Nederman,Takashi Shogimen,2008-12-16 Given the rise of globalization and coinciding increase in cultural clashes among diverse nations it has become eminently clear to scholars of political thought that there exists a critical gap in the knowledge of non Western philosophies and how Western thought has been influenced by them This gap has led to a severely diminished capacity of both state and nonstate actors to communicate effectively on a global scale The political theorists area scholars and intellectual historians gathered here by Takashi Shogimen and Cary J Nederman examine the exchange of political ideas between Europe and Asia from the Middle Ages to the early twentieth century They establish the need for comparative political thought showing that in order to fully grasp the origins and achievements of the West historians of political thought must incorporate Asian political discourse and ideas into their understanding By engaging in comparative studies this volume proves the necessity of a cross disciplinary approach in guiding the study of the global history of political thought

Medieval Chinese Warfare 300-900 David Graff, 2003-09-02 Shortly after 300 AD barbarian invaders from Inner Asia toppled China's Western Jin dynasty leaving the country divided and at war for several centuries. Despite this, the empire gradually formed a unified imperial order. *Medieval Chinese Warfare 300-900* explores the military strategies, institutions, and wars that reconstructed the Chinese empire that has survived into modern times. Drawing on classical Chinese sources and the best modern scholarship from China and Japan, David A. Graff connects military affairs with political and social developments to show how China's history was shaped by war.

China's Challenges and International Order

Transition Huiyun Feng, Kai He, 2020-01-30 China's Challenges and International Order Transition introduces an integrated conceptual framework of international order categorized by three levels: power, rules, and norms, and three issue areas: security, political, and economic. Each contributor engages one or more of these analytical dimensions to examine two questions: 1. Has China already challenged this dimension of international order? 2. How will China challenge this dimension of international order in the future? The contested views and perspectives in this volume suggest it is too simple to assume an inevitable conflict between China and the outside world. With different strategies to challenge or reform the many dimensions of international order, China's role is not a one-way street. It is an interactive process in which the world may change China as much as China may change the world. The aim of the book is to broaden the debate beyond the Thucydides Trap perspective currently popular in the West. Rather than offering a single argument, this volume offers a platform for scholars, especially Chinese scholars vs. Western scholars, to exchange and debate their different views and perspectives on China and the potential transition of international order.

A Global History of

Modern Historiography Georg G. Iggers, Q. Edward Wang, Supriya Mukherjee, 2016-09-01 The first book on historiography to adopt a global and comparative perspective on the topic, *A Global History of Modern Historiography* looks not just at developments in the West but also at the other great historiographical traditions in Asia, the Middle East, and elsewhere around the world over the course of the past two and a half centuries. This second edition contains fully updated sections on Latin American and African historiography, discussion of the development of global history, environmental history, and feminist and gender history in recent years, and new coverage of Russian historical practices. Beginning in the mid-eighteenth century, the authors analyse historical currents in a changing political, social, and cultural context, examining both the adaptation and modification of the Western influence on historiography and how societies outside Europe and America found their own ways in the face of modernization and globalization. Supported by online resources including a selection of excerpts from key historiographical texts, this book offers an up-to-date account of the status of historical writing in the global era and is essential reading for all students of modern historiography.

The Shaping of the Book of Songs Chen Zhi, 2023-05-31

The present work is a study on the formation of the *Shih ching*. The author poses the hypothesis that this collection of poems, as the standard music and literature passed down to later generations, initially incorporated different cultural heritages.

through a process which moved from ritualization to secularization as well as standardization to localization In aiming to find the origins of the division of the Shih ching into sections and subsections and their titles as Nan Feng Ya and Sung the author employs an interdisciplinary methodology combining ethno musicological methods with paleography philology and archaeology He draws on new archaeological data of the past two decades that has shed new light on the Shih ching
