Arguments Of Agriculture A Casebook In Contemporary Agricultural Controversy:

Arguments of Agriculture Jan Wojcik, 2011 **The Arguments of Agriculture** Jan Wojcik, 1989 The Arguments of Agriculture presents the major issues questions and conflicting opinions of influential policymakers and critics concerning the role and future of modern agriculture Today while modern farm tools and chemicals take huge and unprecedented yields from those fields they often cause an equally unprecedented loss of topsoil Increased productivity has reduced the farming population drastically and economic realities force many small farms out of business A growing international market for food and fiber puts mounting pressure on farmers all over the world even in traditional cultures to use ever more sophisticated techniques to push their productivity higher with new risks Under this kind of pressure the basic question about farming splits into several ones There is a multitude of contradictory answers The author urges the reader to weigh and consider all positions and supplies a primer in the basic arguments of agriculture Each chapter begins with a series of hypothetical cases that illustrate the range of theoretical issues discussed in the chapter The next section analyzes the basic issues and the section entitled Review summarizes and contrasts the opinions of a number of prominent critics Each chapter concludes with a list of recommended readings **Resource Guide to Educational Materials about Agriculture** ,1993 *Agricultural Ethics - An Invitation* Robert L. Zimdahl, 2020-08-13 I write because I am concerned that I and my agricultural colleagues have avoided addressing the moral dimension of the environmental and social problems we have contributed to I hope for an exchange of ideas about agriculture s moral dilemmas I encourage my readers to engage in a collective conversation about the dilemmas and avoid remaining in what Merton calls the collective arrogance and despair of his own herd If those engaged in agriculture continue to ignore and fail to realize our common difficulties they will be addressed and resolved by societal pressure and political action which may not yield the resolution we favor The book s goal is not to resolve the moral dilemmas raised It is to raise them and encourage thought and discussion It will ask but not answer why nearly all involved in agriculture have not addressed the moral concerns voiced by the general public The agricultural enterprise is committed to the benefits and future success of the present very productive chemical capital and energy intensive system which is in the minds of many not sustainable The internal justification invokes the moral claim that they feed the world s population The question remains whether or not the prevailing moral justification of feeding the world is adequate given all the issues modern developed country agriculture faces pesticides in soil water and food cruelty to animals Biotech GMO s corporate agriculture pollution by animal factory waste exploitation of and cruelty to migrant labor **Agriculture's Ethical Horizon** Robert L Zimdahl, 2012-01-30 The second edition of Agriculture s Ethical Horizon is a carefully considered application of philosophical concepts such as utilitarianism and positivism to the practice of agricultural science Author Robert Zimdahl argues for an approach to agriculture guided by foundational values and addresses the questions What are the goals of agricultural and weed science What should their goals be How do and how should the practitioners of agriculture address

complex ethical questions This book engages students researchers and professionals across disciplines including horticulture soil and plant science entomology and more all without requiring a background in philosophy It examines topics such as scientific truth and myth moral confidence in agriculture the relevance of ethics to sustainability and biotechnology New to this edition is a chapter examining the raising housing and slaughter of animals for human food and a chapter on alternative and organic agricultural systems Easily understood by non philosophers Chapter sidebars highlight important concepts and can be used to engage students in further discussion Companion website includes further teaching aids and a discussion board

Deep Disagreement in U.S. Agriculture Christopher Hamlin,2019-04-11 This book exemplifies disagreements in agricultural research and agricultural policies in the U S It hopes to expand the capacity for critical discussion on matters of agriculture and attempts to open a path to more fruitful communication among participants in agricultural controversy

Beyond the Large Farm Paul B. Thompson,2019-03-07 This book examines the rationale for emphasizing productivity as the dominant goal of agricultural research and challenges in the form of alternative goals that scientists might seek in performing agricultural research It presents bibliographic essays that review the criticisms of research

The Spirit of the Soil Paul B. Thompson,2017-05-25 In this second edition of The Spirit of the Soil Agriculture and Environmental Ethics Paul B Thompson reviews four worldviews that shape competing visions for agriculture Productionists have sought increasing yields to make two seeds grow where only one grew before while traditional visions of good farming have stressed stewardship These traditional visions have been challenged by two more worldviews a call for a total cost accounting for farming and an advocacy for a holistic perspective Thompson argues that an environmentally defensible systems approach must draw upon all four worldviews recognizing their flaws and synthesizing their strengths in a new vision of sustainable agriculture This classic 1995 study has been thoroughly revised and significantly expanded in its second edition with up to date examples of agriculture s impact on the environment These include extensive discussions of new pesticides and the effects of animal agriculture on climate and other areas of the environment In addition a new final chapter discusses sustainability which has become a dominant idea within environmental studies and agrarian political philosophy

Portrait of a Farm Family Raymond Bial,1995 Presents a fourth generation farm family in Illinois describing their work and other activities and explaining why it s becoming increasingly hard for a family farm to survive
