Computers and Society in the Past Half Century Abbe Mowshowitz, 2024-04-17 Almost fifty years ago the author wrote the first comprehensive critical study of social issues in computing The Conquest of Will 1976 This new book revisits this seminal study featuring an overview of technological advances over the past half century and provides a unique comparison between what was believed and expected of computers back in 1976 and actual outcomes up to the present time Despite the extraordinary changes in technology much of what has emerged in contemporary society was anticipated fifty years ago and we are still grappling with some of the same basic challenges For example the computer's threat to privacy has been a constant issue ever since the late 1950s but the regulatory framework designed in the 1960s has been upended by the Internet Artificial Intelligence too has been a contentious issue since the late 1950s but until recently discussion was largely confined to academia and there was little urgency to regulate its further development and application The comparisons offered in this book will highlight what we got right and wrong in the past and point to the sources of good and bad predictions While there have been many studies of social issues in computing published since The Conquest of Will appeared in 1976 this is an unusual and valuable longitudinal comparison of the current situation with what prevailed and was predicted half a century ago

Life Hereafter Paul Crittenden, 2020-10-24 In this book Paul Crittenden offers a critical guide to the problematic origins of biblical teaching about the afterlife and the way in which it was subsequently developed by Church authorities and theologians Origen Augustine and Thomas Aquinas in particular In the post Reformation era the focus falls on the challenges set by modern secularism The tradition encompasses a body of interconnected themes an apocalyptic war in which the Kingdom of God triumphs over Satan's powers of darkness salvation in Christ the immortality of the soul and finally the

resurrection of the dead and the last judgment ratifying an afterlife of eternal bliss for the morally good and punishment in hell for wrongdoers The critique questions these beliefs on evidential ethical and philosophical grounds The argument overall is that what lies beyond death is beyond knowledge The one fundamental truth that can be distilled from the once compelling body of Christian eschatological belief for believers and unbelievers alike is the importance of living ethically **From Goods to a Good Life** Madhavi Sunder,2012-06-26 A law professor draws from social and cultural theory to defend her idea that that intellectual property law affects the ability of citizens to live a good life and prohibits people from making and sharing culture Essays On A Half Century W.
