Tolles, 1983 Architecture in Salem , 2004 Annotation Salem Massachusetts is home to one of the largest extant collections of historical architecture in the entire nation In this long awaited reprint noted architectural historian Bryant F Tolles Jr presents an illustrated guide and walking tour covering more than three centuries of building styles and types The book discusses over 350 buildings and complexes with individual entries and photographs for nearly 230 structures The material has been arranged according to eight tour districts each accompanied by an introduction and a map A joy for the avid walker and arm chair enthusiast alike this is truly the essential guide to the architecture of Salem from the early seventeenth century through the Georgian Federal Victorian modern and contemporary periods BRYANT F TOLLES JR is the Director of the Museum Studies Program and Professor of History and Art History at the University of Delaware He has written and edited many books including Resort Hotels of the Adirondacks The Architecture of a Summer Paradise 1850 1950 UPNE 2003 Summer Cottages in the White Mountains The Architecture of Leisure and Recreation 1870 to 1930 UPNE 2000 The Grand Resort Hotels of the White Mountains A Vanishing Architectural Legacy 1998 and New Hampshire Architecture An Illustrated Guide UPNE 1979 He resides in Wilmington Delaware and Center Sandwich New Hampshire **Architecture and Town Planning in Colonial North America** James D. Kornwolf, Georgiana Wallis Kornwolf, 2002 Incorporating more than 3 000 illustrations Kornwolf s work conveys the full range of the colonial encounter with the continent s geography from the high forms of architecture through formal landscape design and town planning From these pages emerge the fine arts of environmental design an understanding of the political and economic events that helped to determine settlement in North America an appreciation of the various architectural and landscape forms that the settlers created and an awareness of the diversity of the continent s geography and its peoples

Considering the humblest buildings along with the mansions of the wealthy and powerful public buildings forts and churches Kornwolf captures the true dynamism and diversity of colonial communities their rivalries and frictions their outlooks and attitudes as they extended their hold on the land **The Salem Project** ,1990 *Historic Streets of Salem, Massachusetts* Jeanne Stella,2018-07-02 With this informative and easy to use guide the streets of Salem come alive with history at every turn When most people think of Salem they think of witchcraft Nathaniel Hawthorne and Samuel McIntire But there is far more to this coastal city s rich history Echoes of lesser known tales linger along its lanes and avenues from the mysteries of Chestnut Street to the founding Quakers of Buffum Street Local historian Jeanne Stella recounts the stories behind some of Salem s oldest street names and reveals the hidden histories that reside within With her colorful and fascinating tales you can step back in time as you walk down Daniels Street learn the many firsts that happened on Broad Street and discover the varied uses of Salem Common **Salem's Witch House** John Goff,2009-09-16 A close up look at this historic Massachusetts landmark including photos and illustrations Though Salem is located on Massachusetts s scenic North Shore its history has not always been picturesque The Witch City as it is internationally known is home to numerous landmarks dedicated to the notorious trials of 1692 Of these the Witch House is perhaps most significant the former residence of Judge Jonathan Corwin whose court ordered the execution of twenty men and women It was here that Corwin examined the unfortunate accused There is however more to this ancient building than its most famous occupant From wars and death to prosperity and progress this book searches beneath the beams and studs of the Witch House to find the stories of those who called this place home **American Colonial Architecture** Joseph Jackson,1924 [American Gothic Art and Architecture in the Age of Romantic Literature](#) Kerry Dean Carso,2014-11-15 [American Gothic Art and Architecture in the Age of Romantic Literature](#) analyses the influence of British Gothic novels and historical romances on American art and architecture in the Romantic era [Prelude to Revolution](#) Peter Charles Hoffer,2013-08-31 A fine study by a prolific scholar who adeptly restores the Salem Gunpowder Raid to its rightful place in the history of the American Revolution New England Quarterly On April 19 1775 British raids on Lexington Green and Concord Bridge made history but it was an episode nearly two months earlier in Salem Massachusetts that set the stage for the hostilities Peter Charles Hoffer has discovered records and newspaper accounts of a British gunpowder raid on Salem Seeking powder and cannon hidden in the town a regiment of British Regulars were foiled by quick witted patriots who carried off the ordnance and then openly taunted the Regulars The prudence of British commanding officer Alexander Leslie and the persistence of the patriot leaders turned a standoff into a bloodless triumph for the colonists What might have been a violent confrontation turned into a local victory and the patriots gloated as news spread of Leslie s Retreat When British troops marched on Lexington and Concord on that pivotal day in April Hoffer explains each side had drawn diametrically opposed lessons from the Salem raid It emboldened the rebels to stand fast and infuriated the British who vowed never again to back down After relating these battles in vivid detail Hoffer provides a teachable problem

in historic memory by asking why we celebrate Lexington and Concord but not Salem and why New Englanders recalled the events at Salem but then forgot their significance A well told story that deserves to be read Hoffer reveals something of the practice of the historian s craft even as he resurrects a dimly remembered event History **The Poorhouses of**

