Architecture Reborn The Conversion And Reconstruction Of Old Buildings:

Architecture Reborn Kenneth Powell, 1999 This is an investigation into the adaption and conversion of buildings as an area of design It looks at 44 schemes to demonstrate that reuse is a positive way to achieve forward looking architecture the message is transformation a physical approach to constructing new form from old fabric Building in Existing Fabric Christian Schittich, 2012-12-10 a disused power station is converted into a cultural centre an old barn is made into a residential house All around us we encounter buildings whose original purpose has rendered them obsolete and which now offer space for new uses The construction and building requirements confronting the architect are as varied and individual as the buildings themselves This publication examines a wide range of realized examples highlighting successful and innovative solutions from the rehabilitation of preserved monuments to the renovation or renewal of existing buildings from the reuse of a gothic monastery or the former industrial buildings of Fiat Lingotto to the renovation of structures made of pre cast concrete panels Introductory essays by specialist authors examine the economical technical historical aspects of the topic and the projects presented are documented fully with illustrations plans and details which have been specially produced by the editorial department of DETAIL **Industrial Heritage Re-tooled** James Douet, 2016-07 This book comprises the authoritative work from the International Committee for the Conservation of the Industrial Heritage detailing the latest approaches to and the best practices for the conservation of the global industrial heritage Architecture in Existing Fabric Johannes Cramer, Stefan Breitling, 2012-11-05 Architectural work on existing structures has become enormously important in recent years For the majority of architects this is where future market opportunities will lie This book provides a comprehensive introduction to the field and is thus addressed to all practitioners students and building sponsors whose interest goes beyond an initial encounter with this wideranging field of activity Contradicting the conventional view that creative design work is the exclusive province of new building design the authors offer a nuanced account of active and creative strategies for planning design and execution Subjects considered range from town planning issues through the overall project cycle and its individual phases all the way to building management Special focuses are the grammar of design as well as the issues arising through collaboration of different experts In order to illuminate this broad and complex spectrum of topics the book incorporates thirty examples of projects from Europe and North America in which buildings from a huge variety of periods from the Middle Ages to the 1960s are transferred into the present **Creative Reuse of Buildings: Volume One** Derek Latham, 2016-01-08 Addresses the advantages and practicalities involved in the issue of the creative re use of existing buildings Proceedings of the 2024 10th International Conference on Humanities and Social Science Research (ICHSSR 2024) Zehui Zhan, Jian Liu, Dina M. Candide 4 Axel Sowa,2011 Candide is a peer reviewed journal dedicated to exploring the culture of knowledge specific to architecture It is released twice a year in English and German Each issue of Candide is made up of five distinct sections This frame work responds to the diversity of architectural knowledge being produced while challenging authors from all disciplines to test a variety of genres in order to write about and represent architecture Essay provides a forum for discussion of architectural knowledge including both fundamental research into and speculative arguments on its nature Analysis allows for in depth examination of built form how can the knowledge embodied in buildings be retrospectively extracted and creatively re used Project is directed at architects who see design as a theoretical tool how can a specific design proposal become a model of thought Encounters gives access to the personal knowledge of renowned unjustly forgotten or entirely unknown protagonists of architecture Fiction reflects the editors conviction that sometimes the imaginary may reveal more about architectural knowledge than science

Building Adaptation James Douglas,2006-08-11 As existing buildings age nearly half of all construction activity in Britain is related to maintenance refurbishment and conversions Building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry Given its importance to sustainable construction the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future especially in the developed parts of the world Building Adaptation Second Edition is intended as a primer on the physical changes that can affect older properties It demonstrates the general principles techniques and processes needed when existing buildings must undergo alteration conversion extension improvement or refurbishment The publication of the first edition of Building Adaptation reflected the upsurge in refurbishment work The book quickly established itself as one of the core texts for building surveying students and others on undergraduate and postgraduate built environment courses This new edition continues to provide a comprehensive introduction to all the key issues relating to the adaptation of buildings It deals with any work to a building over and above maintenance to change its capacity function or performance

Underground Spaces C. A. Brebbia,D. Kaliampakos,2008 It

is a strongly held belief that population growth and the demand for better accommodation and leisure facilities combined with a desire to improve the landscape will result in the need to develop more underground spaces This phenomenon which started in countries subjected to extreme climates is now becoming more widespread Underground spaces are being utilized for a wide diversity of needs They range from classical excavations to subway constructions underground sports halls power stations waste repositories underground cities and many others Their construction techniques are also varied from open air excavations to newly developed injection methods The response of the underground structures on the imposed loadings depends on a number of parameters that sometimes are too complex or not fully understood resulting in budget overruns or even failures that lead to loss of property or life Such uncertain cases need to be addressed and engineers should be able to accurately predict the construction s performance throughout its construction and service life The First International Conference on Underground Spaces discusses not only structural and environmental material characterization aspects but also the trends regarding the utilization of underground spaces This book contains papers presented at the Meeting and covers a wide range of topics including Use of underground space for industry Underground power stations Toxic and nuclear waste repositories Energy underground reservoirs Underground sewerage plants Waste storage and management Road and railway tunnels Utility tunnels Fire defence Defence against terrorist attacks

Guidance on Inventory and Documentation of the Cultural Heritage John Bold, Ad hoc Group for Inventory and Documentation Within the Technical Co-operation and Consultancy Programme, Council of Europe. Directorate of Culture and Cultural Heritage, Council of Europe. Technical Co-operation and Consultancy Programme, 2009-01-01 Improved heritage management and the inclusion of heritage in planning and sustainable development processes necessitate inventory and documentation More than mere scientific tools recommended in international agreements inventory and documentation play a strategic role The complexity of the heritage items that now have to be inventoried and their interaction with our everyday living environment require the clear definition and harmonisation of practices at the European level Through its work in the 1960s the Council of Europe helped to lay the methodological bases for inventorying architectural archaeological and movable heritage The efforts to systematise the process came in answer to the broadening meaning of heritage and today new considerations lead us to address such notions as heritage groups The guidelines proposed in this book reflect the work done so far and provide a basis for future research It is part of a series produced under the Technical Co operation and Assistance Programme to present the experience derived from the projects implemented by the Council of Europe
