Architect David Littlejohn,1984 *The Work of Charles W. Moore* Charles Willard Moore,1978 **You Have to Pay for the Public Life** Charles W. Moore,2004-02-27 Previously uncollected essays of an architect whose love of people buildings and nature was reflected in the places he built Architect Charles Moore 1925 1993 was not only celebrated for his designs he was also an admired writer and teacher Though he wrote clearly and passionately about places he was perhaps unique in avoiding the tone and stance of the personal manifesto Through his buildings books and travels Moore consistently sought insights into the questions that always underlie architecture and design What does it mean to make a place and how do we inhabit those places How do we continue to build upon but respect the landscape How do we reconcile democracy and private land ownership What is original What is taste What is the relationship between past and present How do we involve inhabitants in making places Finally what is public life As the world becomes smaller and the uniqueness of places and landscapes gives way to sameness Moore s celebration of the vernacular and of the surprising are more relevant than ever The pieces in this book span the years 1952 to 1993 and engage a myriad of topics and movements such as contextualism community participation collaboration environmentally sensitive design and historic preservation The essays in this book reflect as well Moore s scholarship humanism urbanity and great wit [An Architectural Life](#) Kevin P. Keim,Charles Willard Moore,1996 Charles W Moore created hundreds of buildings and outdoor spaces all over the world including homes museums churches and office blocks This text examines his work and explores what it means to inhabit and why it is vital to craft and make cities with care **Makers of 20th-Century Modern Architecture** Donald Leslie Johnson,Donald Langmead,2013-05-13 Makers of 20th Century Modern Architecture is an indispensable reference book for the scholar student architect or layman interested in the architects who initiated developed or advanced modern architecture The book is amply illustrated and features the most prominent and influential people in 20th century modernist architecture including Wright Eisenman Mies van der Rohe and Kahn It describes the milieu in which they practiced their art and directs readers to information on the life and creative activities of these founding architects and their disciples The profiles of individual architects include critical analysis of their major buildings and projects Each profile is completed by a comprehensive bibliography **The Sea Ranch** Donlyn Lyndon,James Alinder,Donald Canty,Lawrence Halprin,2004 Recognized for its environmentally sensitive planning and architecture the Sea Ranch community is located on the Californian Sonoma Coast Heavily illustrated this volume uses photographs and plans to portray the people and buildings and reveal the community s success as an environmental experiment [Architects' Drawings](#) Kendra Schank Smith,2005 Here for the first time a wide range of world famous architects sketches from the Renaissance to the present day can be seen in a single volume The sketches have been selected to represent the concepts or philosophies of the key movements in architecture in order to develop an overall picture of the role of the sketch in the development of architecture The book illustrates the work of

designers as diverse as Andrea Palladio Erich Mendelsohn Sir Edwin Lutyens Gianlorenzo Bernini Le Corbusier Michelangelo Alvar Aalto Sir John Soane Francesco Borromini Walter Gropius and contemporary architects Tadao Ando Zaha Hadid and Frank Gehry to name but a few Each chronologically placed sketch is accompanied by text providing details about the architect's life a look at the sketch in context and the connection to specific buildings where appropriate Style media and meaning are also discussed developing an explanation of the architect's thinking and intentions

Modern Architectural Theory Harry Francis Mallgrave, 2009-07-13 Modern Architectural Theory is the first book to provide a comprehensive survey of architectural theory primarily in Europe and the United States during three centuries of development In this synthetic overview Harry Mallgrave examines architectural discourse within its social and political context He explores the philosophical and conceptual evolution of its ideas discusses the relation of theory to the practice of building and most importantly considers the words of the architects themselves as they contentiously shaped Western architecture He also examines the compelling currents of French rationalist and British empiricist thought radical reformation of the theory during the Enlightenment the intellectual ambitions and historicist debates of the nineteenth century and the distinctive varieties of modern theory in the twentieth century up to the profound social upheaval of the 1960s Modern Architectural Theory challenges many assumptions about architectural modernism and uncovers many new dimensions of the debates about modernism

