Kaufmann,2019-07-30 The authors of *Castrum to Castle* trace the evolution of defensive architecture at the turn of the late Middle Ages and the beginning of the Renaissance Old Barbed Wire Blog Across western Europe the long tradition of castle building took on its most sophisticated form in the later Medieval period and then in response to the development of gunpowder weapons it underwent a fundamental change from castle to fortress This the second volume of a highly illustrated new study of medieval fortification gives a fascinating insight into the last great age of castles and the centuries of violence and conflict they were part of It traces the advances made between the twelfth and the fifteenth centuries looking in particular at the form these fortifications took in contexts as different as Italy Wales France and the Iberian Peninsula Many would regard this period in the history of castles as the classic age It was followed by a phase of relative decline as the conditions of warfare changed and castles had to be adapted to cope with cannon The conventional castle gave way to new styles of fortification But as the authors demonstrate they were still essential factors in military calculations and campaigns they were of direct strategic and tactical importance wherever there was an attempt to take or hold territory A fascinating treatise on the way such buildings were modified to provide protection from growing threats Books Monthly **Crusader Castles** Brian Hoggard,2004 Looks at the costs construction builders and renovations of fortresses created by the Crusaders occupying the Middle East **The World of Castles and Forts** Malcolm Day,1996 An illustrated history of castles and forts through the ages from Mycenaean citadels to bomb shelters *The Castles and Keeps of Scotland* Frank Roy Fraprie,1907 Description of fortresses towers peels and houses of strength built in the highlands islands and borders of ancient Scotland **The Medieval Castle** Philip Warner,1971 This book explains why and how castles were built in the middle ages and why they were such a dominant influence on medieval life especially in times of war Detailed picture of daily life in a medieval castle Bio chemical warfare including use of quicklime **Castles** Rosie Serdiville,John Sadler,2020-01-10 The authors of *Knights Chivalry and Violence* let readers inside the walls of the medieval period s most iconic structure In ancient and medieval times the castle was the ultimate symbol of power dominating its surroundings and marking the landscape with its imposing size and impregnable design This concise and entertaining short history explores the life of the castle one that often involved warfare and sieges The castle was a first and foremost a fortress the focus of numerous clashes which took place in the twelfth and thirteenth centuries Castles became targets of sieges such as that organized by Prince Louis of France against Dover Castle in 1216 and were forced to adopt greater defensive measures Also explored is the evolution of castles from motte and bailey to stone keeps in the face of newly developed siege machines and trebuchets The trebuchet named Warwolf which Edward I had assembled for his siege of Scotland s Stirling Castle reportedly took three months to construct and was almost four hundred

feet tall on completion With features such as murder holes for throwing boiling oil at the attackers the defenders in the castle fought back in earnest Alongside such violence the castle functioned as a residence for the nobles and their servants often totaling several hundred in number It was the location for extravagant banquets held in the great hall by the lord and lady and the place where the lord carried out his administrative duties such as overseeing laws and collecting taxes
