Designing with Spirituality Carol Soucek King, 2000 How architects designers are influenced by religion and culture
Botti Rubin Arquitetos Steve Womersley, 2002 The Master Architect Series is a valuable information source and reference to some of the greatest architecture of our time reflecting each master architect s unique designs *The Publishers Weekly*, 2001 Creative Design in Industry and Architecture G. Berkin, O. Kucukerman, Halic University Faculty of Architecture, Turkey, 2015-09-10 Covering the topics of architecture and industrial design Creative Design in Industry and Architecture argues that the discourse on design criteria for both professions share many similarities It is not intended to be prescriptive but is rather the outcome of a detailed design analysis of the works of a number of industrial and architectural designers The authors sought to compare the cultural outcomes of vernacular design in an attempt to show that the design process does not need to be difficult or complicated This book seeks to present a critical assessment of design processes which achieve innovation in the fields of both architectural and industrial disciplines The book is therefore about creativity design strategies and innovative understanding With decades of academic experience the authors are keen on the idea that creativity can be taught They wrote this book from an ongoing pedagogical need to show students that the creative palette has a wide range Case studies and their related theory which support this view are included within the chapters The book also unveils the design dilemma how design can become complicated when surrounded with intricate problems although it is the sum of simple solutions Common theories and practices are exposed within the two disciplines through observation analysis experiment and reflection to discuss and gain insight Both creative and practical approaches are analysed by making a historical study followed by the fundamentals reflecting the current situation and practical applications of the architectural and industrial design principles outlined in an extensive collection of examples To educators this book is instructive to the students deductive to designers inspiring **Design and Spirituality** Stuart Walker, 2020-12-30 Design and Spirituality examines the philosophical context of our current situation and its implications for design It explores how modernity and our constricted notions of progress have contributed to today s crisis of values and argues for a re establishment and re affirmation of self transcending priorities together with an ethos of moderation and sufficiency A wide range of topics are covered including material culture and spiritual teachings sustainability and the spiritual perspective traditional and indigenous knowledge technology and spirituality notions of meaningful design and how particular material things can have deeper symbolic significance There are also reflections on areas such as the language of design busyness and its relationship to wisdom design and social disparity and traditional sacred practices While not avoiding issues that are controversial and sometimes hard hitting Design and Spirituality gets to the heart of the key issues affecting us today and presents them in a highly readable and accessible format The author is a leading thinker in the field and he presents his arguments in a manner that invites the reader to reflect and think about where we are going why we are going there and what really matters
