Contracting for Public Services Penelope J. Brook, Suzanne Smith, 2001-01-01 A new book published by the World Bank's Private Sector Advisory Services outlines an innovative approach to delivering development assistance for public basic services such as potable water safe sanitation modern energy and primary education and healthcare Called output based aid the approach delegates service delivery to the non profit or for profit private sector under contracts that tie payments to the outputs or results actually delivered to target beneficiaries The book gathers cases of innovative output based approaches from across the infrastructure and social sectors and also provides a checklist for designing and implementing output based schemes From the World Bank website

Output-Based Aid Yogita Mumssen, Lars Johannes, Geeta Kumar, 2010-02-25 Developing country governments and the development aid community are acutely aware of the need to find more effective ways to improve basic living conditions for the poor as traditional approaches of delivering public support have not always led to the results intended Results based financing RBF instruments which tie the disbursement of public funding to the achievement of pre agreed results are now recognized as one important piece of the aid delivery puzzle The aim of these instruments is to enhance the effectiveness of public funding Output Based Aid Lessons Learned and Best Practices provides a practical understanding of the experience with output based aid OBA a results based instrument that is being used to deliver basic infrastructure and social services to the poor including through public private partnerships OBA has been used in the World Bank Group since 2002 including more recently through the Global Partnership on Output Based Aid which has a mandate to design and test OBA approaches The authors of this book analyze nearly 200 OBA projects in water and sanitation energy health roads telecommunications and education The piloting phase of OBA has in general been a success and OBA has demonstrated clear advantages over traditional approaches in terms of efficiently targeting subsidies and mobilizing the private sector to serve poor households that would otherwise go without an improved service OBA has also demonstrated that monitoring for results is possible if appropriate systems are put in place As the first comprehensive review of OBA in eight years this book will be an essential reference for infrastructure and social services sector experts and OBA practitioners around the world including staff of international financial institutions public and private service providers and NGOs as well as for donors and governments who are interested in piloting or scaling up and mainstreaming OBA approaches As the first comprehensive review of OBA in eight years this book will be an essential reference for infrastructure and social services sector experts and OBA practitioners around the world including staff of international financial institutions public and private service providers and NGOs and for donors and governments who are interested in piloting or scaling up and mainstreaming OBA approaches

The Millennium Development Goals for Health Adam Wagstaff, 2004-01-01 Annotation Provides information on progress and trends including poor/nonpoor disparities health systems reform as a means of laying building blocks for the efficient and equitable delivery of effective interventions the

financing of health spending through domestic resources and aid and improving the effectiveness of development assistance in health Linking the health Millennium Development Goals agenda with the broader poverty reduction agenda this book is a valuable resource for policymakers in developing countries and development practitioners working in the health nutrition and population sector as well as students and scholars of public health Policy Framework for Investment A Review of Good Practices OECD,2006-08-10 This Review of Good Practices is published as a companion volume to the OECD Policy Framework for Investment and provides analytical background material on each of the ten chapters of the Framework

The Private Sector in Development Michael U. Klein,Bita Hadjimichael,2003-01-01 The publication explores the role of the private sector in economic development and the challenges involved in the design of public policies which promote an appropriate balance between competition and regulation Chapters discuss the following topics the private sector and poverty reduction the investment climate public intervention to promote supply response private participation and markets for basic services pro poor policy design sustainability and reform aspects Tournament Approaches to Policy Reform Clifford F. Zinnes,2010-10-01 While much foreign aid achieves commendable goals some is ineffective In this volume Clifford Zinnes argues that a donor's intrinsic informational limitations on the local context as well as inability to control the progress of interventions mean that lack of success is not rooting in insufficient funding but in maladapted institution designs of interventions that don't foster local ownership He identifies and assesses a newly emerging class of foreign aid delivery that promises to overcome these obstacles The approach is based on prospective inter jurisdictional competition PIJC Beneficiary groups often local level governments supported by their private sector and civil society act as teams and compete against each other under explicit predefined rules and objectives to design and implement interventions under their own aegis to achieve the highest quantitatively measured performance either relative to others tournaments or against a preset benchmark certification Teams that cooperate internally are the likeliest to win the rewards which aside from the longer run benefits of the intervention itself might include more substantive financial or technical assistance from the sponsor Since only groups serious about reforming choose to play Zinnes says the incentives generated by the ensuing race to the top competition create local ownership encouraging recipients to draw on their own knowledge Moreover since all teams that compete and not just those who win donor rewards benefit from their own reform efforts he argues that this approach can leverage aid resources more than a conventional bilateral aid agreement Zinnes presents a dozen recent applications of the approach including those sponsored by the World Bank USAID the United Nations the Ford Foundation and others He also recommends improvements and ways to scale up PIJC based projects in applications ranging from protecting the environment and reducing red tap Resilience, Environmental Justice and the City Beth Caniglia,Manuel Vallee,Beatrice Frank,2016-12-08 Urban centres are bastions of inequalities where poverty marginalization segregation and health insecurity are magnified Minorities and the poor often residing in neighbourhoods characterized by degraded infrastructures food and