Architecture's Historical Turn Jorge Otero-Pailos, 2013-11-30 Architecture's Historical Turn traces the hidden history of architectural phenomenology a movement that reflected a key turning point in the early phases of postmodernism and a legitimating source for those architects who first dared to confront history as an intellectual problem and not merely as a stylistic question Jorge Otero Pailos shows how architectural phenomenology radically transformed how architects engaged theorized and produced history In the first critical intellectual account of the movement Otero Pailos discusses the contributions of leading members including Jean Labatut Charles Moore Christian Norberg Schulz and Kenneth Frampton For architects maturing after World War II Otero

Pailos contends architectural history was a problem rather than a given. Paradoxically their awareness of modernism's historicity led some of them to search for an ahistorical experiential constant that might underpin all architectural expression. They drew from phenomenology exploring the work of Bachelard, Merleau-Ponty, Heidegger, and Ricoeur which they translated for architectural audiences. Initially the concept that experience could be a timeless architectural language provided a unifying intellectual basis for the stylistic pluralism that characterized postmodernism. It helped give theory, especially the theory of architectural history, a new importance over practice. However, as Otero Pailos makes clear, architectural phenomenologists could not accept the idea of theory as an end in itself. In the mid 1980s they were caught in the contradictory and untenable position of having to formulate their own demotion of theory. Otero Pailos reveals how ultimately the rise of architectural phenomenology played a crucial double role in the rise of postmodernism, creating the antimodern specter of a historical consciousness and offering the modern notion of essential experience as the means to defeat it.

Source: Book of American Architecture George Everard Kidder Smith, 1996. *Scorched Earth* is the first book to chronicle the effects of chemical warfare on the Vietnamese people and their environment where even today more than 3 million people, including 500,000 children, are sick and dying from birth defects, cancer, and other illnesses that can be directly traced to Agent Orange dioxin exposure. Weaving first-person accounts with original research, Vietnam War scholar Fred A. Wilcox examines long-term consequences for future generations, laying bare the ongoing monumental tragedy in Vietnam and calls for the United States government to finally admit its role in chemical warfare in Vietnam. Wilcox also warns readers that unless we stop poisoning our air, food, and water supplies, the cancer epidemic in the United States and other countries will only worsen, and he urgently demands the chemical manufacturers of Agent Orange to compensate the victims of their greed and to stop using the Earth's rivers, lakes, and oceans as toxic waste dumps. Vietnam has chosen August 10, the day that the US began spraying Agent Orange on Vietnam, as Agent Orange Day to commemorate all its citizens who were affected by the deadly chemical. *Scorched Earth* will be released upon the third anniversary of this day in honor of all those whose families have suffered and continue to suffer from this tragedy.

Architecture and Ugliness Wouter Van Acker, Thomas Mical, 2020-01-09. Whatever ugliness is, it remains a problematic category in architectural aesthetics, alternately vilified and appropriated, used either to shock or to invert conventions of architecture. This book presents sixteen new scholarly essays which rethink ugliness in recent architecture, from Brutalism to eclectic postmodern architectural productions, and together offer a diverse reappraisal of the history and theory of postmodern architecture and design. The essays address both broad theoretical questions on ugliness and postmodern aesthetics, as well as more specific analyses of significant architectural examples dating from the last decades of the twentieth century. The book attends to the diverse relations between the aesthetic register of ugliness and closely connected aesthetic concepts such as the monstrous, the ordinary, disgust, the excessive, the grotesque, the interesting, the impure, and the sublime. This volume does not simply

document the history of a postmodern anti aesthetic through case studies Instead it aims to shed light on aesthetic problems that have been largely overlooked in the agenda of architectural theory This book answers in detail the questions How did postmodern architects appropriate troublesome contradictions bound to the raw ugliness of the real How have the ugly and the antiaesthetic been a productive force in postmodern architecture How can ugliness be of value to architecture And how can architecture make good use of ugliness
