Bibliographic Guide to Art and Architecture New York Public Library. Art and Architecture Division, 1975 **Raw: Architectural Engagements with Nature** Solveig Bøe, Hege Charlotte Faber, 2016-04-08 Through cross disciplinary explorations of and engagements with nature as a forming part of architecture this volume sheds light on the concepts of both nature and architecture Nature is examined in a raw intermediary state where it is noticeable as nature despite but at

the same time through man's effort at creating form. This is done by approaching nature from the perspective of architecture understood not only as concrete buildings but as a fundamental human way both of being in and relating to the world. Man finds and forms places where life may take place. Consequently architecture may be understood as ranging from the simple mark on the ground and primitive enclosure to the contemporary megalopolis. Nature inheres in many aesthetic forms of expression. In architecture however nature emerges with a particular power and clarity which makes architecture a raw kind of art. Even though other forms of art as well as aesthetic phenomena outside the arts are addressed the analogy to architecture will be evident and important. Thus by using the concept of raw as a focal point this book provides new approaches to architecture in a broad sense as well as other aesthetic and artistic practices and will be of interest to readers from different fields of the arts and humanities spanning from philosophy and theology to history of art architecture and music.

THE INTERNATIONAL WHO'S WHO 56 1992-93, 1992 **New Perspectives on Brücke Expressionism** Christian Weikop, 2017-07-05 New Perspectives on Brücke Expressionism Bridging History brings together highly renowned international art historians in a scholarly work that offers the first full length reassessment in English of the importance of the Brücke group to German modernism specifically and to international modernism more generally. It challenges, interrogates and updates existing orthodoxies in the field of Brücke studies by deploying new research combined with innovative interpretative approaches. This is an exciting volume of essays with an interlinking tripartite structure that charts the significance of this pioneering German avant garde group in relation to various critical themes namely cultural and material identity, collectivity and selfhood as well as defamation and rehabilitation. The book is unique in the field in that it seeks to excavate specific historical research relating to the activities of the Brücke as a bohemian yet nonetheless enterprising artists community and considers the contributions of the key members in relation to the dynamics of that group rather than simply on an individual basis. It thoroughly explores the historiography of the Brücke artists reception throughout the turbulent history of the twentieth century up until the present day.
