What Makes a City? J. J. Trip, 2007 Urban quality is generally considered increasingly important for urban competitiveness This study therefore investigates the role of urban quality in large scale urban redevelopment which is here elaborated in terms of Richard Florida's concept of quality of place *Disclosing Horizons* Nicholas Temple, 2006-11-22 This study examines the influence of perspective on architecture highlighting how critical historical changes in the representation and perception of space continue to inform the way architects design Since its earliest developments perspective was conceived as an exemplary form of representation that served as an ideal model of how everyday existence could be measured and ultimately judged Temple argues that underlying the symbolic and epistemological meanings of perspective there prevails a deeply embedded redemptive view of the world that is deemed perfectible Temple explores this idea through

a genealogical investigation of the cultural and philosophical contexts of perspective throughout history highlighting how these developments influenced architectural thought This broad historical enquiry is accompanied by a series of case studies of modern or contemporary buildings each demonstrating a particular affinity with the accompanying historical model of perspective
