Are Our Descendents Doomed:

The Demographic Revolution in Modern Egypt Warren C. Robinson, Fatma H. El-Zanaty, 2006-01-01 The Demographic Revolution in Modern Egypt tells the dramatic story of Egypt's transition in the last two decades from staggeringly high to low fertility and mortality rates. Scholars Warren C. Robinson and Fatma H. El-Zanaty especially delve into the reasons for the decline in fertility, including the relative success of Egypt's recent public initiatives in family planning. Robinson and El-Zanaty compellingly show the importance of continued demographic stability in Egypt for that nation, the Middle East, and indeed the world. The authors point to Egypt's optimistic progress as a model for other countries facing out of control birth rates wreaking havoc with economic and social development. Harbinger of Doom Glenn G. Thater, 2008-02-04 In Harbinger of Doom Glenn G. Thater transports you to a time of legendary heroes, armored knights, spectacular duels, courtly intrigue, otherworldly evils, and ancient forbidden magics. When mad sorcerers open a gateway to the very pits of hell, releasing outre demons of darkest nightmare upon the world, only the intrepid knights of House Eotrus stand in their way. Claradon Eotrus takes up the mantle of his noble house to avenge his father and hold back the tide of chaos that threatens to engulf the world and destroy mankind. Claradon recruits Angle Theta and Gabriel Garn, mysterious knights of mystical power, to stand with him. Theta and Garn take up their swords one last time against the coming darkness, a darkness from which only one will emerge. But Claradon has bought far more than he bargained for when his comrade Ob discovers the terrifying secret of Angle Theta: a secret so horrifying as to shatter a man's mind and call into question the very nature of good and evil. We Are Our Ancestors Richard F. Weaver, 2009 **Kingsley Davis** David M. Heer, 2017-12-02 Kingsley Davis (1908-1997) was one of the pioneers in social demography and was particularly identified with the theory of the demographic transition. This holds that the process of industrialization first causes mortality to decline, leading to a substantial rate of population growth, and only later causes fertility to fall, leading eventually to the cessation of population growth. Kingsley Davis is especially remembered for his arresting and forceful critique of family planning programs intended to achieve zero population growth. Before he devoted his major attention to social demography, Davis had distinguished himself through influential articles on the structure of family and kinship, including the topics of jealousy and sexual property, the sociology of prostitution and illegitimacy. He had an early interest in structural functional analysis, which resulted in his famous and controversial article on stratification, co-authored with Wilbert Moore, and his equally famous presidential address to the American Sociological Association in 1959. David Heer's biography of Kingsley Davis is based on material contained in the Kingsley Davis Archive at the Hoover Institution Library at Stanford University, the Kingsley Davis graduate file at Harvard University, the interview of Kingsley Davis by Jean van der Tak in *Demographic Destinies* (1990), and David Heer's personal relationship with Kingsley Davis. The book also contains thirty of the most important writings by Kingsley Davis. These were chosen in part for the number of citations received in the Cumulative Social Science Citation Index and in part to

Berelson on Population John A. Ross, W. Parker Mauldin, 2012-12-06 Bernard Barney Berelson had a major influence in the application of social science concepts and methods to population policy during the period from 1962 to 1980 This was the period when concern with population problems spread from a relatively small group of scholars and population activists to a much larger diverse international group of political and intellectual leaders and to the general public as well There was an exponential growth in the number of scholars and service personnel in various population and family specialities in this period Barney came into the field with his appointment as Director of the Communication Research Program of The Population Council in 1962 He had no previous training or experience in demography Frank Notestein President of The Population Council at the time had the wisdom to appreciate the value and relevance of Barney's impressive background in communication research and other social science areas as well as his creative mind and leadership qualities His influence on the Council's rapidly expanding program was so immediate and impressive that within a year he was named Vice President When Frank Notestein retired in 1968 Barney became President a post he held for 6 very productive years

Recovering Your Story Arnold Weinstein, 2007-12-18 Great art discovers for us who we are writes eminent literature professor and critic Arnold Weinstein in this magisterial new book about how we can better uncover and understand our own stories by reading five major modern writers Professor Weinstein author of the highly acclaimed *A Scream Goes Through the House* has spent a lifetime guiding students through the work of great writers and in a volume that crowns his career Weinstein invites us to discover ourselves our perceptions our dreams our own elusive deepest stories in the masterpieces of modernist fiction Marcel Proust James Joyce Virginia Woolf William Faulkner the very names sound intimidating Yet as Weinstein argues with wit and passion the works of these authors and of their contemporary heir Toni Morrison are in fact shimmering mirrors of our own inner world and most intimate thoughts Novels such as *Remembrance of Things Past* *Ulysses* *Mrs Dalloway* *To the Lighthouse* *The Sound and the Fury* *Absalom Absalom* and *Beloved* allow us to explore the inner worlds

of human feeling and bring us face to face with our own deepest selves and desires Weinstein decodes these great novels and he shows how to read them to understand human beings the way our minds and hearts actually work This is what Weinstein means by recovering your story Weinstein illuminates the complex pleasures woven into these peerless narratives Beneath the slow sensual cadences of Proust he finds an edgy erotic tension as well as a remarkably crisp depiction of the timeless world inside the self Joyce's *Ulysses* in Weinstein's brilliantly original reading is a protean linguistic experiment that forces us to view both our bodies and our minds in a radically new and hilariously funny light His analysis of Virginia Woolf's *Mrs Dalloway* and *To the Lighthouse* circles back again and again on Woolf's depiction of the importance of relationships in knowing the self Faulkner argues Weinstein is at once our greatest tragedian and our darkest comedian a novelist who captures both the agony and absurdity of consciousness in a time of social and moral disintegration Finally in Toni Morrison's *Beloved* Weinstein explores the legacy of modernism in a contemporary novel as Morrison brings the body into the literary picture confronting how the body affects not only our fundamental concept of self but also consciousness itself In this magnificent work of literary appreciation and exploration Weinstein makes the astonishing discovery of the self as a part of the joy of reading great modernist fiction even as he makes these powerful works understandable accessible indeed imperative for all adventurous readers

Religion and Fertility Joseph Chamie, 1981-04-30 This work is a critical investigation into the relationship between religious affiliation on the one hand and fertility family size preferences and family planning behaviour on the other Dr Chamie works from a set of unique data the 1971 Fertility and Family Planning Survey in Lebanon This survey is not only a national study of Lebanese fertility but also a large scale survey 2 800 people offering the opportunity to study Arab Christian Muslim differentials Lebanon's demographic situation has far greater scientific and practical importance than might be supposed from its relatively small population From observing the important religious communities at different stages of social and economic development Dr Chamie has thus been able to analyse the interacting effects of religion and socio economic development on reproductive behaviour
