Architecture In The Age Of Printing:

Architecture in the Age of Printing Mario Carpo, 2001 In this book Mario Carpo discusses the communications media used by Western architects from classical antiquity to modern classicism showing how each medium related to specific forms of architectural thinking *Architettura Dell'età Della Stampa* 724, 2001

Architecture in the Age of Printing Mario Carpo, 2017-02-10 A history of the influence of communication technologies on Western architectural theory The discipline of architecture depends on the transmission in space and time of accumulated experiences concepts rules and models From the invention of the alphabet to the development of ASCII code for electronic communication the process of recording and transmitting this body of knowledge has reflected the dominant information technologies of each period In this book Mario Carpo discusses the communications media used by Western architects from classical antiquity to modern classicism showing how each medium related to specific forms of architectural thinking Carpo highlights the significance of the invention of movable type and mechanically reproduced images He argues that Renaissance architectural theory particularly the system of the five architectural orders was consciously developed in response to the formats and potential of the new printed media Carpo contrasts architecture in the age of printing with what preceded it Vitruvian theory and the manuscript format oral transmission in the Middle Ages and the fifteenth century transition from script to print He also suggests that the basic principles of typographic architecture thrived in the Western world as long as print remained our main information technology The shift from printed to digital representations he points out will again alter the course of architecture

The Aura of the Word in the Early Age of Print (1450-1600) Jessica Buskirk, Samuel Mareel, 2017-07-05 Did the invention of movable type change the way that the word was perceived in the early modern period In his groundbreaking essay *The Work of Art in the Age of Mechanical Reproduction* the cultural critic Walter Benjamin argued that reproduction drains the image of its aura by which he means the authority that a work of art obtains from its singularity and its embeddedness in a particular context The central question in *The Aura of the Word in the Early Age of Print 1450 1600* is whether the dissemination of text through print had a similar effect on the status of the word in the early modern period In this volume contributors from a variety of fields look at manifestations of the early modern word in English French Latin Dutch German and Yiddish as entities whose significance derived not simply from their semantic meaning but also from their relationship to their material support to the physical context in which they are located and to the act of writing itself Rather than viewing printed text as functional and lacking in materiality contributors focus on how the placement of a text could affect its meaning and significance The essays also consider the continued vitality of pre printing press kinds of text such as the illuminated manuscript and how new practices such as the veneration of handwriting sprung up in the wake of the invention of movable type

The Visual Theology of the Huguenots Randal Carter Working, 2016-02-18 The role of architecture within the French Reformed tradition has been of recent scholarly interest seen in the work of Helene Guicharnaud Catharine Randall Andrew Spicer and others Few however have explored in depth the relationship between Reformed theology and architectural forms This thesis explores the roots of Reformed aesthetics set against the background of late medieval church architecture The work of Serlio is demonstrably important in the spreading of the ideas of Vitruvius indicating the influence of classical Roman building on French Reformed architecture There follows an examination of five important Huguenot architects Philibert de l'Orme Bernard Palissy Jacques Androuet du Cerceau Salomon de Brosse and Jacques Perret We then undergo a comparative examination of three churches St Pierre in Geneva a medieval church overhauled by the Reformers St Gervais St Protais a Parisian Catholic church whose facade was completed by the French Reformed architect Salomon de Brosse and the temple at Charenton a structure also designed and built by de Brosse These three buildings reveal the contribution of Huguenot architecture a distinct language that gave expression to Reformed theological ideas and helped bring about the renewal of classicism in France

Architectural Intelligence in the Age of Artificial Intelligence Andri Gerber, Oya Atalay Franck, Michael Mieskes, 2025-09-19 How will AI transform architecture How can we conceptualize AI in the context of architecture The contributors to this volume discuss different positions to understand the fundamental shift provoked by AI and contextualize this shift in forms of operational theories and performative uses of the medium The volume includes essays by practicing architects who explain how AI is used in their work by philosophers who reflect on the impact of AI on our way of thinking and conceptualizing the world and by scientists who explain the foundations and the potential of AI for architecture It provides the starting point to engaging with AI in architecture

but instead manipulated the imported visual vocabulary according to local concerns The book brings together scholarly discourses on transalpine exchange scientific advancements in printmaking and reception of antiquity north of the Alps to offer a new understanding of art in early modern Augsburg and northern Europe at large

Architecture in the Age of Mediatizing Technologies Sang Lee, 2024-10-31 This book offers a novel perspective on contemporary architecture exploring its position in mediatization attained through technological apparatuses It introduces the novel concepts of apparatus centrality and mediatization of architecture which have significant disciplinary and cultural ramifications Highlighting key technological and theoretical developments the book's narrative traces the transformation of architecture from the modernist era to the present digital age En route it reflects on how architecture becomes a crucial element of shifting dispositives through its confluence with technologies of aestheticization and virtualization and by emblemizing ecological ideals It also illuminates the reconfiguring of architectural practice through examining surprising interactions and analogies between architecture and music whose developments in notation and codification continually change the relationship between composer and performer The book explores how architecture is reshaped by broader theory and practice in media and ultimately serves as a cognitive agent It underscores that architecture profoundly influences our phantasmagoric image driven affective world through its increasingly apparatus centric approach to conception design production and mediatization Architecture in the Age of Mediatizing Technologies brings into focus the behavior of architecture in mediatization for researchers and advanced students in architectural design theory and history As an investigation into the interdisciplinary impact of architecture in a mediatized culture at large it also provides a valuable resource for cultural and media studies

Rhetoric and Ethics in the Cybernetic Age Jeff Pruchnic, 2013-08-15 It has become increasingly difficult to ignore the ways that the centrality of new media and technologies from the global networking of information systems and social media to new possibilities for altering human genetics seem to make obsolete our traditional ways of thinking about ethics and persuasive communication inherited from earlier humanist paradigms This book argues that rather than devoting our critical energies towards critiquing humanist touchstones we should instead examine the ways in which media and technologies have always worked as crucial cultural forces in shaping ethics and rhetoric Pruchnic combines this historical itinerary with critical interrogations of diverse cultural and technological sites the logic of video games and artificial intelligence the ethics of life extension in contemporary medicine the transition to computer automated trading in world stock markets the state of critical theory in the contemporary humanities along with innovative analyses of the works of such figures as the Greek Sophists Kenneth Burke Martin Heidegger Michel Foucault Friedrich Nietzsche and Gilles Deleuze This book argues that our best strategies for crafting persuasive communication and producing ethical relations between individuals will be those that creatively replicate and appropriate rather than resist the logics of dominant forms of media and technology
