Journalists and Confidential Sources Joseph M Fernandez, 2020-11-23 Journalists and Confidential Sources explores the fraught and widespread reliance by journalists on anonymous sources whistleblowers and others to whom they owe an obligation of confidentiality It examines the difficulties afflicting such relationships analyses the deteriorating right to know and freedom of expression frameworks and explores solutions and reforms The book discusses key Australian and international source protection ethics rules statutes court cases law enforcement actions and case studies It highlights weakness in journalists professional practice codes governing confidentiality obligations discusses inadequate journalistic appreciation of the importance of establishing clear terms and conditions underpinning confidentiality obligations and identifies shortcomings in the law governing source protection The book argues that despite source protection being widely recognised as an important ideal source protection is under sustained assault thereby undermining public access to information and democracy itself The work focusses on Australia but takes into account source protection in the United Kingdom the United States Canada and New Zealand This timely contribution to the global discussion on the subject will greatly interest journalists scholars educators and students especially in the areas of media law and policy journalism media and communication studies and public relations the legal fraternity and anyone who communicates with journalists

A Post-Liberal Peace Oliver Richmond, 2012-08-21 This book examines how the liberal peace experiment of the post Cold War environment has failed to connect with its target populations which have instead set about transforming it according to their own local requirements Liberal peacebuilding has caused a range of unintended consequences These emerge from the liberal peace s internal contradictions from its claim to offer a universal normative and epistemological basis for peace and to offer a technology and process which can be applied to achieve it When viewed from a range of contextual and local perspectives these top down and distant processes often appear to represent power rather than humanitarianism or emancipation Yet the liberal peace also offers a civil peace and emancipation These tensions enable a range of hitherto little understood local and contextual peacebuilding agencies to emerge which renegotiate both the local context and the liberal peace framework leading to a local liberal hybrid form of peace This might be called a post liberal peace Such processes are examined in this book in a range of different cases of peacebuilding and statebuilding since the end of the Cold War This book will be of interest to students of peacebuilding peacekeeping peace and conflict studies international organisations and IR Security Studies

Protecting journalism sources in the digital age Posetti, Julie, 2017-05-08 This Study which covers 121 UNESCO Member States represents a global benchmarking of journalistic source protection in the Digital Age It focuses on developments during the period 2007 2015 The legal frameworks that support protection of journalistic sources at international regional and country levels are under significant strain in 2015 They are increasingly at risk of erosion restriction and compromise a development that is seen to represent a direct challenge to the established universal human rights of freedom of expression and privacy and one that especially may constitute a threat to the sustainability of investigative journalism Page 7