Massachusetts Heli Meltsner,2014-01-10 Ever since the English settled in America extreme poverty and the inability of individuals to support themselves and their families have been persistent problems In the early nineteenth century many communities established almshouses or poorhouses in a valiant but ultimately failed attempt to assist the destitute including the sick elderly unemployed mentally ill and orphaned as well as unwed mothers petty criminals and alcoholics This work details the rise and decline of poorhouses in Massachusetts painting a portrait of life inside these institutions and revealing a history of constant political and social turmoil over issues that dominate the conversation about welfare recipients even today The first study to address the role of architecture in shaping as well as reflecting the treatment of paupers it also provides photographs and histories of dozens of former poorhouses across the state many of which still stand *Historic Real Estate* Whitney Martinko,2020-05-15 A detailed study of early historical preservation efforts between the 1780s and the 1850s In *Historic Real Estate* Whitney Martinko shows how Americans in the fledgling United States pointed to evidence of the past in the world around them and debated whether and how to preserve historic structures as permanent features of the new nation s landscape From Indigenous mounds in the Ohio Valley to Independence Hall in Philadelphia from Benjamin Franklin s childhood home in Boston to St Philip s Episcopal Church in Charleston South Carolina from Dutch colonial manors of the Hudson Valley to Henry Clay s Kentucky estate early advocates of preservation strove not only to place boundaries on competitive real estate markets but also to determine what should not be for sale how consumers should behave and how certain types of labor should be valued Before historic preservation existed as we know it today many Americans articulated eclectic and sometimes contradictory definitions of architectural preservation to work out practical strategies for defining the relationship between public good and private profit In arguing for the preservation of houses of worship and Indigenous earthworks for example some invoked the public interest of their stewards to strengthen corporate control of these collective spaces Meanwhile businessmen and political partisans adopted preservation of commercial sites to create opportunities for and limits on individual profit in a growing marketplace of goods And owners of old houses and ancestral estates developed methods of preservation to reconcile competing demands for the seclusion of and access to American homes to shape the ways that capitalism affected family economies In these ways individuals harnessed preservation to garner political economic and social profit from the performance of public service Ultimately Martinko argues by portraying the problems of the real estate market as social rather than economic advocates of preservation affirmed a capitalist system of land development by promising to make it moral **Nathaniel Bowditch and the Power of Numbers** Tamara Plakins Thornton,2016-02-10 In this engagingly written biography Tamara Plakins Thornton delves into the life and work of Nathaniel Bowditch 1773 1838 a

man Thomas Jefferson once called a meteor in the hemisphere Bowditch was a mathematician astronomer navigator seafarer and business executive whose Enlightenment inspired perspectives shaped nineteenth century capitalism while transforming American life more broadly Enthralled with the precision and certainty of numbers and the unerring regularity of the physical universe Bowditch operated and represented some of New England's most powerful institutions from financial corporations to Harvard College as clockwork mechanisms By examining Bowditch's pathbreaking approaches to institutions as well as the political and social controversies they provoked Thornton's biography sheds new light on the rise of capitalism American science and social elites in the early republic Fleshing out the multiple careers of Nathaniel Bowditch this book is at once a lively biography a window into the birth of bureaucracy and a portrait of patrician life giving us a broader more nuanced understanding of how powerful capitalists operated during this era and how the emerging quantitative sciences shaped the modern experience

