Potter, 2009-12-02 A Companion to the Roman Empire provides readers with a guide both to Roman imperial history and to the field of Roman studies taking account of the most recent discoveries This Companion brings together thirty original essays guiding readers through Roman imperial history and the field of Roman studies Shows that Roman imperial history is a compelling and vibrant subject Includes significant new contributions to various areas of Roman imperial history Covers the social intellectual economic and cultural history of the Roman Empire Contains an extensive bibliography **Romans, Barbarians, and the Transformation of the Roman World** Ralph W. Mathisen, Danuta Shanzer, 2011 One of the most significant transformations of the Roman world between the fourth and seventh centuries C E was the integration and impact of barbarian peoples into the social cultural religious and political Mediterranean world This was the theme of the 2005 Shifting Frontiers in Late Antiquity Conference at the University of Illinois at Urbana Champaign The selection of conferences papers published here remind us that the transformation of the Roman world took place in a Roman context and that Romanitas always was the touchstone against which social intellectual and political developments were measured *Rome: A Sourcebook on the Ancient City* Fanny Dolansky, Stacie Raucci, 2018-02-22 The ancient city of Rome was the site of daily activities as well as famous historical events It was not merely a backdrop but rather an active part of the experiences of its inhabitants shaping their actions and infusing them with meaning During each period in Rome s imperial history her emperors also used the city as a canvas to be painted on transforming it according to their own ideals or ambitions Rather than being organized by sites or monuments Rome A Sourcebook on the Ancient City is divided into thematic chapters At the intersection of topography and socio cultural history this volume examines the cultural and social significance of the sites of ancient Rome from the end of the Republic in

the age of Cicero and Julius Caesar to the end of the fourth century Drawing on literary and historical sources this is not simply a tour of the baths and taverns the amphitheatres and temples of ancient Rome but rather a journey through the city that is fully integrated with Roman society Play Among Books Miro Roman,Alice\_ch3n81,2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice\_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science

**Rome the Cosmopolis** Catharine Edwards,Greg Woolf,2006-11-02 Rome stands today for an empire and for a city The essays gathered in this volume explore some of the many ways in which the two were interwoven Rome was fed beautified and enriched by empire just as it was swollen polluted infected and occupied by it Empire was paraded in the streets of Rome and exhibited in the city s buildings Empire also made the city ineradicably foreign polyglot an alien capital and a focus for un Roman activities The city was where the Roman cosmos was most concentrated and so was most contested Deploying a range of methodologies on materials ranging from Egyptian obelisks to human skeletal remains via Christian art and Latin poetry the contributors to this volume weave a series of pathways through the world city exploring the different kinds of centrality Rome had in the empire The result is a startlingly original picture of both empire and city *A Companion to Roman Italy* Alison E. Cooley,2016-03-21 A Companion to Roman Italy investigates the impact of Rome in all its forms political cultural social and economic upon Italy s various regions as well as the extent to which unification occurred as Rome became the capital of Italy The collection presents new archaeological data relating to the sites of Roman Italy Contributions discuss new theories of how to understand cultural change in the Italian peninsula Combines detailed case studies of particular sites with wider ranging thematic chapters Leading contributors not only make accessible the most recent work on Roman Italy but also offer fresh insight on long standing debates *The Oxford Handbook of Social Relations in the Roman World* Michael Peachin,2011 The study of Roman society and social relations blossomed in the 1970s By now we possess a very large literature on the individuals and groups that constituted the Roman community and the various ways in which members of that community interacted There simply is however no overview that takes into account the multifarious progress that has been made in the past thirty odd years The purpose of this handbook is twofold On the one hand it synthesizes what has heretofore been accomplished in this field On the other hand it attempts to configure the examination of Roman social relations in some new ways and thereby indicates directions in which the discipline might now proceed The book opens with a substantial general introduction that portrays the current state of the field indicates some avenues for further study and provides the background necessary for the following chapters It lays out what is now known about the

historical development of Roman society and the essential structures of that community In a second introductory article Clifford Ando explains the chronological parameters of the handbook The main body of the book is divided into the following six sections 1 Mechanisms of Socialization primary education rhetorical education family law 2 Mechanisms of Communication and Interaction 3 Communal Contexts for Social Interaction 4 Modes of Interpersonal Relations friendship patronage hospitality dining funerals benefactions honor 5 Societies Within the Roman Community collegia cults Judaism Christianity the army and 6 Marginalized Persons slaves women children prostitutes actors and gladiators bandits The result is a unique up to date and comprehensive survey of ancient Roman society **Christ's Associations** John S.

