Table 53

Minimum Cover Requirements for Direct Buried Conductors, Cables, or Raceways

Notes for Subrule (1) (see Figure 12-012 on page 3). The aim is that buried electrical wiring be adequately protected from potential damage by being buried to a minimum depth in the ground. "Direct burial" means conductors or cables that are directly buried underground (ie, the outer surface of the conductor or cable is in direct contact with the earth). "Cover" refers to the minimum distance between the top surface of the cable or raceway and finished grade.

- **Subrule (2)** The minimum cover requirements shall be permitted to be reduced by 150 mm where mechanical protection is placed in the trench over the underground installation.
