

ON-BOARD MONITOR SYSTEM

The **On-board Monitor System** was introduced as **optional** equipment on the 1997 MY E38s and E39s. It was made standard on the E38 750iL for 1999 and standard for all E38s in 2000. It uses the latest advances in electronic technology to bring new levels of comfort and convenience to the driver and passengers for control of the audio/communication systems. In addition the **Mark I Navigation system is incorporated** into the total scope of On-board Monitor Control.

NOTE: The E39 six cylinder models with the On-board Monitor option are equipped with the high version iKE and On Board Computer functions.

The On-board Monitor is essentially a control and display unit. All data processing and calculations are carried out by the individual system control modules. The display data is sent to the On-board Monitor over the various interfaces.

The On-board Monitor is mounted in the center dash console. It replaces the Radio/Tape Player, MID and DSP control panel (E38) if equipped.

It consists of control knobs and buttons for programming and operating the various systems.

There is a 5 1/4 inch, color LCD screen for display of all system functions. The tape player drive is also part of the On-Board Monitor unit. However, the radio receiver/amplifier module is now mounted in the trunk. The audio system is controlled from the on-board monitor. Additionally, the systems controlled and programmed through the On-board Monitor include:

- On Board Computer
- Navigation system
- Telephone
- Code Function
- Set (on-board monitor setup)
- Television (Early production only)
- Digital Sound Processor (DSP)
- Auxiliary Ventilation
- Emergency (provides vehicle location and automatically dials telephone for help).
- Monitor Off (Switches the monitor off).
