Argument And Audience:

The Philosophy of Argument and Audience Reception Christopher W. Tindale, 2015-04-30 Recent work in argumentation theory has emphasized the nature of arguers and arguments along with various theoretical perspectives Less attention has been given to the third feature of any argumentative situation the audience This book fills that gap by studying audience reception to argumentation and the problems that come to light as a result of this shift in focus Christopher W Tindale advances the tacit theories of several earlier thinkers by addressing the central problems connected with audience considerations in argumentation problems that earlier philosophical theories overlook or inadequately accommodate The main tools employed in exploring the central issues are drawn from contemporary philosophical research on meaning testimony emotion and agency These are then combined with some of the major insights of recent rhetorical work in argumentation to advance our understanding of audiences and suggest avenues for further research

Tindale, 2004-05-27 The study of argumentation has primarily focused on logical and dialectical approaches with minimal attention given to the rhetorical facets of argument *Rhetorical Argumentation: Principles of Theory and Practice* approaches argumentation from a rhetorical point of view and demonstrates

how logical and dialectical considerations depend on the rhetorical features of the argumentative situation Throughout this text author Christopher W Tindale identifies how argumentation as a communicative practice can best be understood by its rhetorical features Rhetorical Argumentation uniquely presents argumentation through the idea of an invitational rhetoric by encouraging readers to think about the ways in which they encounter arguments The book explores the processes involved in the argumentative exchanges between arguers and audiences thus emphasizing the collaborative nature of the arguer audience relationship in the argumentative situation That is argument is presented not as a set of ideas imposed upon a passive audience but rather as a dynamic exchange wherein the audience is involved in self persuasion Key Features Explores the ancient foundations of rhetoric from Aristotle to the relatively contemporary works of Perelman and Olbrechts Tytecta Toulmin and Bakhtin Includes numerous examples illustrating the ways in which the reasoning within arguments involves the audience from premise through to conclusion Presents the idea of dialogism drawn from the theories of Mikhail Bakhtin to create a more dynamic and interactive sense of the argumentative context Examines current theory as well as the historical relationship between argument and rhetoric Provides detailed discussions of topics such as nature of the dialogical rhetorical context audiences and standards of appraisal Rhetorical Argumentation is designed to provide advanced undergraduate and graduate students with a clear understanding of the rhetorical view of argumentation and how it can be effective in contemporary society The book is an ideal text for courses in Communication Rhetoric Argumentation Informal Logic Critical Thinking and Conflict Resolution

Kjeldsen, 2017-11-10 This book examines the reception of rhetoric and the rhetoric of reception By considering salient rhetorical traits of rhetorical utterances and texts seen in context and relating this to different kinds of reception and or audience use and negotiation the authors explore the connections between rhetoric and reception In our time new media and new forms of communication make it harder to distinguish between speaker and audience The active involvement of users and audiences is more important than ever before This project is based on the premise that rhetorical research should reconsider the understanding conceptualization and examination of the rhetorical audience From mostly understanding audiences as theoretical constructions that are examined textually and speculatively the contributors give more attention to empirical explorations of actual audiences and users The book will provide readers with new knowledge on the workings of rhetoric as well as illustrative and guiding examples of new methods of rhetorical

studies **Reflections on Theoretical Issues in Argumentation Theory** Frans H. van Eemeren, Bart Garssen, 2015-08-08

This volume presents a selection of papers reflecting key theoretical issues in argumentation theory. Its six sections are devoted to specific themes including the analysis and evaluation of argumentation argument schemes and the contextual embedding of argumentation. The section on general perspectives on argumentation discusses the trends of empiricalization, contextualization and formalization, offers descriptions of the analytical and evaluative tools of informal logic and highlights selected principles that argumentation theorists do and do not agree upon. In turn, the section on linguistic approaches to argumentation focuses on the problem of distinguishing between explanation and argument while also elaborating on the role of verbal indicators of argument schemes. All essays included in this volume point out notable recent developments in the study of argumentation.

Argumentation in Artificial Intelligence Iyad Rahwan, 2009-06-13 Argumentation is all around us. Letters to the Editor often make points of controversy and Why is one of the most frequent questions in language asking for reasons behind behaviour. And argumentation is more than reasoning in the recesses of single minds since it crucially involves interaction. It cements the coordinated social behaviour that has allowed us in small bands of not particularly physically impressive primates to dominate the planet from the mammoth hunt all the way up to organized science. This volume puts argumentation on the map in the field of Artificial Intelligence. This theme has been coming for a while and some famous pioneers are chapter authors but we can now see a broader systematic area emerging in the sum of topics and results. As a logician I find this intriguing since I see AI as logic continued by other means reminding us of broader views of what my discipline is about. Logic arose originally out of reflection on many agent practices of disputation in Greek Antiquity but also in India and China. And logicians like me would like to return to this broader agenda of rational agency and intelligent interaction. Of course Aristotle also gave us a formal systems methodology that deeply influenced the field and eventually connected up happily with mathematical proof and foundations.

