Library Data Darby Orcutt, 2009-11-19 Numerical evidence is everywhere and how best to handle and leverage it is a growing concern in the academic world in general and the academic library world in particular Libraries are not only storehouses and key contacts for library patrons in accessing numbers but are also collectors and users of their own data which is integral to the functioning of the library itself The essays in Library Data Empowering Practice and Persuasion focus on interpreting and using library generated and outside data in support of data driven practice and data strengthened persuasion The collection includes such topics as how to make data presentations appealing and effective applying capital budgeting models to libraries and using data for evaluation and improvement of collections and services Articles also cover specialized scenarios including reference collection development serial acquisitions institutional repositories web site design interlibrary loan and bibliographic instruction

The Deductive Spreadsheet Iliano Cervesato, 2013-09-06 This book describes recent multidisciplinary research at the confluence of the fields of logic programming database theory and human computer interaction The goal of this effort was to develop the basis of a deductive spreadsheet a user productivity application that allows users without formal training in computer science to make decisions about generic data in the same simple way they currently use spreadsheets to make decisions about numerical data The result is an elegant design supported by the most recent developments in the above disciplines The first half of the book focuses on the deductive engine that underlies this application the foundations that users do not see After giving a mathematical model of traditional spreadsheet applications we extend them with operators to perform a number of relational tasks similar to the user view of a database but in a spreadsheet context Expressing this extension in a logic programming framework is a natural step towards giving it powerful deductive capabilities The second half of the book deals with the user interface the part of the application with which the user actually interacts We review the elements of the graphical user interface of traditional spreadsheet applications and describe practical methodologies for designing user interfaces borrowed from the field of cognitive psychology We then propose a design that conservatively integrates mechanisms for a user to take advantage of the new

deductive capabilities This is followed by the results of some preliminary usability experiments The book will appeal to researchers and practitioners in the various areas underlying this work Researchers will not only find interesting new developments in their domains but will also learn how to achieve a multidisciplinary focus Practitioners will find fully developed solutions to numerous problems that are not easily solvable using traditional spreadsheet applications **ICEL 2017 - Proceedings of the 12th International Conference on e-Learning** Laurie O. Campbell, Richard Hartshorn, 2017

Statistics for Managers Using Microsoft Excel David M. Levine, 2002 For one or two term courses in Business Statistics at the undergraduate or graduate level This hallmark text was the first to thoroughly integrate the use of Microsoft Excel and still provides more Excel coverage than any other textbook The streamlined coverage 15 chapters focuses on the concepts of statistics with applications to the functional areas of business It is rich with applications from accounting finance marketing management and economics There is significant emphasis on using statistical software as a tool with most examples presented in a spreadsheet environment This is the 1 best selling business statistics text **American Environmentalism**

J. Michael Martinez, 2013-06-20 Protecting the natural environment and promoting sustainability have become important objectives but achieving such goals presents myriad challenges for even the most committed environmentalist **American Environmentalism** Philosophy History and Public Policy examines whether competing interests can be reconciled while developing consistent coherent effective public policy to regulate uses and protection of the natural environment without destroying the national economy It then reviews a range of possible solutions The book delves into key normative concepts that undergird American perspectives on nature by providing an overview of philosophical concepts found in the western intellectual tradition the presuppositions inherent in neoclassical economics and anthropocentric human centered and biocentric earth centered positions on sustainability It traces the evolution of attitudes about nature from the time of the Ancient Greeks through Europeans in the Middle Ages and the Renaissance the Enlightenment and the American Founders the nineteenth and twentieth centuries and up to the present Building on this foundation the author examines the political landscape as non governmental organizations NGOs industry leaders and government officials struggle to balance industrial development with environmental concerns Outrageous claims silly misrepresentations bogus arguments absurd contentions and overblown prophecies of impending calamities are bandied about by many parties on all sides of the debate industry spokespeople elected representatives unelected regulators concerned citizens and environmental NGOs alike In lieu of descending into this morass the author circumvents the silliness to explore the crucial issues through a more focused disciplined approach Rather than engage in acrimonious debate over minutiae as so often occurs in the context of green claims he recasts the issue in a way that provides a cohesive look at all sides This effort may be quixotic but how else to cut the Gordian knot *Applied Technologies* Miguel Botto-Tobar, Marcelo Zambrano Vizuete, Sergio Montes León, Pablo Torres-Carrión, Benjamin Durakovic, 2023-01-27 This three volume set CCIS 1755 1757 constitutes the refereed proceedings

Special Sessions have been a very useful tool in order to complement the regular program with new or emerging topics of particular interest to the participating community. Special Sessions that emphasize on multi disciplinary and transversal aspects such as AI driven methods for Multimodal Networks and Processes Modeling and Multi Agents Macroeconomics have been especially encouraged and welcome. This symposium is organized by the Bioinformatics Intelligent System and Educational Technology Research Group <http://bisite.usal.es> of the University of Salamanca. The present edition was held in Salamanca Spain from 4th to 6th June 2014.

Conflict and agricultural productivity: Evidence from Myanmar
Myanmar Agriculture Policy Support Activity, 2023-02-21. Evidence is scarce on how conflict affects technology adoption and consequent agricultural productivity in fragile states, an important topic given the high share of the extreme poor living in fragile environments globally. Our study contributes to filling this knowledge gap by using unique large scale data on rice producers in Myanmar before and after a military coup in 2021 leading to a surge of conflicts in the country. We find that the increase in violent events significantly changed rice productivity. Specifically, increases in fatal violent events between 2020 and 2021 reduced rice Total Factor Productivity (TFP), a measure of how efficiently agricultural inputs are used to produce rice, by about 4 percent on average in the short run. Moreover, poorer farmers are more affected by conflict as seen through an increased output elasticity to agricultural equipment owned, indicating reduced output resilience for less capital owning and therefore poorer farmers. This seems partly due to reduced access to agricultural extension services, which would otherwise help farmers maintain productivity even with limited capital ownership through substitution with human capital and skills. Lower mechanization service fees partly mitigate these effects. Our results consistently hold for both short and long run production functions across various specifications and in Upper and Lower Myanmar. These findings suggest that containing and reducing violent events is critical in restoring rice productivity. Improved access to extension services as well as to cheap mechanization service provision to mitigate lack of equipment ownership could compensate for these losses and boost the productivity of farmers, especially for those with less production capital in such fragile settings.

[Additive Manufacturing in Industry 4.0](#) Vipin Kumar Sharma, Ashwani Kumar, Manoj Gupta, Vinod Kumar, Dinesh Kumar Sharma, Subodh Kumar Sharma, 2022-12-26. The text covers four important areas: digital manufacturing, modern manufacturing processes, modeling and simulation in smart industry, and nanotechnology. It further presents mathematical models to represent physical phenomena and applies modern computing methods and simulations in analyzing the same. The text covers key concepts such as abrasive flow machining (AFM), abrasive water jet (AWJ) machining, and hybrid machining for micro/nanomanufacturing. It will serve as an ideal reference text for senior undergraduate, graduate students, and researchers.

in fields including mechanical engineering aerospace engineering manufacturing engineering and production engineering
Features Discusses sustainable development aspects of additive manufacturing in industry 4.0 Studies electrochemical
machining processes for micro machining Presents experimental Investigation of friction factor and heat transfer rate in the