Kloppenborg,2019-11-26 A groundbreaking investigation of early Christ groups in the ancient Mediterranean As an urban movement the early groups of Christ followers came into contact with the many small groups in Greek and Roman antiquity Organized around the workplace a deity a diasporic identity or a neighborhood these associations gathered in small face to face meetings and provided the principal context for cultic and social interactions for their members Unlike most other groups however about which we have data on their rules of membership financial management and organizational hierarchy we have very little information about early Christ groups Drawing on data about associative practices throughout the ancient world this innovative study offers new insight into the structure and mission of the early Christ groups John S Kloppenborg situates the Christ associations within the broader historical context of the ancient Mediterranean and reveals that they were probably smaller than previously believed and did not have a uniform system of governance and that the attraction of Christ groups was based more on practice than theological belief **Politics in the Monuments of Pompey the Great and Julius Caesar** Eleonora Zampieri,2022-10-21 This book explores the diachronic development of the ideological content of Pompey and Caesar s monuments in Rome emphasising the importance of the late Republican period as a precursor to imperial propaganda through architecture In the final years of the Roman Republic individuals such as Pompey the Great and Julius Caesar exploited the communicative power of architecture The former promoted the first and largest stone theatre in Rome the latter started comprehensive town planning projects that arguably verged on the utopian Yet the study of the politics expressed by these monuments and how complex late Republican politics shaped the monuments themselves has attracted less attention than that of subsequent imperial architecture Zampieri addresses this imbalance exploring the ideological meaning of late Republican monuments and highlighting that monuments were fluid adaptable entities even in the lifespan of a single individual Accompanied by detailed maps and images this volume shows how late Republican architecture should be considered an important source for understanding politics of this period Politics in the Monuments of Pompey the Great and Julius Caesar will be of use to anyone working on the politics and social world of the late Roman Republic and on Roman architecture and patronage *Roman Europe* Edward Bispham,2008-10-30 An international team of expert contributors provides both an introduction to and an interpretation of the key themes and developments in the history

of Europe from the earliest days of Rome through to AD 400      **Campus Martius** Paul W. Jacobs (II), Diane Atnally Conlin, 2014 This book explores the factors that contributed to the transformation of the Campus Martius into a space filled with extraordinary Roman architectural structures      **Landscapes and Cities** John R. Patterson, 2006-10-19 The first two centuries AD are conventionally thought of as the golden age of the Roman Empire yet Italy in this period has often been seen as being in a state of decline and even crisis This book investigates the relationships between city and countryside in Italy in the early Empire using evidence from literary texts and inscriptions and the wealth of data derived from archaeological field surveys over recent years Looking at individual towns and regions as well as at the broader picture and stressing the diversity of situations across Italy John R Patterson examines how changing patterns of building and benefaction in the cities were related to developments in the country and underlines the resourcefulness of the cities both large and small in seeking to maintain and develop their civic traditions      **The Ancient Mediterranean Trade in Ceramic Building Materials: A Case Study in Carthage and Beirut** Philip Mills, 2013-02-15 This study addresses the level of interregional trade of ceramic building material CBM traditionally seen as a high bulk low value commodity within the ancient Mediterranean between the third century BC and the seventh century AD      Materialising Roman Histories Astrid Van Oyen, Martin Pitts, 2017-09-30 The Roman period witnessed massive changes in the human material environment from monumentalised cityscapes to standardised low value artefacts like pottery This book explores new perspectives to understand this Roman object boom and its impact on Roman history In particular the book's international contributors question the traditional dominance of representation in Roman archaeology whereby objects have come to stand for social phenomena such as status facets of group identity or notions like Romanisation and economic growth Drawing upon the recent material turn in anthropology and related disciplines the essays in this volume examine what it means to materialise Roman history focusing on the question of what objects do in history rather than what they represent In challenging the dominance of representation and exploring themes such as the impact of standardisation and the role of material agency Materialising Roman History is essential reading for anyone studying material culture from the Roman world and beyond

Nathan Rosenstein and David Potter      Cities That Shaped the Ancient World John Julius Norwich, 2014-11-11 An illuminating and evocatively illustrated tour of forty of the greatest cities that shaped the ancient world and its civilizations from China and Mesoamerica to Europe and Ethiopia Today we take living in cities with all their attractions and annoyances for granted But when did humans first come together to live in large groups creating an urban landscape What were these places like to inhabit More than simply a history of ancient cities this volume also reveals the art and architecture created by our ancestors and provides a fascinating exploration of the origins of urbanism politics culture and human interaction Arranged geographically into five sections Cities That Shaped the Ancient World takes a global view beginning in the Near East with the earliest cities such as Ur and Babylon Troy and Jerusalem In Africa the great cities of Ancient Egypt arose such as Thebes and Amarna Glorious European metropolises including Athens and Rome ringed the Mediterranean but also stretched to Trier on the turbulent frontier of the Roman Empire Asia had bustling commercial centers such as Mohenjodaro and Xianyang while in the Americas the Mesoamerican and Peruvian cultures stamped their presence on the landscape creating massive structures and extensive urban settlements in the deep jungles and high mountain ranges including Caral and Teotihuacan A team of expert historians and archaeologists with firsthand knowledge and deep appreciation of each site gives voices to these silent ruins bringing them to life as the bustling state of the art metropolises they once were      **The Oxford Handbook of Roman Epigraphy** Christer Bruun, J. C. Edmondson, 2015 The study of inscriptions is critical for anyone seeking to understand the Roman world whether they regard themselves as literary scholars historians archaeologists anthropologists or religious scholars The Oxford Handbook of Roman Epigraphy is the fullest collection of scholarship on the study and history of Latin epigraphy produced to date      *Reading Romans with Roman Eyes* James R. Harrison, 2020-06-22 Paul's letter to the Romans has a long history in Christian dogmatic battles But how might the letter have been heard by an audience in Neronian Rome James R Harrison answers that question through a reader response approach grounded in deep investigations of the material and ideological culture of the city from Augustus to Nero Inscriptional archaeological monumental and numismatic evidence in addition to a breadth of literary material allows him to describe the ideological value system of the Julio Claudian world which would have shaped the perceptions and expectations of Paul's readers Throughout Harrison sets prominent Pauline themes his obligation to Greeks and barbarians newness of life and of creation against the power of death the body of Christ boasting in glory and God's purpose in and for Israel in startling juxtaposition with Roman ideological themes The result is a richer and more complex understanding of the letter's argument and its possible significance for contemporary readers
