on the modernist lexicon 100 years after its birth moving through different fields of cultural heritage from different forms of art to architecture from design to engineering from literature to history representation and restoration The book appeals to scholars and professionals who are involved in the process of understanding reading and comprehension the transformation that the places have undergone within the period under examination It will certainly foster the international exchange of knowledge that characterized Modernism *Capsules: Typology of Other Architecture* Peter Šenk, 2017-10-12 This book investigates the architectural product design and urban typology of the capsule which beginning in the 1960s broadened the concept of the basic building blocks of architecture to include a minimal living unit called the capsule Here it is presented with regard to the continuity of the development of the Modern Movement its revisionist criticism pioneering examples as well as contemporary examples and uses The typology of the capsule allows us to consider this theme in terms of the architecture of resistance with the potential to search for an other architecture that is embedded in our contemporaneity manifested in small dwellings composite structures and container units shelters and mobile homes in nature and the urban environment technology transfer in high tech designs devices additions and extensions etc The concept of the capsule as a building element of architecture as well as a spatial element can therefore be regarded as having a generative potential for an architecture of personal space for the individual forcing us to reflect on our existing living and dwelling conditions
