current architectural practice Standard Letters in Architectural Practice David Chappell, 2008-04-15 Architects and contract administrators spend a great deal of time writing letters of various types. Many of them are routine and repetitive in character but they require proper consideration if potentially dangerous liability situations are to be avoided. This book provides some 285 standard letters for use at all stages of project administration. To assist the user they are grouped into sections which correspond with the RIBA Plan of Work. The aim is to cover all the common situations encountered in practice. The book has been revised to take account of the latest contract revisions and many letters have been added. Unless otherwise stated all letters are suitable for use with JCT 98 WCD 98 IFC 98 MW 98 GC Works 1 1998. The latest edition also takes account of the three new RIBA Standard Forms of Agreement for Appointment of an Architect SFA 99 CE 99 and SW 99. Although primarily written for architects and contract administrators the book will also be of use to project managers and employers' agents under WCD 98. Contractors will also find much of interest.

The Architect's Handbook of Professional Practice Joseph A. Demkin, The American Institute of Architects, 2001 CD ROM contains Samples of all AIA contract documents

RIBA Architect's Handbook of Practice Management Nigel Ostime, 2019-07-25 The professional architect's business management bible now encompasses the RIBA Plan of Work 2013 to reflect the very latest practice in today's cutting edge architectural environment. With an emphasis on the practical aspects of working as an architect the 9th edition combines clear and comprehensive guidance with a focus on new directions in practice management which will give a modern practice that vital commercial edge. Topics range from starting up a practice and developing a business strategy to how to win clients, manage people and handle fees. It includes new sections on topics such as knowledge management, QA, IT and project management too. With its clear, accessible layout and no nonsense style aimed at busy architects this is a must read for practices of all sizes and the ideal companion to the RIBA Job Book 9th edition.

An Architect's Guide to Running a Practice David Littlefield, 2005 Gives you an insight into the problems and challenges faced when setting up a design business. This handbook helps you consider whether or not you should set up on your own, examining issues such as financing, office space, IT and working out a business plan. It illustrates how different kinds of practice develop into successful businesses.

Ethics and the Practice of Architecture Barry Wasserman, Patrick J. Sullivan, Gregory Palermo, 2000-03-07 From theory to practice a unique well rounded guide to ethics for today's architect. How does an architect assist a community in evaluating alternative designs? Resolve a dispute with a contractor. Take into account a project's impact on the natural environment. When it comes to questions like these making decisions about what ought to be done or what is the best or right solution requires more than sound technical knowledge and strong design talent. It demands a solid understanding of the ethical issues that lie at the heart of architectural practice. *Ethics and the Practice of Architecture* offers a complete broad based introduction to this crucial subject. First it examines basic ethical theories and their application to architecture and discusses different ways of identifying ethical content in architecture.

Bridging the gap between theory and practice the second part of the book surveys different professional settings and building project processes that frequently hold ethical concerns and charts the ethical mandates that arise from them In the final section of the book thirty case studies explore a wide range of ethical dilemmas encountered in architectural practice with useful guidance on how to work through them effectively Arranged by topics that span the key phases of a project from pre design through post occupancy evaluation these case studies allow a detailed look at ethical concerns in real life situations where multiple issues are often at stake Providing a practical framework for the exploration of ethical issues in architecture today *Ethics and the Practice of Architecture* is an excellent resource for present and future architects in all areas of the field
