Cursed Questions Richard Taruskin, 2020-04-21 Richard Taruskin's sweeping collection of essays distills a half century of professional experience demonstrating an unparalleled insider awareness of relevant debates in all areas of music studies including historiography and criticism representation and aesthetics musical and professional politics and the sociology of taste *Cursed Questions* invoking a famous catchphrase from Russian intellectual history grapples with questions that are never finally answered but never go away The writings gathered here form an intellectual biography that showcases the characteristic wit provocation and erudition that readers have come to expect from Taruskin making it an essential volume for anyone interested in music politics and the arts

The Eternal Present, Volume I Sigfried Giedion, 2023-08-15 A groundbreaking reevaluation of paleolithic art through the lens of modernism from the acclaimed historian of art and architecture In *The Beginnings of Art* Sigfried Giedion best known as a historian of architecture shifts his attention to art and its very origins Breaking with an earlier materialistic approach he explores paleolithic art by bringing abstraction transparency and simultaneity into play as modern art has revealed them anew Focusing on the dual concepts of constancy and change he examines paleolithic paintings engravings and sculpture as well as modern art and recent examples of primitive art He argues that the two keys to the meaning of prehistoric art are the symbol portraying reality before reality exists and the animal as humankind's superior in the unified primordial world in which both human and animal were embedded The result is a highly original and important study of prehistoric art

Music in Society Ivo Supićić, 1987 The subject of this study has two distinct but not unrelated aspects first an investigation into the sociology of music as an autonomous and specialized discipline and second an examination of certain fundamental facts that may be considered within the purview of the sociology of music itself If an analysis and study even a preliminary one of these facts is to be properly focused and fruitful we must first try to determine the subject and methods of the sociology of music its position and boundaries in respect to musicology and most especially its relation to the aesthetics of music and music history It is equally indispensable to ascertain what the sociology of music as a separate scholarly discipline embraces where its investigation leads and finally to establish its position vis a vis sociology in general From the Author's Introduction

A Million Years of Music Gary Tomlinson, 2015-03-06 A new narrative for the emergence of human music drawing from archaeology cognitive science linguistics and evolutionary theory What is the origin of music In the last few decades this centuries old puzzle has been reinvigorated by new archaeological evidence and developments in the fields of cognitive science linguistics and evolutionary theory In this path breaking book renowned musicologist Gary Tomlinson draws from

these areas to construct a new narrative for the emergence of human music Starting at a period of human prehistory long before Homo sapiens or music existed Tomlinson describes the incremental attainments that by changing the communication and society of prehuman species laid the foundation for musical behaviors in more recent times He traces in Neandertals and early sapiens the accumulation and development of these capacities and he details their coalescence into modern musical behavior across the last hundred millennia But A Million Years of Music is not about music alone Tomlinson builds a model of human evolution that revises our understanding of the interaction of biology and culture across evolutionary time scales challenging and enriching current models of our deep history As he tells his story he draws in other emerging human traits language symbolism a metaphysical imagination and the ritual it gives rise to complex social structure and the use of advanced technologies Tomlinson s model of evolution allows him to account for much of what makes us a unique species in the world today and provides a new way of understanding the appearance of humanity in its modern form **Music in**

Angel's Cry Michel Poizat,1992 French in 1986 is now available in Arthur Denner s fluid and sensitive English translation Predictably Poizat s route is not at all a conventional one Rather than taking as his point of departure the intentions of composers and librettists he is primarily concerned with the expectations and desires of the audience He reports on an informal group interview with overnight standees on the Paris Opera House steps as they compare notes on how opera became an addiction **Nettl's Elephant** Bruno Nettel,2010-08-30 Surveying the field he helped establish Bruno Nettel

investigates how concepts such as evolution geography and history serve as catalysts for advancing ethnomusicological methods and perspectives Nettel moves from reflections on the history of ethnomusicology to evaluations of the principal organizations in the field interspersing those broader discussions with shorter essays focusing on neglected literature and personal experiences from publisher description **Music in the Early Twentieth Century** Richard Taruskin,2006-08-14