Coalescent Argumentation Michael A. Gilbert, 2013-11-05 Coalescent Argumentation is based on the concept that arguments can function from agreement rather than disagreement. To prove this idea Gilbert first discusses how several components: emotional, visceral, physical and kisceral intuitive are utilized in an argumentative setting by people everyday. These components also characterized as modes are vital to argumentative communication because they affect both the argument and the resulting outcome. In addition to the components modes, this book also stresses the goals in argumentation as a means for understanding one's own and one's opposer's positions. Gilbert argues that by viewing positions as complex human events involving a variety of communicative modes we are better able to find commonalities across positions and therefore move from conflict to resolution. By focusing on agreement and shared goals in all modes, arguers can coalesce diverse positions and more easily distinguish between minor or unrelated differences and core disagreements. This permits much greater latitude for locating shared beliefs, values and attitudes that will lead to conflict resolution.

Counter-terrorism Strategy and Al-Qaeda Joshua A. Geltzer,2009-09-10 This book examines the communicative aspects and implications of US counter terrorist policies towards al Qaeda Recent US counter terrorist strategy has been largely based upon projecting certain perceptions of America as an actor to those drawn to al Qaeda and this book investigates in what ways and to what extent US officials believed that the signals sent by what America did and said could influence the behaviour of the terrorist and would be terrorist The study then draws on a growing understanding of that audience to analyse how those drawn to al Qaeda were and indeed still are likely to be influenced by the perceptions of America that Washington s policies generated The study s central argument is that given al Qaeda s unconventional strategy and the particularities of the world view characterising those drawn to the group America s counter terrorist signalling proved largely counter productive to America s objective of undermining al Qaeda s strategic narrative instead serving in many ways to validate it Firstly this book seeks to reveal the significant and largely unexplored role that signalling has played in US counter terrorist policy towards al Qaeda Second it tries to capture the objectives strategy tactics ideology and other defining features of the world view characterising those drawn to al Qaeda Third it strives to combine those two lines of inquiry by applying the al Qaeda world view to a critical analysis of the signals sent by US policies Finally the book aims to offer broad policy implications that demonstrate how an informed understanding of the world view of those drawn to al Qaeda can be employed to revise and refine American counter terrorist signalling This book will be of much interest to students of US foreign policy and public diplomacy counter terrorism strategy and international security Joshua Alexander Geltzer has a PhD in War Studies from Kings College London and is currently a juris doctoral student at Yale Law School **Making**

Arguments Edmond H. Weiss,Steven M. Weiss,2012-04-24 Making Arguments Reason in Context offers a new approach to the teaching of argumentation and debate Nearly all argumentation courses and textbooks tilt toward one of two extremes Critical thinking informal logic in which the laws of reasoning are universal and not affected by audience or context Public speaking in which adaptation to the audience and winning assent trumps logic and reasoning At the first extreme are texts that stress flaws in arguments and how to discern them Their focus tends to be on the logic making deductive inferences and avoiding deductive mistakes or other errors of inference and or the recognition of fallacies deficient or fake arguments They also deal with the messy ambiguities of language Generally this approach omits the concept of an audience And it does not

explain how spotting the flaws in reasoning or improving one's reasoning translates into the ability to make an effective argument. Further, it is not clear how to address audiences whose grasp of logic is shaky. At the other extreme are books, especially public speaking textbooks, that err in the opposite direction. They are fixated on audience. As a result, their advice about how to argue is grounded in audience adaptation. In fact, the process of reasoning is nearly subordinated to such secondary considerations as style, delivery, and organization. And again, the connection between critical thinking, logic, and audience is rarely examined. In *Making Arguments*, we propose to consider argument at the nexus of invention and judgment, the two endpoints from which logic and public speaking examine argumentation respectively. By looking at the stuff that comes between an argument's design and its delivery, we hope to enrich the understanding and the study of argument as both a theoretical and applied discipline. In particular, we want to answer some questions that are seldom addressed in print. What is the starting point for argumentation? When do we even need to argue? When should one embrace and when should one avoid arguing? Why does the same argument work in one place and fail in another? Are most audiences capable of understanding a complex argument? With what authority can one make an argument absent expertise in the field in which the argument takes place? Are there substantive differences between oral and written argument? What does it mean to present an argument? Can someone control the argumentative situation context to the benefit of his/her position? How can argument educate and improve the arguer? Can we learn the truth by arguing? This book addresses the whole advocacy process as a series of concatenated intellectual decisions affecting how arguments are created, ordered, rendered, and produced, with judgment as the overarching concern.
