Pre-legislative scrutiny of the draft Gambling (Licensing and Advertising) Bill Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee, 2013-05-01 Around 80% of online gambling in the UK is conducted with operators which are not licensed here In December 2012 the Government published a very short draft Gambling Licensing and Advertising Bill to require overseas gambling operators to obtain a Gambling Commission licence The overseas based remote gambling operators generally opposed the Bill on the grounds it was unnecessary for consumer protection might drive consumers to cheaper unlicensed operators and was principally intended to bring overseas operators within the UK's tax regime Much of the UK based gambling industry sports bodies and organisations working to combat problem gambling supported the principle of the Bill Almost all those who gave oral or written evidence to the Committee raised the issue that the enforcement regime would have to be rigorous in order to provide any of the benefits to consumers The Committee supports the principle that gambling should be regulated on a point of consumption basis The Committee also notes the

concerns raised about taxation of the online industry The Government stated that the ability to bring all operators serving UK consumers within the tax net is a consequence but not the prime motivation of the draft legislation The Committee notes in this regard that in setting a tax rate for remote gambling the Treasury should bear in mind that too high a rate would be liable to drive customers and companies into the unregulated black market The Politics of the Pharmaceutical Industry and Access to Medicines Hans Löfgren,2017-07-06 The book studies the pharmaceutical industry of India It is one of the most successful stories of economic expansion and improvements in public health Indian firms have made access to quality medicines possible and affordable in many developing countries Indian pharmaceuticals are also exported on a large scale to the United States and other highly regulated markets A wave of mergers acquisitions and tie ups point to growing integration between Indian firms and global pharma multinationals Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka **Fisheries Management** Ian Wellby,Ash Girdler,Robin Welcomme,2010-05-10 Fisheries Management is a beautifully produced full colour guide to the management of still water coarse fisheries Carefully compiled by three leading specialists who each draw on many years experience this book is an essential purchase for all still water coarse fisheries managers The correct management of still waters and their fisheries is vital to ensure environmental protection and an appropriate level of stocking densities of healthy fish This new book provides the reader with the necessary information to achieve these goals The book s first part covers the ecology of still waters and includes succinct and user friendly information on physical and chemical processes nutrient cycles energy movements trophic levels bacteria plants invertebrates fish disease causing organisms mammals and birds Part two provides in depth but easily assimilated cutting edge information on how a still water fishery should be set up developed and successfully managed Coverage includes development preparation and construction stock assessment and invertebrate survey control of water quality aquatic plants erosion predators and nuisance species management of the impact of climate change fish disease and biosecurity control of fishing activities fish nutrition fishery enhancement and condition improvement and general administration The final part of this excellent manual covers legal and social frameworks including general and environmental legislation direct fisheries related legislation and agencies and organizations Fisheries Management provides fishery managers with an invaluable practical tool which none should be without Students studying fisheries biology fisheries management and aquatic sciences will find this a very useful learning resource as will all those who are considering buying or building and setting up lakes for fisheries All libraries in universities research establishments and government agencies where fisheries and biological sciences are studied and taught should have copies of this landmark publication on their shelves Editor and authors with many years practical experience Vital and commercially important information for fisheries managers A useful reference source for upper level students and academics Covers an important multi million pound industry across many countries **The Oxford Handbook of Legal History** Markus D. New Zealand. Parliament,1958 Digital switchover of television and radio in the United Kingdom Great Britain:

Parliament: House of Lords: Select Committee on Communications,2010-03-29 The Committee warns of a major public reaction against radio digital switchover scheduled for 2015 unless the Government make the case for switchover and keep the public informed about its impact There is public confusion and industry uncertainty over radio switchover and concern that due to the lack of public information people are still buying analogue radios which will be out of date in a few years time Retailers gave evidence stating that they are not getting adequate information on switchover plans so are unable to offer consumers accurate guidance when making purchases The report also points out that car manufacturers are still fitting analogue radios in new cars and digital radios will not be fitted as standard in all cars until 2013 The radio switchover is contrasted with the television switchover programme finding that the benefits of TV switchover were well understood in contrast surveys show that the public are generally happy with the present FM radio system and with the range of programmes that are provided The Committee recommends urgent steps on a range of actions including providing a detailed plan for universal digital radio coverage including how it is to be funded developing a policy for the long term use of FM devising a help scheme for radio switchover financed by general taxation rather than the BBC licence fee ensuring new digital car radios are fitted with a multi standard chip to enable their use overseas encouraging radio manufacturers and retailers to devise a sensible scrappage scheme for redundant analogue radios It is also noted that the BBC and Government disagree over whether the cost of universal digital coverage of their national stations can be met under the current licence fee The report says that it is essential that a firm and unambiguous plan for funding the completion of build out of the digital radio service is put in place as soon as possible The report concludes reversing current policy would be unproductive given

the amount of investment in digital radio already and while the switchover in 2015 is ambitious a change of target date is not favoured at this stage
