Berliner Mauer Kunst:

Die Berliner Mauer in der Kunst Anke Kuhrmann, 2011 *United City, Divided Memories?* Dirk Verheyen, 2010-02-03
United City Divided Memories focuses on the basic question of how Berlin today deals with three specific Cold War era legacies the presence of the four Great Powers the East German Stasi and the Berlin Wall Dirk Verheyen looks at monuments museums and memorial sites as illustrations of Berlin's struggle to craft an effective shared identity that ties together its western and eastern halves Verheyen's comprehensive and critical analysis is considered against the broader background of Germany's efforts at coming to grips with its dual twentieth century totalitarian past This book demonstrates that important elements of east west contrast linger and complicate the city's efforts at crafting a more definitively future oriented united identity United City Divided Memories will stimulate debate among German studies scholars as well as among those interested in German history and cultural studies The German Wall Marc Silberman, 2011-04-11 This interdisciplinary volume addresses the consequences of the fall of the Berlin Wall from the revitalizing effect it had on Germany to the new challenges of integrating socially and politically old and new minorities and forming a new European identity It also considers how the fall was represented by the media Imprint and Trace Sonja Neef, 2012-01-01 Today writing by hand seems a nearly archaic process Nearly all of our written communication is digital our letters are via email or text message our manuscripts are composed using word processors our journals are blogs and we sign checks to pay bills with the push of a button Sonja Neef believes that what we have lost in our modern technological conversation is the ductus the physical and material act of handwriting In Imprint and Trace Neef argues however that handwriting throughout its history has always been threatened with erasure It exists in a dual state able to be standardized repeated copied much like an imprint and yet persistently singular original and authentic as a trace or line Throughout its history from the first prehistoric handprint through the innovations of stylus quill and printing press handwriting has revealed an interweaving ever changing relationship between imprint and trace Even today in the age of the digital revolution the trace of handwriting is still an integral part of communication whether etched photographed pixelated or scanned Imprint and Trace presents an essential re evaluation of the relationships between handwriting and technology and between the various imprints and traces that define communication **The Destruction of Art** Dario Gamboni, 2013-06-01 Last winter a man tried to break Marcel Duchamp's Fountain sculpture The sculpted foot of Michelangelo's David was damaged in 1991 by a purportedly mentally ill artist With each incident intellectuals must confront the unsettling dynamic between destruction and art Renowned art historian Dario Gamboni is the first to tackle this weighty issue in depth exploring specters of censorship iconoclasm and vandalism that surround such acts Gamboni uncovers here a disquieting phenomenon that still thrives today worldwide As he demonstrates through analyses of incidents occurring in nineteenth and twentieth century America and Europe a complex relationship exists among the evolution of modern art destruction of artworks and the long history of iconoclasm From the

controversial removal of Richard Serra's Tilted Arc from New York City's Federal Plaza to suffragette protests at London's National Gallery Gamboni probes the concept of artist's rights the power of political protest and how iconoclasm sheds light on society's relationship to art and material culture Compelling and thought provoking The Destruction of Art forces us to rethink the ways that we interact with art and react to its power to shock or subdue

Border Wall Aesthetics Elisa Ganivet, 2019-09-24 30 years after the fall of the Berlin Wall we live in a time of globalization and free trade Nevertheless 70 new border walls have been built in this period put together they would cover the total circumference of the Earth While governments offer manifold justifications for building these separation barriers they invariably attract the attention of artists Is it merely the lure of transgression however that attracts them or is there a deeper significance in the artistic encounter with border walls And which artistic strategies do these artists employ to approach them In order to address these questions lisa Ganivet revisits the history of border wall aesthetics and compares more recent border related works by 100 artists including Joseph Beuys Berlin Banksy Israel Palestine and Frida Kahlo Mexico US Through art and thus beyond art we understand the flaws and shortcomings of supposedly well oiled systems With a preface by lisabeth Vallet