Talking Shop Peter Betjemann, 2011-09-12 Describing everything from bread and cappuccinos to mass market furnishings a language of the artisanal saturates our culture today That language Peter Betjemann proposes has a rich and specifiable history Between 1840 and 1920 the cultural appetite for handmade chairs tables cabinets and other material odds and ends flowed through narrative and texts as much as through dusty workshops or the physical surfaces of clay wood or metal Judged by classic axioms about labor's virtue axioms originating with Plato and foundational to modern theories of workmanship the vigorous life of craft as represented in these texts might seem a secondhand version of an ideal and purposeful activity But *Talking Shop* celebrates these texts as a cultural phenomenon of their own In the first book to consider the literary representation of craft rather than of labor in general Peter Betjemann asks how nineteenth and early twentieth century craftspeople writers and consumers managed craft's traditional attachment to physical objects and activities while also celebrating craft in iconic emblematic preeminently textual terms The durable model of workmanship that was created around correlations of craft and narrative physical process and representation and body and text blurred the boundaries between craft and its consumption Discussing a wide range of material from fiction and essays to artifacts the book explores how the era paved the way for the vitality and the viability of a language of craft in much later decades

Commerce and Culture Robert Lee, 2016-05-23 Considerable attention has recently been focused on the importance of social networks and business culture in reducing transaction costs both in the pre industrial period and during the nineteenth century This book brings together twelve original contributions by scholars in the United Kingdom continental Europe and North America which represent important and innovative research on this topic They cover two broad themes First the role of business culture in determining commercial success in particular the importance of familial religious ethnic and associational connections in the working lives of merchants and the impact of business practices on family life Second the wider institutional and political framework for business operations in particular the relationship between the political economy of trade and the cultural world of merchants in an era of transition from personal to corporate structures These key

themes are developed in three separate sections each with four contributions. They focus in turn on the role of culture in building and preserving businesses, the interplay between institutions, networks and power in determining commercial success or failure, and the significance of faith and the family in influencing business strategies and the direction of merchant enterprise. The wider historiographical context of the individual contributions is discussed in an extended introductory chapter which sets out the overall agenda of the book and provides a broader comparative framework for analysing the specific issues covered in each of the three sections. Taken together, the collection offers an important addition to the available literature in this field and will attract a wide readership amongst business, cultural, maritime, economic, social and urban historians, as well as historical anthropologists, sociologists and other social scientists whose research embraces a longer term perspective.

American Urbanism Howard Gillette, Zane Miller, 1987-08-19 One of the major growth fields of the past quarter century, American urban history has generated a rich and diverse literature spanning a number of disciplines in the social sciences and humanities. In this time of transition, historians and practitioners alike can benefit greatly from assessing the contributions of the field. This valuable reference work takes a critical approach to existing literature, dealing with various related avenues of the field which have not always been closely linked together. These essays provide a basis for new synthesis and reinterpretation, as well as for judgment about the lasting effects of the American urban experience.

A Field Guide to American Houses (Revised) Virginia Savage McAlester, 2015-11-10 The fully expanded, updated and freshly designed second edition of the most comprehensive and widely acclaimed guide to domestic architecture in print since its original publication in 1984, and acknowledged everywhere as the unmatched essential guide to American houses. This revised edition includes a section on neighborhoods, expanded and completely new categories of house styles with photos and descriptions of each, an appendix on Approaches to Construction in the 20th and 21st Centuries, an expanded bibliography and 600 new photographs and line drawings.

Pursuing Respect in the Cannibal Isles Nancy Shoemaker, 2019-11-15 Full of colorful details and engrossing stories, *Pursuing Respect in the Cannibal Isles* shows that the aspirations of individual Americans to be recognized as people worthy of others' respect was a driving force in the global extension of United States influence shortly after the nation's founding. Nancy Shoemaker contends that what she calls extraterritorial Americans constituted the vanguard of a vast early US global expansion. Using as her site of historical investigation nineteenth-century Fiji, the cannibal isles of American popular culture, she uncovers stories of Americans looking for opportunities to rise in social status and enhance their sense of self. Prior to British colonization in 1874, extraterritorial Americans had, she argues, as much impact on Fiji as did the British. While the American economy invested in the extraction of sandalwood and sea slugs as resources to sell in China, individuals who went to Fiji had more complicated personal objectives. *Pursuing Respect in the Cannibal Isles* considers these motivations through the lives of the three Americans who left the deepest imprint on Fiji: a runaway whaleman who settled in the islands, a sea captain's wife, and a merchant. Shoemaker's book shows how ordinary

Americans living or working overseas found unusual venues where they could show themselves worthy of others respect
others approval admiration or deference *Everyday Architecture of the Mid-Atlantic* Gabrielle M. Lanier, Bernard L.
Herman, 1997-07-15 Everyday Architecture of the Mid Atlantic gives proof to the insights architecture offers into who we are
culturally as a community a region and a nation
