Anamorphoses Jurgis Baltrušaitis, 1969 **Anamorphoses, ou Perspectives curieuses. Anamorphoses, ou Magie artificielle des effets merveilleux. Présentation: Marie-France de Falandre** Jurgis BALTRUŠAITIS, Marie France de FALANDRE, 1969 Instruments in Art and Science Helmar Schramm, Ludger Schwarte, Jan Lazardzig, 2014-08-29 This volume presents a collection of original papers at the intersection of philosophy the history of science cultural and theatrical studies Based on a series of case studies on the 17th century it contributes to an understanding of the role played by instruments at the interface of science and art The papers pursue the hypothesis that the development and construction of instruments make a substantive contribution to the opening of new fields of knowledge the development of new cultural practices but also to the delineation of particular genres methods and disciplines This perspective leads the authors to reflect anew on what actually defines an instrument and to develop a series of basic questions to determine what an instrument is which actions does the instrument incorporate which actions does the instrument make possible when do the objects of examination themselves become instruments what skills are required to use an instrument which skills does it produce With its combination of new theoretical models and historical case studies its detailed demonstration of the mutual influence of art and science with the instrument as the point of intersection this volume enters new territory It is of great value for all those interested in the history of our perception of instruments Besides the editors the authors of the papers are Jörg Jochen Berns Olaf Breidbach Georges Didi Huberman Peter Galison Sybille Krüger Dieter Mersch Hans Jörg Rheinberger Wilhelm Schmidt Biggemann and Otto Sibum **New Perspectives on Dubliners**, 2021-11-08 The Disciplinary Frame John Tagg, 2009 How do photographs gain their meaning and power John Tagg claims that to answer this question we must look at the ways in which everything that frames photography the discourse that surrounds it and the institutions that circulate it determines what counts as truth **The Madness of Vision** Christine Buci-Glucksmann, 2013-01-27 Christine Buci Glucksmann's *The Madness of Vision* is one of the most influential studies in phenomenological aesthetics of the baroque Integrating the work of Merleau-Ponty with Lacanian psychoanalysis Renaissance studies in optics and twentieth century mathematics the author asserts the materiality of the body and world in her aesthetic theory All vision is embodied vision with the body and the emotions continually at play on the visual field Thus vision once considered a clear uniform and totalizing way of understanding the material world actually dazzles and distorts the perception of reality In each of the nine essays that form *The Madness of Vision* Buci Glucksmann develops her theoretical argument via a study of a major painting sculpture or influential visual image Arabic script Bettini's *The Eye of Cardinal Colonna* Bernini's *Saint Teresa* and his 1661 fireworks display to celebrate the birth of the French dauphin Caravaggio's *Judith Beheading Holofernes* the Paris arcades and Arnulf

Rainer's self-portrait among others and deftly crosses historical national and artistic boundaries to address Gracián's *El Criticón*, Monteverdi's opera *Orfeo*, the poetry of Hafiz, John Donne and Baudelaire as well as baroque architecture and Anselm Kiefer's Holocaust paintings. In doing so, Buci Glucksmann makes the case for the pervasive influence of the baroque throughout history and the continuing importance of the baroque in contemporary arts.

Shakespeare and Renaissance Literary Theories Michele Marrapodi, 2016-04-01 Throwing fresh light on a much discussed but still controversial field, this collection of essays places the presence of Italian literary theories against and alongside the background of English dramatic traditions to assess this influence in the emergence of Elizabethan theatrical convention and the innovative dramatic practices under the early Stuarts. Contributors respond anew to the process of cultural exchange, cultural transaction and generic intertextuality involved in the debate on dramatic theory and literary kinds in the Renaissance, exploring with special emphasis on Shakespeare's works the level of cultural appropriation, contamination, revision and subversion characterizing early modern English drama. *Shakespeare and Renaissance Literary Theories* offers a wide range of approaches and critical viewpoints of leading international scholars concerning questions which are still open to debate and which may pave the way to further groundbreaking analyses on Shakespeare's art of dramatic construction and that of his contemporaries.