Borders and Border Politics in a Globalizing World Paul Ganster, David E. Lorey, 2005 Borders represent an intriguing paradox as globalization continues to leap barriers at a vigorous pace merging economies and cultures through world trade economic integration the mass media the Internet and increasingly mobile populations At the same time the political boundaries separating peoples remain pervasive and problematic Borders and Border Politics in a Globalizing World offers a carefully selected group of readings to enhance student understanding of the complexities of border regions The reader brings together key writings on the histories of borders their social development their politics and the daily life that characterizes them The authors place their analyses of these issues in an international context stressing how borders influence and how they are influenced by global processes The selections provide a window on our current understanding of human interactions at and along national and interethnic boundaries interactions that will characterize borders and border politics for decades to come Drawing on a worldwide set of case studies this text divides border issues into seven thematic categories borders as barriers borders migrants and refugees borders and partitioned groups borders perceptions and culture borders and the environment borders goods and services and maritime and space borders An excellent text for courses on boundaries ethnicity and international relations this collection of cutting edge information and analysis on borders and border politics in the context of ongoing globalization will shed light both upon international and subnational boundaries and upon the unfolding processes of globalization or decades to come Drawing on a worldwide set of case studies this text divides border issues into seven thematic categories borders as barriers borders migrants and refugees borders and partitioned groups borders perceptions and culture borders and the environment borders goods and services and maritime and space borders An excellent text for courses on boundaries ethnicity and international relations this collection of cutting edge information

The Cambridge Handbook of Copyright in Street Art and Graffiti Enrico Bonadio, 2019-11-07 In recent years the number of conflicts related to the misuse of street art and graffiti has been on the rise around the world Some cases involve claims of misappropriation related to corporate advertising campaigns while others entail the destruction or surgical removal of street art from the walls on which they were created In this work Enrico Bonadio brings together a group of experts to provide the first comprehensive analysis of issues related to copyright in street art and graffiti Chapter authors shed light not only on the legal tools available in thirteen key jurisdictions for street and graffiti artists to object to unauthorized exploitations and unwanted treatments of their works but also offer policy and sociological insights designed to spur further debate on whether and to what extent the street art and graffiti subcultures

can benefit from copyright and moral rights protection

Behind the Berlin Wall Patrick Major, 2010 On 13 August 1961 eighteen million East Germans awoke to find themselves walled in by an edifice which was to become synonymous with the Cold War the Berlin Wall Patrick Major explores how the border closure affected ordinary East Germans from workers and farmers to teenagers and even party members caught out by Sunday the Thirteenth Annual Bibliography of Modern Art Museum of Modern Art (New York, N.Y.). The City as Subject Carolyn S. Loeb, 2022-02-24 In *The City as Subject* Carolyn S. Loeb examines distinctive bodies of public art in Berlin legal and illegal murals painted in West Berlin in the 1970s and 1980s post reunification public sculptures and images and sites from the street art scene Her careful analyses show how these developed new architectural and spatial vocabularies that drew on the city's infrastructure and daily urban experience These works challenged mainstream urban development practices and engaged with citizen activism and with a wider civic discourse about what a city can be Loeb extends this urban focus to her examination of the extensive outdoor installation of the Berlin Wall Memorial and its mandate to represent the history of the city's division She studies its surrounding neighborhoods to show that while the Memorial adopts many of the urban oriented vocabularies established by the earlier works of public art she examines it truncates the story of urban division which stretches beyond the Wall's existence Loeb suggests that by embracing more multi vocal perspectives the Memorial could encourage the kind of participatory and heterogeneous construction of the city championed by the earlier works of public art

Language as a Local Practice Alastair Pennycook, 2010-04-05 *Language as a Local Practice* addresses the questions of language locality and practice as a way of moving forward in our understanding of how language operates as an integrated social and spatial activity By taking each of these three elements language locality and practice and exploring how they relate to each other *Language as a Local Practice* opens up new ways of thinking about language It questions assumptions about languages as systems or as countable entities and suggests instead that language emerges from the activities it performs To look at language as a practice is to view language as an activity rather than a structure as something we do rather than a system we draw on as a material part of social and cultural life rather than an abstract entity *Language as a Local Practice* draws on a variety of contexts of language use from bank machines to postcards Indian newspaper articles to fish naming in the Philippines urban graffiti to mission statements suggesting that rather than thinking in terms of language use in context we need to consider how language space and place are related how language creates the contexts where it is used how languages are the products of socially located activities and how they are part of the action *Language as a Local Practice* will be of interest to students on advanced undergraduate and post graduate courses in Applied Linguistics Language Education TESOL Literacy and Cultural Studies

