Clinical Nursing Practices Guidelines For Evidence Based Practice:

Clinical Nursing Practices Sarah Renton, Claire McGuinness, Evelyn Strachan, 2019-10-08 The new edition of Clinical Nursing Practices reflects the many changes in nurse education and practice A team of clinical and education experts has updated the core practices contained within this text while to ensure continuity the previous editors have acted as consultants in the development of this edition To reflect the continuing evolution of nursing and nursing practice this new 6th edition emphasizes the importance of evidence based practice values based care person centred care health and social care integration and interprofessional education To encourage reflective practice self assessment questions remain at the end of each chapter for some of the practices Where appropriate certain practices are evidenced mainly by National Guidelines and Standards such as Cardio Pulmonary Resuscitation Infection Control and Blood Transfusion consequently the presentation of the skill or procedure reflects this The updated text addresses the wider issues which impact on everyday nursing and healthcare practice and is specially written to meet the needs of nurses today The core philosophy of book however remains the same to encourage its readers to deliver the highest quality care to each individual patient safely and effectively Simple and straightforward step by step account of the key clinical procedures with clear learning outcomes For nurses learning procedures for the first time for newly qualified nurses needing to check their knowledge or for nurses returning to work needing an update or refresher Equips readers to deliver high quality safe and effective care to patients References the new NMC standards of proficiency Updates to all chapters and skills New Action Rationale format clearly shows the reasons for performing each procedure 25 new illustrations New editor team

Clinical Nursing Practices E-Book Elizabeth Jamieson, Janice M. McCall, Lesley A. Whyte, 2007-04-05 This title is directed primarily towards health care professionals outside of the United States It is a well known text that provides guidelines for over 40 common nursing procedures carried out by carers in a variety of settings The development of competence in these practices is one of the most important aspects of pre registration programmes and this is one of the few UK based texts that takes an educational approach to these practices as opposed to a purely procedure driven approach As in previous editions the emphasis is on a holistic approach with the recognition that each patient is a unique individual Each procedure contains rationale and information for patient education in addition to step by step guidance Skills explained step by step to facilitate learning The comprehensive range of procedures including advanced practices will give readers confidence when they begin clinical work Relevance to hospital and community settings makes it applicable to a wide audience The rationale sections link to the evidence base thereby ensuring best practice
