11th International Symposium on Automotive Lighting - ISAL 2015 - Proceedings of the Conference Tran Quoc

Khanh, 2015-10-08 It is a pleasure to present the proceedings of the 11th International Symposium on Automotive Lighting which took place in Darmstadt on September 28-30, 2015. This conference is the document of a series of successful conferences since the first PAL conference in 1995 and shows the latest innovative potentials of the automotive industry in the application of lighting technologies. *2016 Passenger Car and 2015 Concept Car Yearbook* Automotive Engineering International, 2015-12-15 Carmakers release new models every year with advanced technology to attract consumer interest and to satisfy increasingly stringent government regulations. Some of these technologies are firsts or leading edge and they start trends that more companies will soon follow. Snapshots of the direction of the automotive industry along with OEM and supplier perspectives are presented in these articles that have been collected by the Editors of Automotive Engineering whose aim is to provide the reader with a complete overview of the key advances that took place over the course of one model year. Provides a single source for information on the key engineering trends of one year. Allows the reader to skip to chapters that cover specific car models that interest them or read about all models from beginning to end. Includes plenty of big full color images and the facts about the most recent technology and engineering innovations. Each car manufacturer has its own chapter exploring new models in depth. The yearly trends and innovations that make the automotive industry fascinating to both the engineer and the customer are all captured in the imagery and easy reading of this full color book.

Speed Read Car Design Tony Lewin, 2017-12-05 This beautifully designed and illustrated essential guide to car design from Motorbooks Speed Read series traces the inspirations of the first car designers and tracks the craft, the art and the science that have propelled successive generations of designers and shaped the contours of the vehicles we see all around us. Never before has the car buying public been more aware of how a car's design fits into their everyday lives and what it communicates about the driver behind the wheel. Like all design, car design is a complex subject. Every part of a car represents myriad decisions by the design team, ruled by engineering, aesthetics, human interface and emotion. Speed Read Car Design helps you understand the hows and whys of that design process, offering an engaging review of history, theory, key concepts and key designers. It's a book for car enthusiasts, design fans and anyone with a desire to better understand why our wheeled world looks the way it does. In sections divided by topic, you'll explore the birth of car design, how it evolved over the last century, successes and failures in innovation, the elements that make up a car's style, the engineering behind the design, the creative process and design fads, and finally the road ahead in car design. Each section ends with a glossary of related terms and informational sidebars provide fun facts, historical tidbits and mini bios of key people in car design. Sleek illustrations of the cars give clear design examples throughout. With Motorbooks Speed Read series, become an instant expert in a range of fast moving subjects from Formula 1 racing to the Tour de France. Accessible language, compartmentalized

sections fact filled sidebars glossaries of key terms and event timelines deliver quick access to insider knowledge Their brightly colored covers modern design pop art inspired illustrations and handy size make them perfect on the go reads
