Darwin Evolution Creation:

Living with Darwin Philip Kitcher, 2007-01-05 Charles Darwin has been at the center of white hot public debate for more than a century In *Living With Darwin* Philip Kitcher stokes the flames swirling around Darwin's theory sifting through the scientific evidence for evolution Creation Science and Intelligent Design and revealing why evolution has been the object of such vehement attack Kitcher first provides valuable perspective on the present controversy describing the many puzzles that blocked evolution's acceptance in the early years and explaining how scientific research eventually found the answers to these conundrums Interestingly Kitcher shows that many of these early questions have been resurrected in recent years by proponents of Intelligent Design In fact Darwin himself considered the issue of intelligent design and amassed a mountain of evidence that effectively refuted the idea Kitcher argues that the problem with Intelligent Design isn't that it's not science as many critics say but that it's dead science raising questions long resolved by scientists But Kitcher points out that it is also important to recognize the cost of Darwin's success the price of life with Darwin Darwinism has a profound effect on our understanding of our place in the universe on our religious beliefs and aspirations It is in truth the focal point of a larger clash between religious faith and modern science Unless we can resolve this larger issue the war over evolution will go on

people of the time Each document is from a major participant in the debates from the predecessors of Darwin to the judges of the influential court cases of the present day The editors have included an introduction and analysis of each document that places it within historical and scientific context Evolution and Creationism A Documentary and Reference Guide aims to enhance our understanding of the debate by presenting over 40 documents that shed light on the origins goals and history of the ongoing debate The volume examines such topics as Darwin s theory of natural selection the rise of Fundamentalism and its opposition to evolution and evolution and its discontents at the beginning of the 21st century In addition the work includes an extensive bibliography and reference guide to relevant print and electronic resources
