Munro, 2007-09-19 The first of its kind this dictionary defines more than 25 000 marine natural products It indexes each by chemical name organism type and compound type Following a similar format to the Chapman Hall Chemical Database each entry includes biological source chemical structure physical properties biological activity and literature references With an accompanying CD this invaluable tool offers immediate access to information essential to the development of novel pharmaceuticals pesticides and marine anti fouling agents derived from unique molecular structures of marine natural products

Geometry, Particles, and Fields Bjoern Felsager, 2012-12-06 Geometry Particles and Fields is a direct reprint of the first edition From a review of the first edition The present volume is a welcome edition to the growing number of books that develop geometrical language and use it to describe new developments in particle physics It provides clear treatment that is accessible to graduate students with a knowledge of advanced calculus and of classical physics The second half of the book deals with the principles of differential geometry and its applications with a mathematical machinery of very wide range Here clear line drawings and illustrations supplement the multitude of mathematical definitions This section in its clarity and pedagogy is reminiscent of Gravitation by Charles Misner Kip Thorne and John Wheeler Felsager gives a very clear presentation of the use of geometric methods in particle physics For those who have resisted learning this new language his book provides a very good introduction as well as physical motivation The inclusion of numerous exercises worked out renders the book useful for independent study also I hope this book will be followed by others from authors with equal flair to provide a readable excursion into the next step

PHYSICS TODAY Bjoern Felsager is a high school teacher in Copenhagen Educated at the Niels Bohr Institute he has taught at the Universities of Copenhagen and Odense

Dynkin Graphs and Quadrilateral Singularities Tohsuke Urabe, 2006-11-15 The study of hypersurface quadrilateral singularities can be reduced to the study of elliptic K3 surfaces with a singular fiber of type I_0 superscript subscript 0 and therefore these notes consider besides the topics of the title such K3 surfaces too The combinations of rational double points that can occur on fibers in the semi universal deformations of quadrilateral singularities are examined to show that the possible combinations can be described by a certain law from the viewpoint of Dynkin graphs This is equivalent to saying that the possible combinations of singular fibers in elliptic K3 surfaces with a singular fiber of type I_0 superscript subscript 0 can be described by a certain law using classical Dynkin graphs appearing in the theory of semi simple Lie groups Further a similar description for the combination of singularities on plane sextic curves is given Standard knowledge of algebraic geometry at the level of graduate students is expected A new method based on graphs will attract attention of researches
