Exploring Science with Young Children Terry Russell, Linda McGuigan, 2016-03-16 The Association for Science Education Book Award 2016 Finalist Science in the early years is about more than developing understanding of key scientific concepts it is about encouraging imagination creativity and curiosity and nurturing key scientific skills to form a firm base for learning Understanding how best to do this for young children aged 3 7 is the focus of the book By concentrating on practical and naturally occurring experiences the authors look at meeting the needs of the curriculum with children at the centre of their own learning Chapters look at how to work with children to Find out and develop their own ideas Get them inquiring scientifically Use evidence to support their views This book will really help develop the whole child across the curriculum and make sure they have the skills they need for later learning

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

Stem Cell Therapy in Dermatological Disorders Sumel Ashique, Sanjay Dey, Biplab

Debnath, Mohhammad Ramzan, Swarupananda Mukherjee, 2025-09-23 This book provides a comprehensive understanding of the transformative potential of stem cell therapies for improving skin health and treating debilitating dermatological disorders. *Stem Cell Therapy in Dermatological Disorders* delves into the emerging field of stem cell therapy as a revolutionary approach to treating various dermatological conditions. This book provides a comprehensive overview of the science behind stem cell technology, focusing on its applications in skin regeneration, wound healing, and the management of chronic skin diseases. It examines the cellular and molecular mechanisms that make stem cells uniquely suited for dermatological use, exploring their ability to promote tissue repair, modulate inflammation, and restore the skin's structural integrity. This book aims to bridge the gap between experimental research and clinical application, presenting up-to-date findings on the different types of stem cells used in dermatology, including mesenchymal stem cells, induced pluripotent stem cells, and embryonic stem cells. It highlights the role of stem cells in addressing disorders such as atopic dermatitis, psoriasis, vitiligo, and chronic non-healing wounds. Readers will find in-depth discussions on current therapeutic techniques, the challenges of translating preclinical studies to human trials, and the ethical considerations associated with stem cell therapies. In addition to discussing the state of the art in stem cell-based treatments, the book also casts an eye on the future, identifying gaps in existing knowledge and potential areas for innovation. The authors provide insights into novel delivery systems, genetic engineering advancements, and combinatory approaches that may enhance the efficacy and safety of stem cell therapies in dermatology. This volume serves as an essential resource for dermatologists, researchers, and clinicians seeking to understand the transformative potential of stem cell therapies in improving skin health and treating debilitating dermatological disorders. Readers will find the book explores the latest breakthroughs in stem cell therapy for skin disorders, bridges the gap between basic science and clinical applications, discusses mesenchymal stem cells (MSCs), iPSCs, and exosome-based therapies. Audience: Dermatologists, dermatopathologists, plastic surgeons, medical aestheticians, researchers, clinicians, and biotechnology and pharmaceutical professionals involved in regenerative medicine and aesthetic dermatology.

The Power of Story Joan Wink Ph.D., 2017-11-07 Through this book, readers will discover that stories can move the human heart and head in ways that research cannot. Stories bring together readers, writers, librarians, teachers, students, and families in the libraries of today and will continue to do so tomorrow. Written for all those lovers of literacy, this book links libraries and literacies through the power of stories. The book is not filled with data in the form of pie charts, graphs, and tables. Rather, the truth of the research is grounded in authentic stories that reflect not only the interpretation of data but also the transformative nature of literacies and libraries. The author's primary goal is that readers will come to value and use storytelling in their own professional and personal lives to explain and expand on complex concepts and to make information more accessible for all. The book begins by presenting anecdotes and the author's personal story to lay the foundation for what literacies are and what literacy is not. An activity, *Spiral of Literacy*, allows readers to reflect on their own literacies.

Chapters that follow each begin with a story that sets the theoretical foundation Each chapter concludes with an action section that demonstrates how to turn theory to practice whether you are in a library a classroom or at home A final chapter envisions what libraries might look like in 10 years through interviews with librarians teachers and others interested in literacy

Hosting States and Unsettled Guests Jennifer Riggan, Amanda Poole, 2024-02-06 As wealthy countries build walls to keep migrants out countries in the Global South are celebrated for their hospitality towards refugees *Hosting States and Unsettled Guests* asks the question did these policies enable refugees to consider their new country home Beginning in 2016 Ethiopia promoted local integration economic opportunities and access to education for refugees in order to encourage them to stay long term rather than migrate towards Europe But by 2020 a political overhaul and the outbreak of war in Northern Ethiopia foreclosed these opportunities particularly for Eritrean refugees in Ethiopia How did Eritrean refugees envision their future in light of the discrepancy between promising policies and ongoing instability Using ethnographic interviews and participant observation with government officials NGOs and refugees in three camps in northern Ethiopia and Addis Ababa Jennifer Riggan and Amanda Poole explore refugee notions of progress care hope and futurity Caught at the intersection of teleological violence and temporal agency refugees endure the present and tenaciously produce a sense of the future even when their efforts to progress are repeatedly challenged An important read *Hosting States and Unsettled Guests* makes key empirical and theoretical contributions in forced migration studies East African studies anthropology and international education Riggan and Poole deftly shift the focus of refugee studies away from Europe to regions in the Global South to understand the violence of emerging forms of migration deterrence

The Art of Uncertainty David Spiegelhalter, 2025-03-04 Named a Best Book of the Year by Forbes and The Economist From our greatest living statistical communicator Tim Harford comes an invaluable data driven guide for understanding and learning to embrace risk and uncertainty in our daily lives How dangerous is our diet How much of sports falls into the realm of luck When authorities categorize a given event as highly likely how likely is that really Whether we re trying to decide if the benefits of a new medication are worth the chance of side effects or if artificial intelligence truly threatens humanity our lives are riddled with uncertainties both everyday and existential yet it can be difficult to know how to properly weigh all those unknowns Luckily for us renowned statistician David Spiegelhalter has spent his career dissecting data to resolve the apparently random and decode the many decisions we face with imperfect information In *The Art of Uncertainty* he shows how we can become better at dealing with what we don t know to make smarter choices in a world so full of puzzling variables In lucid lively prose Spiegelhalter guides us through the principles of probability illustrating how they can help us think more analytically about everything from medical advice to sports to climate change forecasts He demonstrates how taking a mathematical approach to phenomena we might otherwise attribute to fate or luck can help us sort hidden patterns from mere coincidences better evaluate cause and effect and predict what s likely to happen in the future Along the way we learn how a misinterpretation of

a probability contributed to the infamous Bay of Pigs fiasco why a ship twice the size of the Titanic sank without a trace and why we can be so confident that no two properly shuffled decks of cards have ever been in the same order Sparkling with wit and fascinating real world examples this is an essential guide to navigating uncertainty while also retaining the humility to admit what we don't or simply cannot know *The Breeder's Gazette*, 1888 **The Invention of Childhood Creativity** Cat Martins, 2024-11-15 This text offers a comprehensive analysis of the concept of the modern creative and imaginative child in Western education Drawing on archived sources and historical works it reframes childhood creativity as a social cultural and scientific construction asking how our thinking and acting toward the creative child have been produced historically The text dissects the discursive construction of creativity as a natural and developmental attribute of the child It argues that the idea of the White creative child constructed through comparative reasoning shaped by primitivism and illustrated through botanical metaphors as close to nature and the senses is a notion embedded with colonialities forming part of a Western civilizing project and entrenched power knowledge relations A compelling and original account of childhood creativity this text will appeal to researchers in arts education early childhood education curriculum studies and the history of education