Shakespeare and Visual Culture Armelle Sabatier, 2016-11-17 Statues coming to life and lively portraits ready to breathe in Shakespeare. This new volume reassesses the key role played by visual culture in his drama and poetry by providing readers with an up-to-date guide to the main publications on the subject as well as offering a synthesis on the main literary and historical sources for inspiration. While scrutinising the complex issue of image on an Elizabethan stage and exploring the codification of colours in Shakespeare's poetry, this dictionary highlights the fierce rivalry between the poet, the dramatist and the visual artist. This volume will be of great interest and value to students of Shakespeare, students of art history or anyone working on the interdisciplinary subject of literature and art.

The Scientific Counter-Revolution Michael John Gorman, 2020-09-17 Jesuit engagement with natural philosophy during the late 16th and early 17th centuries transformed the status of the mathematical disciplines and propelled members of the Order into key areas of controversy in relation to Aristotelianism. Through close investigation of the activities of the Jesuit school of mathematics founded by Christoph Clavius, *The Scientific Counter-Revolution* examines the Jesuit connections to the rise of experimental natural philosophy and the emergence of the early scientific societies. Arguing for a re-evaluation of the role of Jesuits in shaping early modern science, this book traces the evolution of the Collegio Romano as a hub of knowledge. Starting with an examination of Clavius's Counter-Reformation agenda for mathematics, Michael John Gorman traces the development of a collective Jesuit approach to experimentation and observation under Christopher Grienberger and analyses the Jesuit role in the Galileo Affair and the vacuum debate. Ending with a discussion of the transformation of the Collegio Romano under

Athanasius Kircher into a place of curiosity and wonder and the centre of a global information gathering network this book reveals how the Counter Reformation goals of the Jesuits contributed to the shaping of modern experimental science

Italian Studies in Shakespeare and His Contemporaries Michele Marrapodi, Giorgio Melchiori, 1999 The papers collected in this volume set out to present some significant Italian contributions to Shakespeare studies that scattered through a number of publications not available outside Italy might have escaped the attention they deserve They are representative though by no means exhaustively of approaches to Shakespeare and his contemporaries in Italy and may convey a sense of the vitality and extreme variety of critical and scholarly attitudes in this field

Abstract Machines Garin Dowd, 2007
Abstract Machines Samuel Beckett and Philosophy after Deleuze and Guattari is an innovative approach to the relationship of

the work of Samuel Beckett to philosophy The study seeks to combine intertextual analysis and a schizoanalytic genealogy derived from the thought of Gilles Deleuze and Felix Guattari to explore a becoming philosophy of Beckett's literary writing The author focuses on zones of encounter and confrontation spaces and times of becoming between Beckett selected philosophers and Deleuze and Guattari In the retrospective glance occasioned by that part of Deleuze and Guattari's complex legacy which embraces their interest in the author Beckett's writing in particular effectuates a threshold hesitation which can be seen directly to impact on their approach to the history of philosophy and on their contribution to its molecularization in the name of experimentation Abstract Machines with its arresting perspectives on a wide range of Beckett's work will appeal to academics and postgraduate students interested in the philosophical echoes so evident in his writing The extent of its recourse to philosophers aside from Deleuze and Guattari including notably Alain Badiou renders it a timely and provocative intervention in contemporary debates concerning the relationship of literature to philosophy both within Beckett studies and beyond

Paracelsian Moments Gerhild Scholz Williams, Charles D. Gunnoe Jr., 2003-03-01 Scientific ideas inspired by religious magical and alchemical themes competed alongside traditional Aristotelian science and the emerging mechanical philosophy in the early modern era At the center of this ferment was a quirky and creative German physician Paracelsus whose religious alchemical worldview served as an inspiration for countless scientific innovators This collection is about Paracelsus and the wide range of issues he explored and ones taken up by many who were directly or indirectly affected by the same mental universe that sustained his thought and writings This volume includes strong contextual studies on Paracelsianism and the larger cultural history of early modern science including groundbreaking studies on Robert Boyle Francois Rabelais Giovanni Pico della Mirandola and Johannes Praetorius

Optical Corrections in the Sculpture of Donatello Robert Munman, 1985 There is considerable evidence for Donatello's use of optical corrections that scholars have largely ignored It may come in some degree from an unwillingness to accept the idea that such visual effects developed only in the 16th century Donatello's Sculpture in the Round The Reliefs Bibliography of Frequently Cited Sources 64 black white photos of Donatello's sculptures
