Monetary and Capital Markets Department,International Monetary Fund. Research Dept.,International Monetary Fund. Legal Dept.,2016-04-03 Many Latin American economies have experienced significant reductions in growth recently as a result of the end of the commodity super cycle and the rebalancing of China s growth and a number of global banks have been leaving the region AlthoughLatin American countries were generally less affected by the global financial crisis GFC than other regions the region continues also to suffer from the protracted sluggish growth in advanced economies In addition there has since 2008 been a withdrawal of global banks from the region thus potentially worsening access to credit or reducing competition in the financial sector More broadly the GFC demonstrated that extreme economic volatility can originate from outside the region rather than internally as was the experience of the 1980s and 1990s Miscellaneous Series ,1914 **Water and Territory in Latin America** Vladimir Arana,2016-05-28 This book focuses in the current situation of water resources water supply and sanitation and population movement in Latin America It identifies new phenomena and challenges that will put more pressure on water resources in the near future and that will create important socioeconomic constraints in population and their governments This volume offers an evaluation of water resources availability and consumption water supply and sanitation shortages management models and population growth and territory occupation trends in eighteen Latin American countries Also a set of recommendations policy proposals and projects is outlined *Business America* ,1980 Includes articles on international business opportunities **Geographical Perspectives on International Trade** Purva Yadav,2021-06-29 This book analyzes spatial and temporal patterns of international trade from a geographical perspective Trade is an important key to understanding the changing dynamics of economic spaces over time However studies by

geographers are largely confined to case studies whereas the spatial dimension is often missing from the approach of economists This study highlights spatial patterns and commodity composition of global trade and the nature of relationship between trade and other economic attributes A case study of the MERCOSUR trade block examines inter regional and intra regional trade flows The book captures a comprehensive picture of the structure of international exchange by using ample maps and illustrations as supporting features Many different methods are applied such as the location quotient to capture concentration and diversification of commodity composition data reduction techniques such as factor analysis and regression models for relating the economic structures and trade patterns as well as residual mapping among others This book is a significant contribution to geographical economical and social sciences research and very useful to graduate and post graduate students as well as scientists of all related areas who have interest in exploring the changing dynamics of the global economy via trade flows It provides a road map to further explore different dimensions of international trade and its role in understanding the transforming global economy
