

LAB 2: ACID-BASE EXTRACTION

I. INTRODUCTION

In the Acid-Base extraction experiment, the goal is to utilize the techniques to separate one organic compound from a mixture of solutions. The purpose is to obtain the desired product from extraction in order to achieve the isolated, pure form of the compound. A number of techniques will be used to achieve this goal, such as liquid-liquid extraction, melting point, neutralization, vacuum filtration, and gravity filtration.

Liquid-liquid extraction is used to partition an organic or aqueous compound from a mixture, and it occurs in three steps: distributing a solute between two immiscible liquids, the extracting phase, and the original phase. The melting point is the temperature range of the solid compound melting until it has converted into a liquid. We find the melting point of our compound by using a melting point apparatus that requires the solid to be packed into a melting point tube. Neutralization is a reaction where the water-soluble conjugate base is neutralized into the protonated form as a solid. To isolate the protonated solid, you will perform a vacuum filtration. Vacuum filtration is a laboratory technique used to collect crystalline solids from the solvent. Gravity filtration is another laboratory technique that is used to separate the neutral compound solid from the organic layer.

There are three important reaction mechanisms for this experiment such as the acid extraction, the base extraction, and the neutralization reaction.

- Acid Extraction is an amine that is insoluble in water reacted with a strong acid to form a highly polar, water-soluble, ammonium salt.
- Base Extraction is a carboxylic acid that is insoluble in water reacted with a strong base to form a highly polar, highly water-soluble, carboxylate.
- Neutralization is an acidic solution that is water-soluble reacts with an aqueous base to form the neutral, water-insoluble, deprotonated form of the acid. This reaction can also occur vice versa.

II. PROCEDURE

A. DISSOLUTIONS

1. Obtain the benzoic acid, 4-nitroaniline, and naphthalene mixture, and place into Erlenmeyer flask.
2. Dissolve mixture in dichloromethane.

B. EXTRACTION WITH AQUEOUS ACID

1. Place the separatory funnel in ring and tighten stopcock, place beaker underneath, and check for leaks.
2. Add mixture from part A, rinse flask with dichloromethane and add this too.
3. Add hydrochloric acid.
4. Add the stopper.
5. Remove from the ring and hold tightly.
6. Shake carefully with the stopcock open and repeat.

Virtue Ecclesiology John Fitzmaurice, 2017-05-15

Critiquing a paradigm of growth within the church this book contends that the church s growth ethic

should be replaced by one based on virtue Drawing on the work of Sennett Fromm and Hauerwas John Fitzmaurice argues that an approach taking growth to be the overriding task of the church is found to be shallow and risks infantilising the faith it purports to proclaim MacIntyre s proposal for a recovery of a virtue based ethic is examined and interpreted theologically through the concepts of narrative theology community sacraments and sanctification the role of practices in developing virtuous character is central The nature of a virtuous organisation is explored through a lens of organisational psychodynamics this understanding informs a model of church as a community of interpretation Fitzmaurice suggests that it is in and through sacramental practices that the transitional space for these virtues to be formed is created Tracing a similar corrosion of character within secular institutions that have opted for an overriding focus on growth this book offers an alternative based on the formation of corporate as well as individual virtuous character and considers the implications of a virtue based growth ethic on theological education and ministerial formation as well as in terms of public theology and the manner of the church s engagement with society

Paranoid Science Antony Alumkal,2019-04-01 Explores the Christian Right s fierce opposition to science explaining how and why its leaders came to see scientific truths as their enemy For decades the Christian Right s high profile clashes with science have made national headlines From attempts to insert intelligent design creationism into public schools to climate change denial efforts to cure gay people through conversion therapy and opposition to stem cell research the Christian Right has battled against science How did this hostility begin and more importantly why has it endured Antony Alumkal provides a comprehensive background on the war on science how it developed and why it will continue to endure Drawing upon Richard Hofstadter s influential 1965 essay The Paranoid Style in American Politics Antony Alumkal argues that the Christian Right adopts a similar paranoid style in their approach to science Alumkal demonstrates that Christian Right leaders see conspiracies within the scientific establishment with scientists not only peddling fraudulent information but actively concealing their true motives from the American public and threatening to destroy the moral foundation of society By rejecting science Christian Right leaders

create their own alternative reality one that does not challenge their literal reading of the Bible While Alumkal recognizes the many evangelicals who oppose the Christian Right s agenda he also highlights the consequences of the war on reality both for the evangelical community and the broader American public A compelling glimpse into the heart of the Christian Right s anti science agenda Paranoid Science is a must read for those who hope to understand the Christian Right s battle against science and for the scientists and educators who wish to stop it
