Berniers Travels In The Mogul Empire:

Travels in the Mogul Empire François Bernier, 1826 *Travels in the Mogul Empire* is the first authoritative translation into English of François Bernier's *Histoire de la dernière révolution des tats du Grand Mogol* published in Paris in 1670-71. Bernier was born at Jou in the Loire France and educated in medicine at the University of Montpellier. Desiring to see the world he traveled to Syria and Palestine in 1654. He returned to the Middle East in 1656 where he lived for a year in Cairo before sailing south through the Red Sea with the intent of making his way to Gondar in present day Ethiopia. Upon learning that conditions there were unsafe for travel he embarked on a ship bound for the port of Surat on the west coast of India. He remained in India for some 12 years from 1658 to 1669. He initially served as personal physician to Dara Shikoh the eldest son of the Mughal emperor Shah Jahan and the emperor's designated successor and later worked for Daneshmand Khan a nobleman in the court of Emperor Aurangzeb. Bernier witnessed firsthand the bloody civil war and succession struggle of 1656-59 in which Aurangzeb a younger brother of Dara Shikoh seized the Mughal throne. In 1664 Bernier traveled with Aurangzeb to Kashmir commonly called the paradise of India becoming most likely the first European to visit the province. Bernier wrote several long letters to correspondents in France in which he gave detailed descriptions of economic conditions and religious and social customs in northern India including one to Jean Baptiste Colbert finance minister to King Louis XIV. These letters form part of *Travels in the Mogul Empire*. Along with his compatriots Jean Chardin 1643-1713 and Jean Baptiste Tavernier 1605-89 both of whom he met on his travels Bernier was the source of most of what Europeans knew about India in the late 17th century early 18th centuries. Bernier was a thinker as well as an adventurer and the book is replete with excursions on a range of topics for example on the nature of atoms the Lost Tribes of Israel winds and currents rains and the Nile River. There is also an appendix on the history of travel to India. The book contains a preface by the translator Irving Brock an English merchant banker who had literary interests. It has illustrations of notable people and scenes and three fold out maps.

Travels in the Mogul Empire François Bernier,2015-06-16 Excerpt from *Travels in the Mogul Empire* It was led to select Bernier s *Travels* as the opening volume of my Oriental Miscellany Series for two reasons An edition of this book had been promised but never actually issued by my Grandfather as one of the works to be included in that Miscellany which may be regarded as the precursor of all the healthy cheap and popular literature of the present day and further it was a book which I had ever admired even before I was able from actual experience to fully appreciate its very remarkable accuracy Strange to say although frequently reprinted and translated there does not exist so far as I am aware any satisfactory edition as to general editing notes and so forth and this has I hope proved of advantage to me For all that I cannot claim to have approached even partially an ideally perfect edition but to quote Bernier s own words as applied to his map of The Mogol Empire I prefer to hope that I have produced a work not absolutely correct but merely less incorrect than others that I have seen For instance a copy of the Urdu translation made in 1875 by Colonel Henry Moore and lithographed in two volumes 8vo at Umritsur and Moradabad in 1886 and 1888 respectively only reached my hands after the Bibliography had been printed off Nor have I been able as yet to find any copy of a Lucknow reprint of the Delhi edition No 22 of the list In my treatment of Indian proper names and Indian and Persian words generally in my notes and elsewhere I have availed myself very liberally of the time honoured spelling proviso or clause laid down by authority in the rules which govern the transliteration of such words About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Gunpowder, Explosives and the State Brenda J. Buchanan, 2016-12-05 Gunpowder studies are still in their infancy despite the long standing civil and military importance of this explosive since its discovery in China in the mid ninth century AD In this second volume by contributors who meet regularly at symposia of the International Committee for the History of Technology ICOHTEC the research is again rooted in the investigation of the technology of explosives manufacture but the fact that the chapters range in scope from the Old World to the New from sources of raw materials in south east Asia to the complications of manufacture in the West shows that the story is more than the simple one of how an intriguing product was made This volume is the first to develop the implications of the subject not just in the sense of relating it to changing military technologies but in that of seeing the securing of gunpowder supplies as fundamental to the power of the state and imperial pretensions The search for saltpetre for example an essential ingredient of gunpowder became a powerful engine of sea going European trade from the early seventeenth century Smaller states like Venice were unable to form these distant connections and so to sustain a gunpowder army Stronger states like France and Britain were able to do so and became even more powerful as the demand for improved explosives fostered national strengths leading to a development of the sciences especially chemistry in the former case and of manufacturing techniques in the latter
