africa illustrates how social classes modify and are modified by

existing cultural forms The book examines Africa in its independence by contrasting development and dependency role adaptability and conflict in a powerful conceptual matrix Detailing the urban conditions that exist throughout Africa as well as their costs and benefits this work shows how contemporary political conflict in urban Africa is based upon both ethnic and non ethnic ties and how these ethnic and non ethnic ties serve as the bases of a system of political integration unique to poly ethnic communities As a synthesis of the relevant available knowledge on African towns and town dwellers this book is concerned primarily with the effects of external intervention and socioeconomic modernization upon the birth and development of Africa s new towns and the rapid expansion of its old ones It considers the impact of migration and town life upon Africans William J Hanna is professor of urban studies and planning at the University of Maryland His research interests include international development social planning and community planning He is the author of numerous journal articles Judith L Hanna is senior research scholar in the departments of dance and anthropology at the University of Maryland She is the author of numerous journal articles and books on the subject of dance Fields of the Tzotzil George A. Collier, 2014-07-03 Fields of the Tzotzil is the first study of social processes in contemporary highland Maya communities to encompass a regional view of the highlands of Chiapas as a system In viewing tradition not as a survival of traits but as a dynamic process of adaptation by local systems to their placement in larger social and economic systems it lays to rest the theory that tribal peoples apparently are politically and economically isolated In addition its broad regional perspective sheds light on the problems of understanding the position of traditional ethnic groups in contemporary society The approach of the book is ecological in two senses First all the topics dealt with concern the traditional behavior of Indian groups as revealed in their relationship to the land Second the analysis seeks out factors that condition land use not just locally but as part of a larger system that includes influences of the market and the impact of nationalist agrarian policy Thus the author examines land inheritance patterns and food production as well as the interethnic relations in the region in which Indians are subordinate to mestizos He discusses in detail corn farming craft specialization wage labor and Indian colonization efforts under the Mexican ejido all factors that directly affect land use and are thus part of the environment in highland Chiapas The study is unique in its use of previously inaccessible historical source material and its use of novel methodological aids Aerial photography was used in data collection and the computer was used in ethnographic census analysis The result is a book that reveals the Indian groups of Chiapas as apparent enclaves whose ethnicity is a dynamic adaptive response to their position of marginal dependency While their plight is extreme it is nevertheless structurally similar to the position of ethnic groups in most large social systems three preliminary bibliographies of works related to the social sciences in latian america tres bibliografias preliminares de obras relacionadas con las ciencias sociales en america latina Programa Interamericano de Información Popular, 1962
