The Measurement of Psychological States Through the Content Analysis of Verbal Behavior Louis A. Gottschalk, Goldine C. Gleser, 1979-01-01 *Content Analysis of Verbal Behavior* Louis A. Gottschalk, Fernando Lolas, Linda L. Viney, 2012-12-06

The psychological states of patients with diabetes mellitus were compared with those of patients suffering from other chronic diseases and people with no diagnosed chronic diseases These states were assessed by applying content analysis scales to transcripts of their descriptions of their current experiences Analyses of the diabetics scale scores revealed a pattern characterized by much anxiety depression anger expressed both directly and indirectly together with feelings of helplessness The sources of anxiety which proved to be of most importance to them were fears of death and bodily mutilation as well as guilt and shame They experienced little sense of sharing with most people around them although they showed considerable enjoyment of close relationships with family and friends This pattern of psychological states did not vary with the sex of the patients or whether they were interviewed in a hospital or at home nor with recency of onset or multiplicity of health problems It was similar to the pattern of patients with other chronic diseases but differed significantly from that of the healthy group Acknowledgment The authors wish to acknowledge the contribution of Carol Preston to the collection and analysis of these data which were made available in part by patients of the Wollongong Hospital and members of the Illawarra Branch of the Diabetic Association of New South Wales References 1 Strong JA Baird JD 1971 Diseases of the endocrine system In Davidson S McLeod J eds The principles and practice of medicine *Content Analysis of Verbal Behavior* Louis A. Russell,2013-11-21 This book of original contributions presents investigations of psycho therapeutic interaction While the methodological strategies and the theoretical orientations of these investigations are notably diverse the utterance by utterance analysis of client therapist dialogue provides a strong commonality of interest and a particularly productive perspective from which the process of psychotherapy can be illuminated It is hoped that the contributions selected and the problems with which they are occupied will make evident the rich possibilities such a perspective has to offer It should be noted however that the present volume is not a compendium any effort to be exhaustive would be thwarted by considerations of length alone Thus certain omissions were inevitable It is hoped that the interested reader will use the extensive references to become acquainted with the works not here included Whatever effort I extended as editor and contributor to this volume could not have been undertaken without the lifelong spirit of support of my parents Selma S and Jay F Russell I dedicate my contribution to them

The Concept of Defense Mechanisms in Contemporary Psychology Uwe Hentschel,Gudmund J.W. Smith,Wolfram Ehlers,Juris G. Draguns,2012-12-06 What is the scientific status and the truth value of the concept of defense mechanisms Among contemporary psychologists three types of answers to this question may be expected Some would wholeheartedly endorse the theoretical clinical and research value of this notion others would reject it outright Between these two extremes a large number of observers perhaps the majority would suspend their judgment Their

attitude compounded of hope and doubt would capitalize on defense as an interesting and promising concept At the same time these psychologists would express skepticism and disappointment over its clinical limitations theoretical ambiguity and research failures The present volume is primarily addressed to the audience of hopeful skeptics those who have not given up on the notion of defense yet have been frustrated by the difficulties of incorporating it into the modern streamlined structure of psychology To this end we have brought together theoretical and empirical contributions germane to defense together with reports about their applications to clinical and personality assessment especially in relation to psychopathology psychosomatics and psychotherapeutic intervention