job insecurity limited access to transport and health care and other inadequate public services are inherently vulnerable especially at risk in times of shock or change as they lack the option to avoid mitigate and adapt to threats Offering both theoretical and practical approaches this book proposes critical perspectives and an interdisciplinary lens on urban inequalities in light of individual group community and system vulnerabilities and resilience Touching upon current research trends in food justice environmental injustice through socio spatial tactics and solution based approaches towards urban community resilience Resilience Environmental Justice and the City promotes perspectives which transition away from the traditional discussions surrounding environmental justice and pinpoints the need to address urban social inequalities beyond the build environment championing approaches that help embed social vulnerabilities and resilience in urban planning With its methodological and dynamic approach to the intertwined nature of resilience and environmental justice in urban cities this book will be of great interest to students scholars and practitioners within urban studies environmental management environmental sociology and public administration

[Strategic Contracting for Health Systems and Services](#) Eric de Roodenbeke,2017-07-05 Until the start of the new century efforts to strengthen health systems focused solely on the public

sector and health programs overseen by public bodies The private sector was sidelined in certain countries and even banned in others At the same time some private sector stakeholders readily adapted themselves to this special situation so as to avoid becoming part of a structured health system This volume notes profound changes in health care around the world in two areas The stakeholders involved in the health sector are increasing in number and diversifying as a result of the development of the private sector They are also responding to a process of democratization and decentralization These developments have been paralleled by greater functional differentiation Various stakeholders are increasingly specializing in particular areas of the health system service delivery procurement management financing and regulation The interdependence of health stakeholders becomes more evident along with the increased complexity of delivery systems as these respond to changing demand There is a compelling need to forge relationships Such relationships are in fact emerging in developed countries and more recently in developing countries They may be informal but are increasingly organized and structured

Water Services PPIAF.,2006 Annotation This informative toolkit provides options for the design of policies to facilitate the delivery of good quality water and sanitation services to the poor It highlights the need for tariffs investment stakeholder consultation and regulatory policies to address the affordability and sustainability of those services **Labor Issues in**

Infrastructure Reform Public-Private Infrastructure Advisory Facility,2004 Fears of job loss and changes in employment status have often led workers and unions to oppose privatization and to take actions that delay or block reforms Many developing country governments have been reluctant to undertake reforms because of labor opposition and the political costs involved Such difficulties are often compounded by concerns about the social impact of reforms particularly in countries where social safety nets and labor markets are lacking The objective of the Toolkit which includes a CD ROM is to provide

practical tools and information to help policy makers and practitioners deal with these sensitive issues The Toolkit helps governments identify and select appropriate strategies and approaches offers guidelines for design and implementation based on best practice and actual experience and indicates the factors influencing the choice of strategy and options The Toolkit is illustrated with examples checklists and templates that walk decision makers through best practice methodologies

Against Global Capitalism E. Osei Kwadwo Prempeh, 2017-03-02 The fundamental challenge of democratizing globalization by opening up spaces for democratic participation beyond the state is addressed in this study The author captures both the democratic activities and voices of opposition to neoliberal globalization and investigates how this reinvention of democracy through resistance to neoliberal globalization has taken shape in the African context In doing so he reasserts the relevance of the de globalization and anti capitalism movements With a careful selection of case studies this volume is ideal for classroom use and library reference
