Suspending Modernity: The Architecture of Franco Albini Kay Bea Jones, 2016-04-01 Franco Albini's works of architecture and design produced between 1930 and 1977 have enjoyed a recent revival but to date have received only sporadic scholarly attention from historians and critics of the Modern Movement A chorus of Italian voices has sung his praises none more eloquently than his protégé Renzo Piano Kay Bea Jones illuminating study of selected works by Studio Albini will reintroduce his contributions to one of the most productive periods in Italian design Albini emerged from the ideology of Rationalism to produce some of Italy's most coherent and poetic examples of modern design He collaborated for over 25 years with Franca Helg and at a time when professional male female partnerships were virtually unknown His museums and installation motifs changed the way Italians displayed historic artifacts He composed novel suspension structures for dwellings shops galleries and his signature INA pavilions where levity and gravity became symbolic devices for connoting his subjects Albini clarified the vital role of tradition in modern architecture as he experimented with domestic space His cohort defied CIAM ideologies to re-socialize postwar housing and speculate on ways of reviving Italian cities He explored new fabrication technologies from the scale of furniture to wide span steel structures yet he never abandoned the rigors of craft and detail in favor of mass production *Suspending Modernity* follows the evolution of Albini's most important buildings and projects even as they reveal his apprehensive attitudes about the modern condition Jones argues here that Albini's masterful use of materials and architectural expression mark an epic paradigm shift in the modern period *Architect*, 1869

Architecture of Middle Georgia John Linley, 2014-04 The middle Georgia area including Baldwin Hancock Jasper Johnson Putnam Washington and Wilkinson Counties is a vast living museum of classic southern architecture First published in 1972 this sweeping survey remains one of the best books on the topic covering primitive Gothic Greek Revival and Victorian styles

and beyond John Linley's descriptions of the diverse structures of the Oconee area are illustrated with more than three hundred photographs and representative floor plans. Fine architecture as Linley shows is greatly influenced by climate and geography by the natural resources of the region and by history, custom and tradition. He considers these major factors along with such individual features as green spaces, gardens and parks and town and city plans, viewing the architecture in relation to the whole environment. The architecture is discussed in chronological order by style and is related to the surrounding country with each of the seven Oconee area counties presented historically and in terms of its own resources. Touring maps of the counties and the principal towns locate all structures and points of interest mentioned in the text.

M. Stern, Daniel Libeskind and Kenneth Frampton. Each chapter explores the relationship between architecture and socio-political issues through discussion of architectural theories and projects, citing specific issues and themes that have led to and will shape the various aspects of the current and future built environment. Ranging from Chomsky's examination of the US-Mexico border as the architecture of oppression to Robert A. M. Stern's defence of projects for the Disney corporation and George W. Bush, this book places politics at the center of issues within contemporary architecture.
