Infinite Suburbia MIT Norman B. Leventhal Center for Advanced Urbanism, 2018-03-13 Infinite Suburbia is the culmination of the MIT Norman B Leventhal Center for Advanced Urbanism's yearlong study of the future of suburban development. Extensive research, an exhibition, and a conference at MIT's Media Lab, this groundbreaking collection presents fifty-two essays by seventy-four authors from twenty different fields including but not limited to design, architecture, landscape planning, history, demographics, social justice, familial trends, policy, energy, mobility, health, environment, economics, and applied and future technologies. This exhaustive compilation is richly illustrated with a wealth of photography, aerial drone shots, drawings, plans, diagrams, charts, maps, and archival materials, making it the definitive statement on suburbia at the beginning of the twenty-first century.

Handbook of Manufacturing Industries in the World Economy John R. Bryson, Jennifer Clark, Vida Vanchan, 2015-04-30 This interdisciplinary volume provides a critical and multi-disciplinary review of current manufacturing processes, practices, and policies and broadens our understanding of production and innovation in the world economy. Chapters highlight how firms

The Trans Pacific Partnership, China and India Amitendu Palit, 2014-06-05 The United States and 11 other countries from both sides of the Pacific are currently negotiating the Trans Pacific Partnership (TPP). The agreement is expected to set a new benchmark for international trade through its comprehensive coverage of issues and binding regulations. It is expected to eventually mature into a regional trade agreement covering the entire Asia Pacific. As of now, it does not include China and India, the two largest emerging markets and regional economies. The TPP has generated controversy for its excessive emphasis on trade issues which have remained unresolved or unaddressed at the WTO due to differences between developed and emerging markets. It has also been criticized for adopting a negotiating style reflecting the US regulatory approach to international trade and also as a geo-political strategy of the US for supporting its strategic rebalancing towards Asia. From both economic and geo-political perspectives, the TPP has various significant implications for China and India that are examined in the book. This book sheds light on how China and India's entries in the TPP are mutually beneficial and how both countries can gain from the TPP by gaining preferential access to large markets and using it as an opportunity for introducing more outward-oriented reforms. The book also cautions that the US must reconcile to the rebalancing of economic power within the grouping that will occur following the entries of China and India. Otherwise, the TPP and China and India might walk divergent paths and trade and regional integration in Asia Pacific may not ever converge. This book will interest anyone who wishes to learn more about the TPP and its future implications and challenges, and China and India's roles in global and regional trade.

Accessibility, Equity and Efficiency Karst T. Geurs, Roberto Patuelli, Tomaz Ponce Dentinho, 2016-02-26 Leading researchers from around the world show in this volume the importance of accessibility in contemporary issues such as rural depopulation, investments in public services, and public transport and transport infrastructure investments in Europe. The trade-offs between accessibility, economic development, and

equity are comprehensively examined and a variety of approaches to measuring accessibility and equality presented The book's interdisciplinary contributions also provide different geographical contexts from the US to various European and developing countries and cover ex ante and ex post evaluation of transport investment Improving transport accessibility is a main objective in transport policy and planning in developed and developing countries all over the world Investment is motivated by the need to develop and/or reduce spatial or social inequalities However the economic and equity implications of investments in transport are not straightforward The concepts of accessibility and equity can be defined and operationalized in many different ways influencing outcomes and conclusions Moreover equity and efficiency goals are often conflicting Accessibility models not only help to explain spatial and transport patterns in developed and developing countries but are also powerful tools to explain the equity and efficiency impacts of urban and transport policies and projects This state of the art overview of the accessibility economic efficiency equity relationship will appeal to researchers as well as transport and urban planners interested in accessibility issues and transport regional developments

Incomplete Streets Stephen Zavestoski, Julian Agyeman, 2014-08-27 The Complete Streets concept and movement in urban planning and policy has been hailed by many as a revolution that aims to challenge the auto normative paradigm by reversing the broader effects of an urban form shaped by the logic of keeping automobiles moving By enabling safe access for all users Complete Streets promise to make cities more walkable and livable and at the same time more sustainable This book problematizes the Complete Streets concept by suggesting that streets should not be thought of as merely physical spaces but as symbolic and social spaces When important social and symbolic narratives are missing from the discourse and practice of Complete Streets what actually results are incomplete streets The volume questions whether the ways in which complete streets narratives policies plans and efforts are envisioned and implemented might be systematically reproducing many of the urban spatial and social inequalities and injustices that have characterized cities for the last century or more From critiques of a mobility bias rooted in the neoliberal foundations of the Complete Streets concept to concerns about resulting environmental gentrification the chapters in *Incomplete Streets* variously call for planning processes that give voice to the historically marginalized and more broadly that approach streets as dynamic fluid and public social places This interdisciplinary book is aimed at students researchers and professionals in the fields of urban geography environmental studies urban planning and policy transportation planning and urban sociology

Territorial Disputes in the South China Sea J. Huang, A. Billo, 2014-12-09 Heightened tensions in the South China Sea have raised serious concerns about the dangers of conflict in this region as a result of unresolved complex territorial disputes This volume offers detailed insights into a range of country perspectives addressing the historical legal structural regional and multilateral dimensions of these disputes