Die Berliner Mauer 1961-1989 Landesarchiv Berlin, 2007 Das Landesarchiv Berlin zeigt hier die beeindruckendsten Aufnahmen der Teilung aus seinem Bestand Bilder der Brutalität der Brisanz der Absurdität Des realen und doch heute längst vergangen erscheinenden Kalten Krieges dessen Front Berlin von 1961 bis 1989

in zwei ungleiche Hälften zerschnitt Ein scheussliches Bauwerk das die Bewohner der Stadt auseinander riss und für mehr als 28 Jahre eine klaffende Wunde blieb Und an das in diesem Fotoband eindringlich erinnert wird **Isa Genzken** Lisa Lee,2017-09-18 The work of German sculptor Isa Genzken is brilliantly receptive to the ever shifting conditions of modern life In this first book devoted to the artist Lisa Lee reflects on Genzken's tendency to think across media attending to sculptures photographs drawings and films from the entire span of her four decade career from student projects in the mid 1970s to recent works seen in Genzken's studio Through penetrating analyses of individual works as well as archival and interview material from the artist herself Lee establishes four major themes in Genzken's oeuvre embodied perception architecture and built space the commodity and the body Contextualizing the sculptor's engagement with fellow artists such as Joseph Beuys and Bruce Nauman Lee situates Genzken within a critical and historical framework that begins in politically fraught 1960s West Germany and extends to the globalized present Here we see how Genzken tests the relevance of the utopian aspirations and formal innovations of the early twentieth century by submitting them to homage and travesty Sure to set the standard for future studies of Genzken's work Isa Genzken is essential for anyone interested in contemporary art Tourism in Post-Communist States Piotr Niewiadomski,2023-05-29 This book addresses tourism and its development in the post communist context of Central and Eastern Europe CEE Although it has been over 30 years since many countries of Central and Eastern Europe embarked on the path of transition from state socialism to capitalism and liberal democracy the ongoing atrocious events in Ukraine bluntly remind us that the perception of CEE as a transition region may have been done away with too early and that the legacies of communism continue to influence the reality of the region Tourism is no exception here While on the one hand tourism has significantly contributed to the post communist restructuring of CEE on the other the communist heritage has played and still plays an important role in shaping the tourism geographies of the CEE region The book consists of 14 chapters divided into two sections a new introduction and a reflective concluding section All 14 main chapters in this book were originally published in the Tourism Geographies journal The aim of the book is two fold First it summarises distils and highlights the important and often ground breaking contributions Tourism Geographies has made over the years to the debate on tourism in CEE Second it lays foundations for further research on tourism in the post communist states of CEE This book will be of great interest to upper level students researchers and academics in various disciplines human geography politics sociology and tourism studies in general **Enemies to Allies** Brian C. Etheridge,2016-01-26 Addresses a compelling and fascinating feature of the Cold War Era namely the rapid reversal of America's alliance relationships after World War II Thomas A Schwartz coeditor of The Strained Alliance At the close of World War II the United States went from being allied with the Soviet Union against Germany to alignment with the Germans against the Soviet Union almost overnight While many Americans came to perceive the German people as democrats standing firm with their Western allies on the front lines of the Cold War others were wary of a renewed Third Reich and

viewed all Germans as nascent Nazis bent on world domination These adversarial perspectives added measurably to the atmosphere of fear and distrust that defined the Cold War In *Enemies to Allies* Brian C Etheridge examines more than one hundred years of American interpretations and representations of Germany With a particular focus on the postwar period he demonstrates how a wide array of actors including special interest groups and US and West German policymakers employed powerful narratives to influence public opinion and achieve their foreign policy objectives Etheridge also analyses bestselling books popular television shows such as *Hogan's Heroes* and award winning movies such as *Schindler's List* to reveal how narratives about the Third Reich and Cold War Germany were manufactured contested and co-opted as rival viewpoints competed for legitimacy This groundbreaking study draws from theories of public memory and public diplomacy to demonstrate how conflicting US accounts of German history serve as a window for understanding not only American identity but international relations and state power A masterful combination of diplomatic and cultural history Stewart Anderson Brigham Young University
