Watson, 2023-07-07 Two themes uniting the essays in this collection are the provenance and history of medieval manuscripts during the Middle Ages and the fates that befell them in England in the period after the invention of printing and the 16th century dissolution of the religious houses and visitations of the universities The section Libraries and collectors includes papers on seven major English collectors of the 16th and 17th centuries and the section Manuscripts concerns the fates of five manuscripts or groups of manuscripts from England Belgium and Italy Of the other chapters one is concerned with the

post medieval history of the library of All Souls College Oxford and another with the provenance of hundreds of manuscripts in the Harleian collection in the British Library For this volume Andrew Watson has provided extensive additional notes and indexes The University and College Libraries of Oxford Rodney M. Thomson, James G. Clark, 2015 In the medieval era the primary places for the circulation of both books and ideas were the universities of Europe and among the foremost was the University of Oxford Through complicated networks of acquisition and exchange the colleges of Oxford bought borrowed copied and inherited major collections of one of a kind books and manuscripts for the use of their fellows They quickly built libraries to house them securely and some colleges still retain remnants of those medieval collections This latest volume in the Corpus of British Medieval Library Catalogues series collects for the first time all the extant medieval documents that refer to library holdings in both Oxford University itself and its colleges in the medieval period It will be an invaluable resource for those studying the history of the publication and circulation of ideas and the history of education **A Century of British Medieval Studies** Alan Deyermond, 2007-11-29 This is an authoritative guide to the full range of medieval scholarship undertaken in twentieth century Britain history archaeology language culture Some of the twenty nine essays focus on changes in research method or on the achievements of individual scholars others are personal accounts of a lifetime s work **The Early Records of Sir Robert Cotton's Library** Colin Gerald Calder Tite, 2003 Following the dissolution of the monasteries in the 1530s and the dispersal of their libraries a number of British collectors set to work to recover as much as possible Of their second generation Sir Robert Cotton 1571 1631 was an outstanding member also acquiring a wide range of other material Indeed so important was his library that it became one of the foundation collections of the British Museum in 1753 Significant records never previously studied as a whole survive from the early years of Cotton s library and this book edits and analyses these throwing important new light on Sir Robert his son and grandson as collectors and providing much fresh evidence on the history of their collection and its development **The Arthur of Medieval Latin Literature** , 2011-03-15 King Arthur is arguably the most recognizable literary hero of the European Middle Ages His stories survive in many genres and many languages but while scholars and enthusiasts alike know something of his roots in Geoffrey of Monmouth s Latin History of the Kings of Britain most are unaware that there was a Latin Arthurian tradition which extended beyond Geoffrey This collection of essays will highlight different aspects of that tradition allowing readers to see the well known and the obscure as part of a larger often coherent whole These Latin literate scholars were as interested as their vernacular counterparts in the origins and stories of Britain s greatest heroes and they made their own significant contributions to his myth
