Lament from Epirus Christopher C. King, 2018-05-29 A Wall Street Journal Best Book of 2018 In the tradition of Patrick Leigh Fermor and Geoff Dyer a Grammy winning producer discovers a powerful and ancient folk music tradition In a gramophone shop in Istanbul renowned record collector Christopher C King uncovered some of the strangest and most hypnotic sounds he had ever heard The 78s were immensely moving seeming to tap into a primal well of emotion inaccessible through contemporary music The songs King learned were from Epirus an area straddling southern Albania and northwestern Greece and boasting a folk tradition extending back to the pre Homeric era To hear this music is to hear the past Lament from Epirus is an unforgettable journey into a musical obsession which traces a unique genre back to the roots of song itself As King hunts for two long lost virtuosos one of whom may have committed a murder he also tells the story of the Roma people who pioneered Epirotic folk music and their descendants who continue the tradition today King discovers clues to his most profound questions about the function of music in the history of humanity What is the relationship between music and language Why do we organize sound as music Is music superfluous a mere form of entertainment or could it be a tool for survival King's journey becomes an investigation into song and dance's role as a means of spiritual healing and what that may reveal about music's evolutionary origins

The Clarinet, 1999 **The Influence of Room Acoustics on Solo Music Performances** Zora Schärer Kalkandjiev, 2015-11-19 This book addresses the question of how musicians are influenced by their room acoustical environment when playing on a concert hall stage Even though the concept of adapting a music performance to room acoustics is often taken for granted by musicians it is unclear if and how such adjustments take place in practice and which aspects of room acoustics play a role in this context Empirical investigations in both real world and simulated concert halls are presented in the book to shed light on the question A case study with a cellist performing in European concert halls as well as a laboratory study with musicians playing in virtual room acoustical environments simulated by means of dynamic binaural synthesis were conducted Both investigations make use of room acoustical computer models to determine the room acoustical conditions typically encountered by musicians on stage Software based performance analysis is employed to quantify musically and perceptually

Williams, 2023-10-05 Award winning chilling science fiction thriller from Professor Williams. The genius Tarot invents an AI controlled system that allows people to control their own dreams. People can create their own paradise as they go along in their sleep. Moreover, they can share dreams with two or three others and share thoughts and feelings. But things start going wrong. Some get immersed or lost in their own heads and Seekers are needed to seek them out and persuade them to return to consciousness safely. Not everyone can be returned. But things get worse. There is something down there. Something malignant and powerful lying at the bottom of our unconscious minds that we knew nothing about until we could be conscious while asleep. More and more are falling into comas and while they sleep, some of their bodies are being secretly exploited. Tarot assembles a team of special people to try to put things right, but the dark forces lined up against them are much more than they seem. And in the world of the awake, a bigger problem has arisen. A planet almost the size of Mars has been detected by our instruments heading towards Earth that could precipitate an extinction level event. But incredibly, this massive danger can't be seen through telescopes or the naked eye. Could the dark forces in our unconscious be able to affect our conscious senses? Does our salvation lie in our dreams? For that matter, is anyone still really awake? *Dark Origins* Dave
