[Psychoanalysis](#) Pierre Geissmann, Claudine Geissmann, 2005-11-10 Child analysis has occupied a special place in the history of psychoanalysis because of the challenges it poses to practitioners and the clashes it has provoked among its advocates Since the early days in Vienna under Sigmund Freud child psychoanalysts have tried to comprehend and make

comprehensible to others the psychosomatic troubles of childhood and to adapt clinical and therapeutic approaches to all the stages of development of the baby the child the adolescent and the young adult Claudine and Pierre Geissmann trace the history and development of child analysis over the last century and assess the contributions made by pioneers of the discipline whose efforts to expand its theoretical foundations led to conflict between schools of thought most notably to the rift between Anna Freud and Melanie Klein Now taught and practised widely in Europe the USA and South America child and adolescent psychoanalysis is unique in the insight it gives into the psychological aspects of child development and in the therapeutic benefits it can bring both to the child and its family

Psychoanalysis and the family in twentieth-century

France Richard Bates, 2022-02-08 In the last quarter of the twentieth century if French people had a parenting problem or dilemma there was one person they consulted above all Fran oise Dolto 1908 88 But who was Dolto How did she achieve a position of such influence What ideas did she communicate to the French public This book connects the story of Dolto s rise to two broader histories the dramatic growth of psychoanalysis in postwar France and the long running debate over the family and the proper role of women in society It shows that Dolto s continued reputation in France as a liberal and enlightened educational thinker is at best only partially deserved and that conservative and anti feminist ideas often underpinned her prominent public interventions While Dolto retains the status of a national treasure her career has had far reaching and sometimes harmful repercussions for French society particularly in the treatment of autism

Revision Cognitive and Instructional Processes

Linda Allal, L. Chanquoy, Pierre Largy, 2012-12-06 Revision Revisited LINDA ALLAL LUCILE CHANQUOY University of Geneva Switzerland University of Nantes France Revision is a fundamental component of the writing process So fundamental that for some specialists writing is largely a matter of revising or as Murray 1978 stated Writing is rewriting p 85 Experience with writing does not however automatically translate into increased skill in revision Learning to revise is a lengthy complex endeavor Beginning writers do little revision spontaneously and even experienced writers encounter difficulties in attempting to improve the quality of their texts Fitzgerald 1987 Although revision has been extensively dealt with in the writing and learning to write literature this book proposes to revisit theory and research in this area through a series of new contributions The introduction begins with an overview of what revision encompasses It then examines two parallel interrogations that under lie the chapters assembled here namely 1 What are the implications of research on cognitive processes for instruction in revision 2 What are the questions raised by instructional research for the investigation of cognitive processes of revision A final section presents the chapters of this book

The Psychoanalyst and the Child Michel Ody, 2018-11-13 The Psychoanalyst and the Child explores the unique nature of psychoanalytic work with children This book is based on more than 30 years of practice and reflection within the framework of the Alfred Binet Centre in Paris France The very great diversity of situations encountered at the Centre brings the issue of therapeutic indications to the forefront Michel Ody focuses on the diversification of fifteen clinical situations and their theorization ranging from basic consultation to psychoanalytic treatment With this framework as his starting point he looks at the common features between the therapeutic consultation a consultation that becomes therapeutic and the analytic treatment as well as what differentiates them This implies examining at the technical level the different forms of interventions and interpretations presented as well as their metapsychological articulation Ody draws on decades of clinical expertise to set out not just the basic considerations and problems typically encountered in work with this patient group but clear guidelines for methodology and technique Psychoanalysis can be an intellectual process dependent on the ability of the patient to express themselves verbally which can make working clinically with children challenging The Psychoanalyst and the Child seeks to help psychoanalysts through the most challenging of clinical treatments with this patient group

Psychanalyse d'un enfant: méthode de psychanalyse des enfants étudiée à partir du traitement d'un enfant de dix ans Mélanie Klein, 1973

Rethinking Autism with Dolto Kathleen Saint-Onge, 2024-03-04 Rethinking Autism with Dolto takes up a principal legacy of Francoise Dolto's immense project her conviction that autism is a regression to the archaic Dolto theorizes that the infant in utero deep in dreams is receptive to the audition of phonemes during the pre-conscious archaic stage of psychosexual maturation That dream work on words an idiosyncratic prehistory at the onset of mental and emotional life secures the unconscious circulation of affect and the ontogeny of thought long prior to speech seeding associative thinking and facilitating self regulation Kathleen Saint-Onge uses the written work of four nonverbal autistic authors in seeking corroboration for Dolto's formulations finding thoughtful self reflections that relate the experience of living in silence with relentless anxiety while relying on regression as a defence Dolto's unprecedented insights into the infant's earliest learning carry formidable implications for autism interventions and for primary language and literacy At issue is an enduring susceptibility to archaic echoes the haphazard securing return of pre-invested phonemes in communicative exchanges including reading and writing Rethinking Autism with Dolto considers unconscious processes as inherently reparative heralding the responsibility education holds for human health and supports a rethinking of autism that presumes competence Readers are invited to new conversations in psychoanalysis child development education and linguistics through an exploration of the unconscious concomitants of first language acquisition
