In Search Of Ancient Astronomies:

In Search of Ancient Astronomies Edwin C. Krupp, 1977 Stonehenge to von Daniken archaeoastronomy discovers our sophisticated ancestors First popular all over survey of the science of archaeoastronomy the study of the astronomies of ancient and prehistoric times through archaeology Krupp expertly separates truth from fantasy in this volume which includes articles written by top authorities on Stonehenge ancient North American Indian astronomers the famous Maya observatories Egyptian pyramids and star clocks and the theories of Velikovsky and Von Daniken Advanced Civilizations of Prehistoric America Frank Joseph, 2009-12-21 Frank Joseph reveals that modern civilization in North America was preceded by four advanced cultures that rose and fell over the past three thousand years How they achieved greatness and why they vanished so completely are explored in this unconventional prehistory *The Incas' Sky* Émile Biémont, 2024-07-12 This book introduces readers to the astonishing civilisation of the Incas Its novelty lies in its general but highly informative synthesis of their history and astronomy through the accounts of contemporary chronicles and recent archaeological findings Richly illustrated with the author's own photographs it will attract the attention of seasoned travellers interested in ancient civilisations and keen to discover what people were capable of achieving so long ago but also any reader interested in the history and prehistory of South American peoples including students or university researchers wanting to know more about the pre Columbian civilizations of Peru The Inca civilisation was in fact the culmination of cultural contributions from a dozen or so complex pre Columbian civilizations such as those of Chavín Nazca Wari or Tiwanaku Intensely spiritual the Inca people attributed metaphysical powers to all manner of objects and places they considered sacred but at the same time the numerous alignments in their buildings show that they result from careful observations of the Sun the Moon and the stars at different times of the year Indeed the Incas were an essentially agrarian people so time measurement and calendar devices were essential for the purely pragmatic problem of planning agricultural tasks during the tropical year The book sets out to describe the Incas in their historical and geographical context avoiding specialization or excessive technicality but retaining a certain scientific rigor and including a detailed consideration of their interest in the sky and astronomy

Archaeoastronomy And The Roots Of Science E. C. Krupp, 2019-04-08 Archaeoastronomy is a rapidly developing interdisciplinary inquiry into the minds of our prehistoric and ancient ancestors one that attempts to reconstruct the ways in which early peoples made use of the sky and its significance to them Astronomy appears to be a fundamental component of culture making the scope of archaeoastronomy worldwide Thi **Alexandria and Qumran: Back to the Beginning** Kenneth Silver, 2017-12-31 This book addresses the proto history and the roots of the Qumran community and of the Dead Sea Scrolls in the light of contemporary scholarship in Alexandria Egypt **Congressional Record** United States. thousands of years this site demonstrates prehistoric ethnology from the end of the last ice age to the time of first contact by European explorers The Arkansas River Valley Indian Rock Art Project began for the author in 1980 It resulted in the cataloging of nearly 700 rock shelters throughout Arkansas which demonstrate some form of aboriginal rock art and or evidence of prehistoric occupation Analysis of its artifacts reveal a very long span of occupation from Archaic through Woodland Periods of cultural influence This association suggests that the glyphs of these shelters were contemporaneous In addition the impressive shelter atop Carrion Crow Mountain in Arkansas along Gumlog Creek a feeder creek into the Arkansas River is associated to one of the most unusual and intricate rock carvings in North America the Gumlog Creek Petroglyph

The Triumph of the Sea Gods Steven Sora,2007-06-19 An investigation of the geographical incongruities in Homer s epics locates Troy on the coast of Iberia in a conflict that changed history Cites the rise in sea level in 1200 B C as leading to the invasion and victory of the Atlantean sea people over the goddess worshipping Trojans who ruled the coasts Identifies Troia Troy as part of a tri city area that later became Lisbon Portugal In The Triumph of the Sea Gods Steven Sora argues compellingly that Homer s tales do not describe adventures in the Mediterranean but are adaptations of Celtic myths that chronicle an Atlantic coastal war that took place off the Iberian Peninsula around 1200 B C It was a war between the pro goddess Celtic culture that presided over what is now Portugal and the patriarchal culture of the sea faring Atlanteans The invasion of the Atlantean sea peoples brought destruction to the entire region stretching from Western Europe s Atlantic border to Egypt Syria and Turkey This was a turning point not only politically but also spiritually The goddess became demonized as seen in myths such as Pandora s Box in which woman was seen as the source of evil not the origin of life and Homer s tale of the epic Greek and Trojan war which was triggered by the abduction of a woman The actual historical struggle described in Homer s stories Sora explains occurred during what was the last in a series of rises in sea level that inundated various land masses Atlantis and permitted sea passage to areas previously accessible only by land The Sea Gods Atlanteans attacked the tri city region of Troia Troy near present day Lisbon which shortly thereafter fell victim to a devastating series of seaquakes and tsunamis The war and the subsequent destructive weather broke the power of this seaboard civilization leading to a wholesale invasion by the sea peoples and the

