Self-Organized 3D Integrated Optical Interconnects Tetsuzo Yoshimura, 2021-03-09 Currently light waves are ready to come into boxes of computers in high performance computing systems like data centers and super computers to realize intra box optical interconnects For inter box optical interconnects light waves have successfully been introduced by OE modules in which discrete bulk chip OE electronic devices are assembled using the flip chip bonding based packaging technology OE modules however are not applicable to intra box optical interconnects because intra box interconnects involve short line

distances of the cm mm order and large line counts of hundreds thousands This causes optics excess namely excess components materials spaces fabrication efforts for packaging and design efforts The optics excess raises sizes and costs of intra box optical interconnects enormously when they are built using conventional OE modules This book proposes the concept of self organized 3D integrated optical interconnects and the strategy to reduce optics excess in intra box optical interconnects
