First in the Homes of His Countrymen Lydia Mattice Brandt, 2016-12-14 Over the past two hundred years Americans have reproduced George Washington's Mount Vernon plantation house more often and in a greater variety of media than any of their country's other historic buildings In this highly original new book Lydia Mattice Brandt chronicles America's obsession with the first president's iconic home through advertising prints paintings popular literature and the full scale replication of its architecture Even before Washington's death in 1799 his house was an important symbol for the new nation His countrymen used it to idealize the past as well as to evoke contemporary and even divisive political and social ideals In the wake of the mid nineteenth century's revival craze Mount Vernon became an obvious choice for architects and patrons looking to reference the past through buildings in residential neighborhoods at world's fairs and along the commercial strip The singularity of the building's trademark piazza and its connection to Washington made it immediately recognizable and easy to replicate As a myriad of Americans imitated the building's architecture the Mount Vernon Ladies Association carefully interpreted and preserved its fabric Purchasing the house in 1859 amid intense scrutiny the organization safeguarded Washington's home and ensured its accessibility as the nation's leading historic house museum Tension between popular images of Mount Vernon and the organization's official narrative for the house over the past 150 years demonstrates the close and ever shifting relationship between historic preservation and popular architecture In existence for roughly as long as the United States itself Mount Vernon's image has remained strikingly relevant to many competing conceptions of our country's historical and architectural identity