rapid decline of the region's goddess worshipping culture that had reigned there since Neolithic times Sora shows how Homer's tales allow the modern world to glimpse this ancient conflict which has been obscured for centuries Exploring Archaeoastronomy Liz Henty, 2022-03-24 Archaeoastronomy and archaeology are two distinct fields of study which examine the cultural aspect of societies but from different perspectives Archaeoastronomy seeks to discover how the impact of the skyscape is materialized in culture by alignments to celestial events or sky based symbolism yet by contrast archaeology's approach examines all aspects of culture but rarely considers the sky Despite this omission archaeology is the dominant discipline while archaeoastronomy is relegated to the sidelines The reasons for archaeoastronomy's marginalized status may be found by assessing its history For such an exploration to be useful archaeoastronomy cannot just be investigated in a vacuum but must be contextualized by exploring other contemporaneous developments particularly in archaeology On the periphery of both there are various strands of esoteric thought and pseudoscientific theories which paint an alternative view of monumental remains and these also play a part in the background The discipline of archaeology has had an unbroken lineage from the late 19th century to the present On the other hand archaeoastronomy has not been consistently titled having adopted various different names such as alignment studies orientation theory astro archaeology megalithic science archaeotopography archaeoastronomy and cultural astronomy names which depict variants of its methods and theory sometimes in tandem with those of archaeology and sometimes in opposition Similarly its academic status has always been unclear so to bring it closer to archaeology there was a proposal in 2015 to integrate archaeoastronomy research with that of archaeology and call it skyscape archaeology This volume will examine how all these different variants came about and consider archaeoastronomy's often troubled relationship with archaeology and its appropriation by esotericism to shed light on its position today **Mercury** T.J. Mahoney, 2013-11-18 The purpose of this Gazetteer and Atlas of Astronomy GAA is to list define and illustrate for the first time every named as opposed to merely catalogued object in the sky within a single reference work for use by the general reader writers and editors dealing with astronomical themes and those astronomers concerned with any aspect of astronomical nomenclature Each part of the GAA will contain An introduction to the nomenclature of the body or group of bodies in question A glossary of terminology used A gazetteer listing in strict alphanumerical sequence essential information defining the body or feature concerned An alphanumerically arranged classified index of all the headwords in the gazetteer An atlas comprising maps and images with coordinate grids and labels identifying features listed in the gazetteer Appendix material on the IAU nomenclature system and the transcription systems used for non roman alphabets *Understanding Biblical Israel* Stanley Ned Rosenbaum, 2002 According to Stanley Rosenbaum the Bible resembles what a family would retrieve after a tornado hits a trailer park some of the family's own possessions mixed with those of others overlapping contradicting and disordered Understanding Israelite History is a revolutionary attempt to fill in the many gaps left in the historical record Rosenbaum begins by demonstrating that Israel's

religion was not a clean divinely inspired break with humanity's past but derives from the long sweep of events that began when Homo sapiens first acquired language. Strata of earlier religions are still visible beneath the surface of Israelite monotheism. Early Israel was not one man's family however dysfunctional. It was a collection of individuals and groups mainly outcasts or lower social elements who coalesced into a nation and developed though they did not always follow a religion of ethical monotheism and principles of democratic government and social justice that still today move and inspire more than half the world's population. Like all religions, Israel's was shaped by the language in this case Hebrew in which it is expressed. Expressing monotheism in a language that is essentially dualistic conduced to the suppression of the female elements of earlier religions which had nurtured Israel's religion and consequently to a lack of appreciation for the part played by women in Israel's religious life. This skewed view of Israel's religion and its history that the Bible contains is a result of its having been collected, edited and in part written by Judeans, southern survivors and heirs of David's kingdom who were moved to record it in the wake of the destruction of Jerusalem in 586 BCE.

Cataclysm! D. S. Allan, J. B. Delair, 1997-09-01 Follow this multi disciplinary scientific study as it examines the evidence of a great global catastrophe that occurred only 11 500 years ago. Crustal shifting, the tilting of Earth's axis, mass extinctions, upthrust mountain ranges, rising and shrinking land masses and gigantic volcanic eruptions and earthquakes all indicate that a fateful confrontation with a destructive cosmic visitor must have occurred. The abundant geological, biological and climatological evidence from this dire event calls into question many geological theories and will awaken our memories to our true and not so distant past.

Visualising Skyscapes Liz Henty, Daniel Brown, 2019-08-19 Above the land and its horizon lies the celestial sphere, that great dome of the sky which governs light and darkness, critical to life itself yet its influence is often neglected in the archaeological narrative. *Visualising Skyscapes* captures a growing interest in the emerging field of skyscape archaeology. This powerful and innovative book returns the sky to its rightful place as a central consideration in archaeological thought and can be regarded as a handbook for further research. Bookended by a foreword by archaeologist Gabriel Cooney and an afterword by astronomer Andrew Newsam, its contents have a wide reaching relevance for the fields of archaeology, anthropology, ethnography, archaeoastronomy, astronomy, heritage and cultural studies. The volume balances six chapters on theory and methodology which elaborate on the history and practice of the field with six other chapters focused on case studies from around the world. *Visualising Skyscapes* captures the growing interest in the multidisciplinary study of skylscapes and will be of interest to academics, students and the general public as well as having international appeal. It is topical, timely and relevant to current debates and will hopefully stimulate further interest in this exciting and relatively new area of investigation. The contributions showcase the work of distinguished academics in the field and the chapters are all enhanced by numerous photographs and images.
