of RT for over 60 years its toxicity on normal tissues often limits the treatment of radioresistant tumors and is responsible for significant decrease in patient's quality of life. However, it was recently established that ultra high dose rate UHDR irradiation induces significantly less normal tissues toxicities while keeping similar antitumor effect compared to conventional dose rate irradiation. This so called FLASH Effect was demonstrated in vivo on different animal models and different organs by delivering the total amount of radiation dose in a very short time usually.

Dynamic Business Strategy Martin Reeves, François Candelon, 2021-11-22 The playing field for business has changed significantly in recent decades. The pace of change is accelerating driven by increased technological progress and shrinking business lifespans. Economic and political uncertainty has risen dramatically and is likely to remain at elevated levels. Industry boundaries are blurring increasing the potential paths to competitive disruption. Strategy is not dead in fact as the gap between winners and losers within industries continues to grow it is more important than ever. However the playbook needs to be reinvented for today's business environment. Classical sources of competitive advantage such as scale and differentiation have not gone away but they have been complemented by new dimensions of competition. This book discusses the new role of strategy in a dynamic unpredictable context. Part 1 of this book revisits classical strategy frameworks and what changes should be made to apply them to the modern era. Part 2 discusses new strategic capabilities companies need today such as adapting to uncertain environments and shaping new or disrupted ones. Part 3 examines the expanding boundaries of strategy including new competitive imperatives as well as the wider range of timescales on which businesses must now operate. Drawing on the work of the BCG Henderson Institute and its fellows and ambassadors over several years Dynamic Strategy will help business professionals as well as academics and students with an interest in

strategy understand the new competitive challenges that businesses face and develop a playbook to address them Events around the book Link to a De Gruyter Online Event in which Martin Reeves Chairman of the BCG Henderson Institute talks about successful business strategies in turbulent times <https://youtu.be/84YE4DBdQpo> *Japanese Current Research* ,1986
