2013 Caps Economics Paper 2:

The Political Economy of Food System Transformation Danielle Resnick, Johan Swinnen, 2023-09-21 This is an open access title available under the terms of a CC BY NC 4.0 International licence. It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations. The current structure of the global food system is increasingly recognized as unsustainable. In addition to the environmental impacts of agricultural production, unequal patterns of food access and availability are contributing to non-communicable diseases in middle and high income countries and inadequate caloric intake and dietary diversity among the world's poorest. To this end, there have been a growing number of academic and policy initiatives aimed at advancing food system transformation, including the 2021 UN Food Systems Summit, the Sustainable Development Goals (SDGs) and several UN Climate conferences. Yet the policy pathways for achieving a transformed food system are highly contested and the enabling conditions for implementation are frequently absent. Furthermore, a broad range of polarizing factors affect decisions over the food system at domestic and international levels, from debates over values and misinformation to concerns over food self-sufficiency, corporate influence and human rights. This volume explicitly analyses the political economy dynamics of food system transformation with contributors who span several disciplines, including economics, ecology, geography, nutrition, political science and public policy. The chapters collectively address the range of interests, institutions and power in the food system, the diversity of coalitions that form around food policy issues and the tactics they employ, the ways in which policies can be designed and sequenced to overcome opposition to reform and processes of policy adaptation and learning. Drawing on original surveys, interviews, empirical modelling and case studies from China, the European Union, Germany, Mexico, South Asia, sub-Saharan Africa and the United States, the book touches on issues as wide-ranging as repurposing agricultural subsidies, agricultural trade, biotechnology innovations, red meat consumption, sugar-sweetened beverage taxes and much more. **Agricultural Cooperative**

Management and Policy Constantin Zopounidis, Nikos Kalogeras, Konstadinos Mattas, Gert van Dijk, George Baourakis, 2014-06-05 This book focuses on the use of farm-level micro and macro data of cooperative systems and networks in developing new robust, reliable and coherent modeling tools for agricultural and environmental policy analysis. The efficacy of public intervention on agriculture is largely determined by the existence of reliable information on the effects of policy options and market developments on farmers' production decisions and, in particular, on key issues such as levels of agricultural and non-agricultural output, land use and incomes, use of natural resources, sustainable, centric management, structural change and the viability of family farms. Over the last years, several methods and analytical tools have been developed for policy analysis using various sets of data. Such methods have been based on integrated approaches in an effort to investigate the above key issues and have thus attempted to offer a powerful environment for decision-making, particularly in an era of radical change for both agriculture and the wider economy. **The Political Economy of the 2014-2020**

Common Agricultural Policy Johan F.M. Swinnen, 2015-07-30 After five years of debates consultations and negotiations the European institutions reached an agreement in 2013 on the Common Agricultural Policy CAP for the 2014-2020 period. The outcome has major implications for the EU's budget and farmers' incomes but also for Europe's environment, its contribution to global climate change and to food security in the EU and in the world. It was decided to spend more than 400 billion during the rest of the decade on the CAP. The official claims are that the new CAP will take better account of society's expectations and lead to far-reaching changes by making subsidies fairer and greener and making the CAP more efficient. It is also asserted that the CAP will play a key part in achieving the overall objective of promoting smart, sustainable and inclusive growth. However, there is significant scepticism about these claims and disappointment with the outcome of the decision making the first in which the European Parliament was involved under the co-decision procedure. In contrast to earlier reforms where more substantive changes were made to the CAP, the factors that induced the policy discussions in 2008-13 and those that influenced the decision making did not reinforce each other. On the contrary, they sometimes counteracted one another, yielding an imperfect storm as it were, resulting in more status quo and fewer changes. This book discusses the outcome of the decision making and the factors that influenced the policy choices and decisions. It brings together contributions from leading academics from various disciplines and policy makers and key participants in the process from the European Commission and the European Parliament.

Agricultural Markets Instability Alberto Garrido, Bernhard Brümmer, Robert M'Barek, Miranda Meuwissen, Cristian Morales-Opazo, 2016-01-08 Since the financial and food price crises of 2007, market instability has been a topic of major concern to agricultural economists and policy professionals. This volume provides an overview of the key issues surrounding food prices volatility, focusing primarily on drivers, long-term implications of volatility and its impacts on food chains and consumers. The book explores which factors and drivers are volatility increasing and which others are price level increasing and whether these two distinctive effects can be identified and measured. It considers the extent to which increasing instability affects agents in the value chain as well as the actual impacts on the most vulnerable households in the EU and in selected developing countries. It also analyses which policies are more

effective to avert and mitigate the effects of instability Developed from the work of the European based ULYSSES project the book synthesises the most recent literature on the topic and presents the views of practitioners businesses NGOs and farmers organizations It draws policy responses and recommendations for policy makers at both European and on international levels

