Trindade, 2020-10-06 No Laughing Matter Race Joking and Resistance in Brazilian Social Media examines the social phenomenon of construction and dissemination of colonial like

racist discourses fostered against upwardly mobile black women through disparagement humour on social media platforms adopting a fresh and innovative perspective In this book Luiz Vale rio P Trindade explores the idea that disparagement humour might not be as exempt of social impact as the jokers might believe and that in fact this kind of humour reveals the hidden facet of deep seated colonial ideologies still present in Brazilian society despite being hailed as a unique model of a post racial society The author argues that these ideologies establish and naturalise superior social positions and symbolic privileges to whites while undermining and delegitimising black women s upward social mobility Social media platforms enable the proponents of these beliefs not only to engage in the practice of online hate speech but also to attract a considerable number of like minded people creating a long lasting echo chamber effect in the cyberspace This way they manage to amplify the reach and reverberation of their racist discourses in the online environment in ways not commonly seen in Brazilian offline social contexts This monograph is of great interest and relevance to students scholars and researchers across a variety of disciplines most notably Critical Race Studies Media Communication Studies and Critical Humour Studies and also academics in other areas such as Critical Discourse Analysis Postcolonial Studies Cultural Studies and Latin American Studies

What We Now Know About Race and Ethnicity Michael Banton, 2015-10 Attempts of nineteenth century writers to establish race as a biological concept failed after Charles Darwin opened the door to a new world of knowledge Yet this word already had a place in the organization of everyday life and in ordinary English language usage This book explains how the idea of race became so important in the USA generating conceptual confusion that can now be clarified Developing an international approach it reviews references to race racism and ethnicity in sociology anthropology philosophy and comparative politics and identifies promising lines of research that may make it possible to supersede misleading notions of race in the social sciences

The Racialisation of Disorder in Twentieth Century Britain Michael Rowe, 2017-07-05 This book develops the concept of racialisation It argues that a full understanding of racialized discourse must pay attention to both the particular local circumstances in which they appear and well established themes which have unfolded over time An important aspect of the study is the examination of other discourses with which racialized ideas have co joined reflecting the way in which notions of race are socially constructed The final part of the book returns to debates of

the 1980 s and argues that the racialisation of unrest in that decade was closely intertwined with conservative perspectives which sought to deny socio economic causes in favour of explanations based upon the supposed cultural or personal proclivities of those involved

Proof, Evidence and Hate Crime Tshepo Bogosi Mosaka, 2025-07-18 Proof is the property of a disputed fact being established inferentially from an extant fact This book explicates the structural components of this phenomenon in the context of hate crimes across various jurisdictions around the world It departs from the orthodox conception of evidence and proof as being a general value neutral or non normative and epistemic subject and offers a relativistic conception of this area of law The core argument is that proof is both semantically and methodologically determined by three conditions of materiality process and probativity This argument is then justified by the context specific application of this relativistic theory of proof to hate crimes This theoretical application of proof is sustained throughout the book using multiple examples and illustrations of hate crimes around the world The discussion both at the level of proof and hate crimes while focusing on the grounds of race religion and ethnicity specifically is framed in jurisprudential cross jurisdictional and interdisciplinary terms The book will be of interest to academics and researchers working in the areas of criminal law legal philosophy and procedural law

