Continuous Measurement Of Blood Oxygen Saturation In High Risk Patients Volume 1:

Tissue Oxygen Utilization Guillermo Gutierrez, Jean L. Vincent, 2012-12-06 Disturbances in peripheral O₂ extraction can be produced in dogs treated with 2 endotoxin and thereby provide an opportunity to test theories for the origin of pathological O₂ supply dependency or to try different treatment modalities The 2 most serious deficiency in the current animal models is the inability to mimic the increased O₂ demand that is observed in patients at O₂ delivery rates in excess of 2 normal A particular feature of this increased O₂ demand is that it apparently does 2 not stimulate increased O₂ extraction although the limitation in O₂ extraction has 2 not been explored in patients by lowering O₂ supply for obvious reasons At least two possibilities to account for increased O₂ demand could be investigated in animal models however The amount of O₂ that is utilized in extramitochondrial pathways which is normally on the order of 10% may be greatly increased in ARDS and sepsis by O₂ radical formation There is presently no information 2 concerning how much O₂ might be used in this way Another strong possibility is that mitochondrial injury perhaps as a result of O₂ radical formation uncouples oxidative phosphorylation Some evidence presently in the literature supports this idea 19 Indeed the association of increased blood lactate levels with higher than expected O₂ demands makes uncoupling a very attractive hypothesis that warrants further investigation in animal models using such agents as 2 4 dinitrophenol References 1 Functional Hemodynamic Monitoring Michael R. Pinsky, Didier Payen, 2005-09-14 This is the newest volume in the softcover series Update in Intensive Care Medicine It takes a novel practical approach to analyzing hemodynamic monitoring focusing on the patient and outcomes based on disease treatment options and relevance of monitoring to direct patient care It will rapidly become a classic in the approach to patient monitoring and management during critical illness Principles of Critical Care Jesse B.
