Social Sciences Jonathan Michie, 2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense HIV, Aids, and the Law Donald T. Dickson, Although morbidity among HIV AIDS victims has decreased the rate of new infections has remained steady for several years substantially increasing the likelihood that this epidemic will continue and expand as a concern for social workers and their clientele both of whom will need to be kept informed of the complex laws governing the milieu and the consequences of the disease This is certainly the case with its spread throughout Asia and Africa In this new work the author draws upon statutes and court decisions from across the United States to provide a comprehensive and current picture of the many facets of HIV AIDS law including health policy confidentiality privacy bioethics the workplace and criminal law and corrections The volume of legal medical social science and popular literature pertaining to HIV AIDS that has been published over the past two decades is staggering Hence any addition to this collection needs some justification What Dickson offers is different from what has preceded Rather than one more contribution to the extensive legal or social science literature this book attempts to integrate the perspectives from two fields law and social work The hope is that this will give social workers practitioners and teachers a better understanding of one of the major issues that may face them in their work with patients and clients every day To date although there is extensive HIV and AIDS related literature in social work and the social sciences it is primarily focused on social work practice issues Where law has been introduced in these works it often is narrow in focus and given the rapid changes in the field no longer up to date This book does not purport to discuss all legal issues in all jurisdictions relating to HIV AIDS but rather to choose selectively those that have particular relevance for social work and social policy The author has placed reliance on those published medical works cited with approval in the legal and social science literature This is a seminal work on the relationship of law medicine and ethics Donald T Dickson is professor in the School of Social Work at Rutgers The State University of New Jersey in New Brunswick