researched relationship Research priorities for a holistic world With the study of human ecology becoming increasingly imperative this comprehensive volume will be a valuable addition for classroom use *African-British Writings in the Eighteenth Century* Helena Woodard, 1999-01-30 The eighteenth century was a time of great cultural change in Britain It was a period marked by expeditions to the New World Africa and the Orient and these voyages were reflected in the travel literature of the era It was also a period in which seventeenth century empiricism and the scientific method became dominant and in which society became increasingly secular Fundamental to the eighteenth century worldview was the notion of the Great Chain of Being in which all creatures and their Creator stood in a hierarchical relationship with one another The years from 1660 to 1833 witnessed both Britain's participation in slavery and the appropriation of the Great Chain of Being by social anthropologists and political leaders With the rise of the slave trade blacks were brought to Britain against their will where they were enslaved At the same time intellectuals of the period tried to place these slaves within the hierarchical frame provided by the Great Chain of Being The presence of slavery in Britain aroused much debate among blacks and whites alike and the literature of the eighteenth century reflects that debate This book examines representations of blacks in eighteenth century British literature to illuminate the discussions about race during that period The volume begins with a discussion of Alexander Pope's popularization of the Great Chain of Being in his *Essay on Man* which argued the universal ranking of humanity and which provided an intellectual foundation for slavery It then examines the works of several white canonical writers including Defoe Addison and Steele Swift and Sterne to see how blacks are portrayed in their works The volume also examines works by African British writers such as James Albert Ukawsaw Gronniosaw and Quobna Ottobah Cugoana who expose exclusionary practices among some theologians Ignatius Sancho whose *Letters* show how slaves were taught to be grateful and how those lacking gratitude were considered inhuman and Olaudah Equiano who shows how racial hierarchies function as a literary trope particularly in travel literature The final chapter on *The History of Mary Prince* examines the interaction of race and gender *The Anatomy of Racial Inequality* Glenn C. Loury, 2021-08-01 Paints in chilling detail the distance between Martin Luther King's dream and the reality of present day America Anthony Walton Harper's Intellectually rigorous and deeply thoughtful Loury's book deals with racial stigma in its political and philosophical aspects as a cause of black disadvantage An incisive erudite book by a major thinker Gerald Early New York Times Book Review Lifts and transforms the discourse on race and racial justice to an entirely new level Orlando Patterson He is a genuine maverick thinker *The Anatomy of Racial Inequality* both epitomizes and explains Loury's understanding of the depressed conditions of so much of black society today New York Times Magazine Loury provides an original and highly persuasive account of how the American racial hierarchy is sustained and reproduced over time And he then demands that we begin the deep structural reforms that will be necessary to stop its continued reproduction Michael Walzer Why are Black Americans so persistently confined to the margins of society And why do they fail across so many metrics wages

unemployment income levels test scores incarceration rates health outcomes Known for his influential work on the economics of racial inequality and for pioneering the link between racism and social capital Glenn Loury is not afraid of piercing orthodoxies and coming to controversial conclusions In this now classic work he describes how a vicious cycle of tainted social information helped create the racial stereotypes that rationalize and sustain discrimination Brilliant in its account of how racial classifications are created and perpetuated and how they resonate through the social psychological spiritual and economic life of the nation this compelling and passionate book gives us a new way of seeing and of seeing beyond the damning categorization of race

Postcolonial Conrad Terry Collits, 2006-09-27 Winner of the 2006 NSW Prize for Literary Scholarship The work of Joseph Conrad has been read so disparately that it is tempting to talk of many different Conrads One lasting impression however is that his colonial novels which record encounters between Europe and Europe s Other are highly significant for the field of post colonial studies Drawing on many years of research and a rich body of criticism Postcolonial Conrad not only presents fresh readings of his novels of imperialism but also maps and analyzes the interpretative tradition they have generated Terry Collits first examines the reception of the author s work in terms of the history of ideas literary criticism traditions of Englishness Marxism and post colonialism before re reading Heart of Darkness Lord Jim Nostromo and Victory in greater depth Collits incisive and wide ranging volume provides a much needed reconsideration of more than a century of criticism discussing the many different perspectives born of constantly shifting contexts Most importantly though the book encourages and equips us for twenty first criticism where we must ask anew how we might read and understand these crucial and fascinating novels

Faith, Health, and Healing in African American Life Stephanie Y. Mitchem, Emilie M. Townes, 2008-08-30 Black Americans are more likely than Whites to die of cancer and heart disease more likely to get diabetes and asthma and less likely to get preventive care and screening Some of this greater morbidity results from education income level and environment as well as access to health care But the traditional medical model does not always allow for a more holistic approach that takes into account the body the mind the spirit the family and the community This book offers a better understanding of the varieties of religiously based approaches to healing and alternative models of healing and health found in Black communities in the United States Contributors address the communal aspects of faith and health and explore the contexts in which individuals make choices about their health the roles that institutions play in shaping these decisions and the practices individuals engage in seeking better health or coping with the health they have By paying attention to the role of faith spirit and health this book offers a fuller sense of the varieties of ways Black health and health care are perceived and addressed from an inter religious perspective Community and religion based initiatives have emerged as one key way to address the health challenges found in the African American community In cities such as Atlanta Baltimore Dallas and Oakland residents organize exercise groups teach one another how to cook with healthy ingredients and encourage neighbors to get regular checkups Churches have become key sites for health education

screening and testing Another set of responses to the challenge of Black health and healthcare in the United States comes from those who emphasize the body as a whole body mind soul and spirit often drawing on religious traditions such as Islam and African based religions such as Spiritism Santeria Vodun aka Voodoo Candomblé and others Understanding the issues and the various approaches is essential to combating the problems and this unique volume sheds light on areas often overlooked when considering the issues