The Role of Law and Regulation in Sustaining Financial Markets Niels Philipsen,Guangdong Xu,2014-11-13 This book explores the role of law and regulation in sustaining financial markets in both developed and developing countries particularly the European Union United States and China The central argument of this book is that law matters for the operation of financial markets which in turn significantly influences the performance of firms industries and economies The Role of Law and Regulation in Sustaining Financial Markets is divided into four parts Part one addresses the connection between law financial development and economic growth Part two deals with the role of financial regulation which can be used to correct market failures such as negative externalities information asymmetries and monopolies Part three focuses on the design functioning and performance of different financial instruments Part four examines the topic of Corporate Social Responsibility This book contributes to the law and finance literature by studying certain conventional issues such as the relationship between finance and economic growth and the effects of regulatory quality on financial development from new perspectives and or with new evidence data and cases It also explores novel topics such as project finance contracts insurance and climate change the shadow banking system that have been overlooked in current literature This book is

meaningful not only for the EU and the US which have suffered considerably from the financial crisis of 2008 but also for China which is struggling to build a sound institutional infrastructure to govern its increasingly complicated financial system. By comparing the regulatory philosophies and practices of the EU the US and China this book will help the reader to understand the diverse nature of the global law and finance nexus and avoid succumbing to the myth of one size fits all.

Handbook on the Geographies of Money and Finance Ron Martin, Jane Pollard, 2017-03-31 The aim of this timely work which appears in the wake of the worst global financial crisis since the late 1920s is to bring together high quality research based contributions from leading international scholars involved in constructing a geographical perspective on money. Topics covered include the crisis the spatial circuits of finance regulation mainstream financial markets banking equity etc through to the various alternative and disruptive forms of money that have arisen in recent years. It will be of interest to geographers political scientists sociologists economists planners and all those interested in how money shapes and reshapes socio economic space and conditions local and regional development. *The Privatization of Israeli Security* Shir Hever, 2017-11-20 Between 1994 2014 Israel's security service was transformed becoming one of the most extreme examples of privatised security in the world. This book is an investigation into this period and the conditions that created Occupation Inc the institution of a private military security industrial complex. State sponsored violence is increasing as a result of this securitisation but why is it necessary and what are its implications. In this book Shir Hever considers the impact of the ongoing Palestinian resistance to Israeli occupation the influence of U S military aid and the rise of neoliberalism in Israel to make sense of this dramatic change in security policy. Through the lens of political economy this book shows how the Israeli security elites turn violence into a commodity in order to preserve their status and wealth providing a fresh new perspective on the Israeli occupation. *The Power of Geographical Thinking* Clare Brooks, Graham Butt, Mary Fargher, 2017-03-02 In this book geography educators from around the globe discuss their research into the power of geographical thinking and consider successful strategies to implement improve and advance geography education in research and practice. It addresses key topics in geography education such as multicultural competence the role of teachers the geography curriculum spatial thinking geographic information systems geocapabilities and climate change. At a global level the contributors and editors bring together the most advanced collection of research and discussion surrounding issues in geography education. The book will be of interest to geography education researchers worldwide including academics at university and teachers in schools as well as professional geographers with an interest in education. *Spatial Cultures* Sam Griffiths, Alexander von Lünen, 2016-06-10 What is the relationship between how cities work and what cities mean. *Spatial Cultures Towards a New Social Morphology of Cities Past and Present* announces an innovative research agenda for urban studies in which themes and methods from urban history social theory and built environment research are brought into dialogue across disciplinary and chronological boundaries. The collection confronts the recurrent epistemological impasse

that arises between research focussing on the description of material built environments and that which is concerned primarily with the people who inhabit govern and write about cities past and present A reluctance to engage substantively with this issue has been detrimental to scholarly efforts to understand the urban built environment as a meaningful agent of human social experience Drawing on a wide range of historical and contemporary urban case studies as well as a selection of theoretical and methodological reflections the contributions to this volume seek to historically geographically and architecturally contextualize diverse spatial practices including movement encounter play procession and neighbourhood The aim is to challenge their tacit treatment as universal categories in much writing on cities and to propose alternative research possibilities with implications as much for urban design thinking as for history and the social sciences

Modelling Aging and Migration Effects on Spatial Labor Markets Roger R. Stough, Karima Kourtiti, Peter Nijkamp, Uwe Blien, 2018-12-07

The aging and migration megatrends and their impact on spatial regional and local labor market performance is the core theme of this book and thus together define its scope and focus The contributions provide an overview of key aging and migration issues in various countries together with analyses of their varied impacts on regional labor markets Systematic database research and related empirical analyses are used to map out the complex and dynamic nature of these trends while cutting edge economic and modeling techniques are used to analyze them In closing the book critically reviews and assesses selected policy measures designed to cope with the effects of aging and migration on regional labor markets

Guardians of the Brazilian Amazon Rainforest: Environmental Organizations and Development Luiz C. Barbosa, 2015-05-08 The Amazon region is the focus of intense conflict between conservationists concerned with deforestation and advocates of agro industrial development This book focuses on the contributions of environmental organizations to the preservation of Brazilian Amazonia It reveals how environmental organizations such as Greenpeace Friends of the Earth WWF and others have fought fiercely to stop deforestation in the region It documents how the history of frontier expansion and environmental struggle in the region is linked to Brazil's position in an evolving capitalist world economy It is shown how Brazil's effort to become a developed country has led successive Brazilian governments to devise development projects for Amazonia The author analyses how globalization has led to the expansion of international commodity chains in the region particularly for mineral ores soybeans and beef He shows how environmental organizations have politicized these commodity chains as weapons of conservation through boycotting certain products while other pro development groups within Brazil claim that such organizations threaten Brazil's sovereignty over its own resources