Law, Ecology, and the Management of Complex Systems Tiina Paloniitty, 2022-08-19 This book addresses the role of law in the adaptive management of socio ecological systems Recent years have witnessed a rise in discussion over the relation between adaptivity and law as if after decades of insouciance legal scholars have finally started to understand the impacts of the scientific paradigm called adaptive management on the legal sphere Even though the complicated relations between law and the adaptive management of socio ecological systems have become more debated a thorough examination of the scientific and theoretical fundamentals of such endeavours has yet to be presented Using the illustrative example of European Union water governance and its path toward embracing adaptive management this book emphasises the legal significance of properly understanding the manner in which scientific knowledge of the environment is produced Though always pivotal rigorously apprehending science is especially crucial when dealing with the management of complex ecosystems as the normative is created gradually before law begins to examine the facts of the matter After examining the roots of adaptive management this book argues that the legal needs to understand itself as an integral part of the process of the socio ecological management of complex systems and not merely an external umpire resolving disputes As a whole the book offers new insights into the EU regulator s approaches to scientific realities making it an interesting read not only to academics and legal scholars but also to regulators striving to deepen their understanding or pondering which approach to adopt in the face of new regulatory challenges and to scientists interested in the science and law aspects of their work

Sustainable Agriculture Policies for Human Well-Being Bazyli Czyżewski, Łukasz Kryszak, 2022-09-27 This book deals with the important topic of policies for sustainable agriculture since food insecurity is a growing concern for policy makers and will affect the quality of life and well being of generations to come The authors provide a theoretical background to the concept of sustainable agriculture including its recent developments monitor the current state of sustainability in agriculture in different regions of the world and evaluate current agricultural policies to propose new solutions They show practical ways of sustainability measurement that could be applied to different regions The book takes into account sustainability indicators based on economic social and environmental aspects and discusses the trade offs between these three dimensions It also answers the question of whether current agricultural policies contribute to balancing between the goals of agriculture that of not just providing food but of contributing to the greater good and how policies differ and have evolved across the world Finally it puts together the best practices of sustainability for the use of policymakers The book pays particular attention to least developed countries where hunger and malnutrition are high but where productivity should not come at the expense of environmental and social goals This book is of use to a wide readership of policy makers

professionals and academics in the social and environmental sciences interested in the improvement of human life through sustainable agricultural policy implementation *Public Policy in Agriculture* Ashok K. Mishra, Davide Viaggi, Sergio Gomez y Paloma, 2017-08-07 In recent years developed countries have formulated public policies in agriculture ranging from supporting rural life and farm income to promoting sustainability of food and fibre production *Public Policy in Agriculture Impact on Labor Supply and Household Income* addresses the lack of empirical research in this area It explores the impact of differing approaches to public policy through a series of international case studies from the USA and Canada to South Korea Norway Slovenia and Taiwan At a time when much of the developed world has been experiencing budget deficits and policy makers and the public in general have re opened the debate on public expenditures in the agricultural sector this is a timely volume Mishra Viaggi and Gomez y Paloma have written an authoritative guide to agricultural public policy that will serve as a reference for academics researchers students and policy makers **EU Environmental Governance** Amandine

Orsini, Elena Kavvatha, 2020-09-13 This book presents an overview of the field of environmental law and policies within the European Union from theoretical foundations to major issues and applied governance solutions Drawing on expertise from renowned academics and practitioners from different disciplines *EU Environmental Governance Current and Future Challenges* helps readers to understand the main legal political and economic issues of environmental protection since the adoption of the Paris Agreement by the European Union in 2015 until the 2020 Brexit European Green Deal and coronavirus outbreak The authors examine a broad range of sensitive and topical environmental issues including climate change air pollution waste management and circular economy nuclear waste biodiversity agriculture chemicals nanotechnology the environmental impacts of trade and environmental conflicts presenting both current insights and future challenges Overall this volume exposes the reader to a vast array of empirical case studies which will bolster their training and help tackle the environmental challenges faced by Europe today This book is a valuable resource for students researchers and policymakers across a broad range of fields including environmental law and policies environmental economics climate science and environmental sociology *Macroeconomics After the Financial Crisis* Mogens Ove Madsen, Finn Olesen, 2016-04-14 How

should Europe cope with the negative and still unfolding economic consequences of the current economic crisis And why does Europe seem to be more conservative than the USA in dealing with the crisis Since the outbreak of the current international economic crisis in 2008 the USA and many of the European countries have been tormented by high levels of unemployment and low levels of inflation interest rates close to zero and fiscal policies of austerity As such the modern economic mainstream has been challenged by these empirical facts Today several years after the outbreak of the international economic crisis supply side effects do not seem to be increasing employment as the modern mainstream claimed they would Aggregate demand has to play a more important role in macroeconomic analysis than hitherto That is there is a need for alternative explanations of how a modern macro economy is expected to function and how the

