Agricultural Involution Clifford Geertz, 1963 *The Agricultural Involution* Clifford Geertz, 1966 **Essays in Trespassing** Albert O. Hirschman, 1981-08-31 This book brings together fourteen articles and papers written by Albert O. Hirschman. About half deal with the interaction of economic development with politics and ideology, the area in which Hirschman perhaps has made most noted contributions. Among these papers are *The Rise and Declines of Development Economics*, a magisterial and yet pointed essay in intellectual history, and his famous article *The Changing Tolerance for Income Inequality in the Course of Economic Development*. Hirschman's ability to trespass, or rather his inability not to trespass from one social science to another and beyond, is the unifying characteristic of the volume. Authoritative searching surveys alternate here with essays presenting some of Hirschman's characteristic inventions, for instance the tunnel effect and obituary improving activities. Three of the papers have not been published previously, and a number of introductory notes have been especially drafted for the present volume to evoke the intellectual political climate in which certain groups of essays were written.

The Ecological Transition John W. Bennett, 2017-09-29 Written during the height of the ecology movement, *The Ecological Transition* is a stunning interdisciplinary work. It combines anthropology, ecology, and sociology to formulate an understanding of cultural environmental relationships. While anthropologists have been studying relationships between humans and the physical environment for a very long time, only in the last thirty years have questions inherent in these relationships broadened beyond description and classification. For example, the concept of environment has been extended beyond the physical into the social. Although anthropologists have adopted many of the concepts that Bennett develops in the book, he also feels that the central issues have never been addressed either by anthropologists or by people in related disciplines. The most important of these, in Bennett's opinion, is the failure to incorporate a respect for the environmental in contemporary culture, which would allow making exceptions in certain human practices in order to protect the environment. His point in *The Ecological Transition* is that a basic cultural change in modern civilization is necessary to achieve this end. Both a theoretical and a practical work, *The Ecological Transition* emphasizes the relationships between human culture, the physical environment, technology, and social policy. *The Ecological Transition* is a challenging volume that makes us face the consequences of human behavior in the modern world: its effect on pollution, natural resources, agriculture, the economy, and population, to name just a few areas. The book remains a significant contribution to the discourse on social, economic, and environmental problems. While the book was first published in 1976, it still reads as a contemporary tract.

The Agrarian Origins of Commerce and Industry Yujiro Hayami, Toshihiko Kawagoe, 2016-07-27 This study challenges the traditional image of peasants in developing economies as always passive to market forces. In this study of marketing upland crops in Indonesia, the authors demonstrate active peasant participation and entrepreneurship in commercial and industrial activities. The peasant marketing system not only works as an effective bridge between farm producers and consumers but

also produces significant employment and income in the rural sector The Indonesian case suggests a genuine possibility of rural based economic development in the third world *A History of Islamic Societies* Ira M. Grumblies, 2016-07-15 Since colonial rule the island of Java served as Indonesia's imagined centre and prime example of development while the Outer Islands were constructed as the state's marginalised periphery Recent processes of democratisation and regional autonomy however have significantly changed the power relations that once produced the marginality of the Outer Islands This book explores processes of political economic and cultural transformations in Indonesia emphasizing their implications for centre periphery relations from the perspective of the archipelago's margins Structured along three central themes the book first provides theoretical contributions to the understanding of marginality in Indonesia The second part focuses on political transformation processes and their implications for the Outer Islands The third section investigates the dynamics caused by economic changes on Indonesia's periphery Chapters written by experts in the field offer examples from various regions which demonstrate how power relations between centre and periphery are getting challenged contested and reshaped The book fills a gap in the literature by analysing the implications of the recent transformation processes for the construction of marginality on Indonesia's Outer Islands *Area Handbook for Indonesia*

Nena Vreeland, 1975 *Interpreting Indonesian Politics* Benedict R O'g Anderson, Audrey Kahin, 2009-12 Over the past two decades there has been a continuing debate among Western scholars concerning the nature of Indonesian politics and the best approaches for understanding them Several of the most important contributions to this debate were never published and others have gone out of print Thus it has been difficult for a new generation of students of Indonesia to be aware of the range of opinions and discussion in Western academic circles concerning the character of postrevolutionary Indonesian politics For this reason it appeared to us useful to bring together a series of articles that can provide a framework for understanding the evolution of these perspectives Clearly we could not include all the important contributions to the debate and this selection has been made on the basis of the best representation of differing views over time In general the pieces appear in chronological sequence in order to delineate more clearly the evolution of the debate To maintain this chronological

development we have also made no changes in the arguments as originally presented nor with one exception permitted the authors to do so even when they have altered their opinions since originally writing the essays Passages however have occasionally been cut from published articles where they are too repetitive or where they are not relevant to the major themes being presented here All such omissions are indicated by a series of dots Because of the continuing nature of the debate the collection is being published as an Interim Report which we hope will stimulate further reactions and analyses
