Coping with Crises Shao Chuan Leng, 1990 This volume is a comparative study to examine both in theory and in practice the employment of constitutional emergency powers in five polities to combat internal and or external threats The focus is only on limited governments and not on absolutist government free of legal constraints

The Limits of Russian Democratisation Alexander Domrin, 2006-04-18 Written by an established scholar in the field this text examines the nature of emergency powers and their use in the Russian constitution It explores the use of such powers in Russian history comparing the Russian situation with those that exist in other countries and discussing the legal thought underpinning such powers The practicalities and theories of emergency orders are traced throughout history with Dormin arguing that the longer an emergency regime lasts the less effective the measure becomes With original research and remarkable insight this text will be of interest to scholars

Managing Emergencies and Crises: Global Perspectives Naim Kapucu, Alpaslan Özerdem, Abdul-Akeem Sadiq, 2022-03-30 Managing Emergencies and Crises Global Perspectives is primarily for graduate level students and instructors who study and research on a wide range of socio economic and political issues related to the management of natural disasters from a social disaster perspective From a broad perspective this book covers various concepts including prevention preparedness response and recovery as well as vulnerability and risk assessment that need to be understood by those in the emergency management field

Freedom or Security Michael Freeman, 2003-05-30 Several democratic countries have used emergency powers to restrict or suspend individual liberties in order to fight terrorism more effectively Emergency powers are controversial in their potential to undermine democracy and civil liberties Freeman challenges popular arguments of both the supporters of emergency powers who focus on their expected effectiveness and the critics who focus on the dangers In reality the recent experiences of four different democratic states that have invoked emergency powers show that a positive outcome is just as likely as negative outcome As the United States fights its war against terrorism it should heed the lessons learned by other democracies in similar struggles particularly Great Britain s relationship with Northern Ireland in the 70s and 80s Uruguay s response to the Tupamaros in the late 60s and early 70s Canada s dealings with the FLQ in 1970 and Peru s conflict with the Shining Path movement in the 80s and early 90s

Terror in the Balance Eric A. Posner, Adrian Vermeule, 2007-01-04 In Terror in the Balance Posner and Vermeule take on civil libertarians of both the left and the right arguing that the government should be given wide latitude to adjust policy and liberties in the times of emergency They emphasize the virtues of unilateral executive actions and argue for making extensive powers available to the executive as warranted The judiciary should neither second guess security policy nor interfere on constitutional grounds In order to protect citizens government can and should use any legal instrument that is warranted under ordinary cost benefit analysis The value gained from the increase in security will exceed the losses from the decrease in liberty At a time when the struggle against violent extremism dominates the United States agenda this important and controversial work will spark discussion in the classroom and intellectual press alike

Quality of Life Improvement: Smart Approaches for the Working and Aging Populations Sabina Baraković, Zahid Akhtar, Jasmina Barakovic Husic, 2024-03-19 Quality of life QoL is a broad concept that has many definitions and meanings depending on the context under consideration It can be perceived as the overall enjoyment of life and a multidimensional concept which emphasizes the self perceptions of an individual s current state of mind which is affected in a complex way by the person s physical health psychological state personal beliefs social relationships and their relationship to salient features of their environment On the other hand demographic data suggests an increased need for workers worldwide and a rapid aging trend in the active workforce as well as in general This trend of workforce deficit and population aging will be even more prominent in the future Therefore in order to have and sustain a healthy motivated and productive workforce but also

healthy independent and active elderly adults one must improve their QoL and vice versa Improving QoL will improve general public health and in turn create communities who can contribute in diverse and positive ways to both promote and sustain health for future generations