macroeconomic outcome could be manipulated by the right economic policy proposals As expressed by the contents of the present book a Post Keynesian understanding proposes such an alternative theoretically methodologically and in terms of policy measures This book will present new materials and approaches especially new evidence and new views on the potential problems of public debt the European Union and the present crisis Central Banking hysteresis in an agent based framework the foundations of macroeconomics and the problems of uncertainty Environmental Politics for a Changing World Ronnie D. Lipschutz,Doreen Stabinsky,2018-07-12 This book argues that environmental problems are first and foremost political and therefore about power Using a framework of political economy and political ecology the authors deconstruct current environmental problems to identify root causes and address those problems through mobilization of collective action and social power The second edition also offers Updated examples and stories of political struggles and the actors involved Explicit attention to various forms of power in environmental politics including structural and social power Local politics and collective action as related to global environmental politics Discussion of emerging issues such as synthetic biology commodification and financialization of nature including carbon markets and geoengineering **The Elusive African Renaissance** George Klay Kieh, Jr.,2018-09-12 Africa faces several major development challenges that have adversely affected the political and material well being of the majority of the people living there This collection of new essays rigorously analyzes those frontier development issues including democracy leadership the economy poverty alleviation through microfinance schemes food security education health and political instability and offers prescriptions that differ from the dominant neoliberal solutions **Disaggregated Impacts of CAP Reforms Proceedings of an OECD Workshop** OECD,2011-02-08 This report collects papers presented at the OECD Workshop on Disaggregated Impacts of CAP Reforms held in Paris in 2010 which focused on recent reforms In particular it examined the implementation of the single payment scheme since 2005 and the transfer of funds between different measures **New Business and Regulatory Strategies in the Postal Sector** Pier Luigi Parcu,Timothy J. Brennan,Victor Glass,2019-02-13 This book addresses major issues facing postal and delivery services throughout the world Worldwide there is currently a considerable amount of interest in postal and delivery economics The industry is reacting to a state of near crisis and is implementing different drastic changes The European Commission and member States are still wrestling with the problem of how to implement entry liberalization into postal markets how to address digital competition and how to maintain the universal service obligation USO The Postal Accountability and Enhancement Act of 2006 in the U S has perhaps created and exacerbated the problems faced by USPS Digitalisation technological development and online platforms are strongly affecting both the way postal and delivery operators are managing their services as well as their role on the market Strong emphasis was attributed to the assets of Postal Operators POs and their added value in the digital age as well as on new business strategies This volume presents original essays by prominent researchers in the field selected and edited from papers presented at this year s 26th

Conference on Postal and Delivery Economics held in Split Croatia from May 30 June 2 2018 Topics addressed by this volume include quality of service last mile solutions and competition in the liberalized market This book will be a useful tool not only for graduate students and professors but also for postal administrations consulting firms and federal government departments

Handbook on Trade Policy and Climate Change Jakob, Michael, 2022-03-10 This insightful Handbook provides a comprehensive overview of the most recent developments in the academic debate on the numerous and complex linkages between international trade and climate change

Debt Sustainability of Subnational Governments in India Hari Krishna Dwivedi, 2024-06-11 In 2020 for the first time in history the worlds debt as a percentage of its gross domestic product exceeded 100 per cent Although it has come down slightly since then there are concerns about where the next debt crisis will happen given that Pakistan and Sri Lanka have found their debt to be what may be described as unsustainable

Indias overall fiscal health and macroeconomic conditions remain stable but questions on the fiscal health of Indias subnational entities have been raised from time to time In *Debt Sustainability of Subnational Governments in India* Lessons from International Debt Crises Dwivedi attempts to answer this question by analysing the debt sustainability of states in the context of many emerging issues and challenges to their fiscal health The book aims to provide usable and practical recommendations to ensure sound fiscal health of the subnational governments in India Some of the key aspects covered in the book include international experiences of excessive borrowing and the learnings from these experiences trends of state government debt subnational debt control mechanism on subnational borrowings emerging issues that pose challenges to state finances and recommendations to control debt from spiralling out of control

Emissions Trading as a Policy Instrument Marc Gronwald, Beat Hintermann, 2015-07-10 Emissions trading schemes figure prominently among policy instruments used to tackle the problem of climate change and the European Union Emissions Trading Scheme EU ETS begun in 2005 is the largest cap and trade market so far established In the EU ETS firms regulated by the scheme are provided with emissions allowances each a one time right to emit one ton of greenhouse gases and can sell their unused allowances to firms that have higher rates of emissions In this volume leading economists offer empirical and theoretical perspectives on the early phases of the EU ETS implementation The contributors discuss the features of the EU ETS market and regulatory uncertainty stemming from rule changes the political economy context of the trading scheme including allowance allocation and the influence of lobbying on abatement decisions the coexistence of such overlapping instruments for climate policy as pricing and taxation the relationship between spot and futures markets for allowances and firms responses to various features of the EU ETS including fluctuating allowance prices free allocation and links to the Kyoto process They show that although the basic theory behind emissions permit markets is straightforward design features market structure and interactions with other policy instruments can influence the efficiency of the scheme

Modern Economic Regulation Christopher Decker, 2015 This book synthesises the vast literature on economic regulation into a coherent overview of

regulatory theory and practice **The United States of Excess** Robert Paarlberg, 2015-03-02 Is it possible that America is hard wired to consume too much food and fuel Unfortunately yes says Robert Paarlberg in The United States of Excess America s excess is driven in each case by its distinct endowment of material and demographic resources its unusually weak national political institutions and a unique political culture that celebrates both individual freedoms over social responsibility and free markets over governmental authority America s over consumption is shown to be over determined
